If you had to Make **50** gallons of your Good Cream sauce wouldn't you do it a Little at a Time?

MAKING cream sauce in large quantities and roasting coffee in bulk present similar difficulties. The cream sauce becomes lumpy and the coffee roasts unevenly.

Hills Bros. roast every pound of their coffee evenly because, by a continuous process, only a few pounds at a time pass through the roasters. The development of the flavor is perfectly controlled. Uniform strength and richness are assured. You enjoy this goodness in every cup.

This exact process is Hills Bros.' exclusively. Naturally the flavor it produces is not found in any other coffee. No wonder that coffee-lovers everywhere drink Hills Bros.

Hills Bros. Coffee is packed in vacuum. All the appetizing aroma and satisfying flavor come to you intact. Ask for Hills Bros. Coffee by name and look for the Arab, the trademark, on the can.

So that all may enjoy healthful vegetables Cook with sugar in only a little water

A GROUP of cooking experts recently made extensive tests in New York on the correct way of cooking vegetables. They made a discovery so simple and yet so far-reaching that every woman interested in good foods should know about it.

The vegetables were cooked in various ways. The various dishes were numbered. Then the experts tested them and voted. In every case the vegetables prepared with sugar and little water won unanimously.

Try, for example, this delicious Corn Pudding. Use either fresh or canned corn. To 2 cups of corn add 1 canned pimiento and 1 small green pepper shredded coarsely, 1/2 small grated onion, 2 well-beaten eggs, 2 level tablespoons of sugar, 1 teaspoon of salt, 1/4 teaspoon of pepper and paprika, 2 tablespoons of flour, 1 teaspoon of baking powder and 1 cup of milk. Mix all ingredients together, add 2 teaspoons of melted butter. Drain into a well-buttered casserole and bake half an hour. Then remove cover and delicately brown.

Try this new discovery every time you cook a vegetable. Note how much more both children and adults like vegetables cooked in this way because the added sugar develops and brings out all the natural, tasteful flavors of the foods. Sugar restores the flavor of freshness to vegetables that are wilted and to canned vegetables. Add a dash or more of sugar, depending on quantity, when cooking peas, lima beans, string beans, corn, carrots, beets, parsnips, sweet potatoes, squash, onions and tomatoes. Good food promotes good health. The Sugar Institute.

(By Mrs. Marion Tryer)
TALENT, Ore., May 24.—(Special.)—State Sanitary Engineer Green from Salem was in Talent Tuesday morning examining the sanitary conditions of Talent. While the town authorities think it is much better to wait until 1932 until the water bonds can be lifted and a new bond issue voted on, there are three long years for a typhoid or some other deadly epidemic to visit Talent, which would probably cost the town a great deal more than the installing of a sewer system would amount to.
