# NOTICE TO OWNERS OF ALEMITE-EQUIPPED CARS

## To Be Sure Genuine Alemite Lubricants—Lubricants Made Especially for Use in Alemite High Pressure Lubricating Systems—Are Used in Your Car

### Go to the Alemite-ing Stations Listed Below —Look for the Yellow Sign

Owners of cars, equipped with the Alemite High Pressure Lubricating Systems, frequently ask whether or not a special type of lubricant is required in those systems.

The answer is, "yes." All greases are not fitted to the Alemite Systems. The use of unknown, inferior greases, frequently found in haphazard "Greasing Stations" claiming "High Pressure Lubrication," is seriously urged against.

Even systematic "greasing" of that nature, based on mileage, is not PROPER LUBRICATION. Nor is it insurance against the Improper Lubrication to which 80% of all repair bills are traced by authorities.

#### Simple Protection Now

For your own protection, the obviously sensible thing is to go direct to a genuine Alemite-ing Station for lubrication service. To have your car Alemited; not "greased."

These stations, listed below, identified by the Yellow Sign shown here, use special Alemite Lubricants. Lubricants developed by the makers of the Alemite Systems, themselves, after years of research, as CORRECT for those systems. Lubricants that NEVER VARY in quality.

#### Look for the Big Yellow Sign

#### How To Increase the Trade-In Value of Your Car

Alemite High Pressure Lubricating Systems together with Alemite Lubricants especially designed for the most efficient results in these systems, lengthen car life and largely eliminate 80% of all repair bills. Car manufacturers recognize this—more than 95% of today's cars are equipped with Alemite.

A properly lubricated automobile means a long-lived automobile—one that naturally commands a higher trade-in value.

So Alemite now offers Recorded Alemite Service—a certified record of all the lubrication services performed on your car. A record that "pedigrees" it and will increase the re-sale value of your car 10% or more.

The dealers whose names appear in this advertisement offer genuine Alemite-ing with genuine Alemite Lubricants. Ask them about the new R. A. S.—Recorded Alemite Service.

Efficient mechanics serve you at these stations. You get the ultimate in scientific lubrication to protect your car's life; to give you smoother operation and amazingly fewer repair bills.

#### What Alemite-ing Consists Of

1. BEARINGS: Alemite High Pressure Lubricant forced into every vital chassis bearing with Alemite equipment by expert Alemite mechanics—every 500 miles.

2. GEARS: Differential and transmission thoroughly flushed out by a special Alemite process. New Alemite Gear Lubricant forced in—every 2,500 miles.

3. SPRINGS: Springs sprayed with special Alemite Graphite Penetrating Oil—every 500 miles. Eliminating ALL spring squeaks and making the car run immeasurably smoother.

Just drive your car to one of the stations listed

below and try this service. You will notice an immediate difference in the way your car runs.

#### Specially Designed Equipment for Alemite-ing

Now you can be sure. Watch the work yourself. Not a bearing will be missed. And the work will be done in just a few minutes with latest type super-machines. Most of the Alemite dealers listed below use this type of equipment.

#### 1—Alemite Guns

(Typical example at right) Special Alemite high pressure guns are used. Guns that produce pressures of thousands of pounds per square inch, and will force fresh, clean lubricant into the chassis bearings, replacing the old grit and grease. Work done in a few minutes' time.

#### 2—Alemite Gear Flusher

This type of machine washes out the transmission and differential with a strong, forceful stream of diesel oil. The electric motor gives sufficient force to clean out the metal filings and other foreign matter.

#### 3—Alemite Spring Sprayer

This spray operates by compressed air and forces Alemite graphite penetrating oil between each leaf of the spring. It is also used for taking out squeaks located in the body of the car. The oil evaporates and leaves a dry film of graphite. No more collection of road dust, because we do not use cheap crank case oil.

In having your car lubricated insist on genuine Alemite lubricants. These lubricants cost the dealers more money—but costs you no more than ordinary greasing.
