

### ROAD CONNECTION TO DIAMOND LAKE SEEN FOR FUTURE

The action of the state highway commission in dedicating the Diamond lake road, from Union creek to a point on the Dalles-Columbia highway, near the Blue Mountains as a forest highway, means that in a few years Diamond lake will have high-class road connections with this city. For many months, C. E. (Pop) Gates of this city, southern Oregon member of the state highway commission, has been working for this end.

a standard road. The Federal Bureau, as long as the road was undesignated as a forest highway, would expend no money, aside from maintenance. It is now a nine-foot road. Under the new order, it can be made the regular width. Commissioner Gates said that while he had no definite information, he expected the Federal Bureau would inaugurate some improvements next year, and that appropriations for that purpose would be included in the 1930 forest road appropriations.

### SUICIDE GESTURE PROVES FATAL TO LOVESICK PRINCE

PARIS, May 28.—(P)—Prince De Sagan, 19-year-old son of the former Anna Gould, died this morning after a vain 11-day fight to recover from a bullet wound, self-inflicted when his parents objected to his marrying until he was 21.

The girl for the love of whom the young prince had shot himself was not present when he died. She had not called yesterday, because the doctors, mindful of the patient's high fever, advised her that it would be wiser to remain away.

At his bedside when he died were his mother, his father and his half-brothers, Count Boniface De Castellane, Count Georges De Castellane.

The elder Duke of Talleyrand was so much affected by the critical illness of his only son that it had first been decided he should not be at the prince's sick-bed last night, but when the doctors announced to the duchess that the boy could not live through the night, his father was summoned.

Sir Esme Howard, British ambassador, politely suggests that foreign representatives give up their right to import alcohol beverages. Anything to oblige the administration, in these debt adjusting days.

The French embassy emphatically says, "No, thank you. We do not care to live on ice water, ice cream and mince pie. When we go to China we do not eat birds' nest soup. We do not eat buckwheat cakes with sausages or drink ice cream soda water in America."

President Hoover, having seen the world, knowing its ways, would not dream of forcing America's feeble attempt at totalitarianism on foreign representatives.

Steamfitters' and plumbers' unions threaten to tie up \$500,000,000 worth of building in Chicago because of quarrels between unions.

China Tamani, who thinks he knows what India needs, wants British power expelled and ruler-ship of India restored to the rajahs under constitutional government.

Native princes submitting themselves to constitutional regulations would be interesting. A restoration of native rule would mean re-orientation of "suttee," the burning alive of widows, with their husbands' corpses. It would mean un-ful, wages high, dues and strikes restricted marriage of little girls
