Fascinating Screen Star Tells New Beauty Secret

HOLLYWOOD, Calif.—“People always admire a beautiful smooth skin,” declares Clarence Brown, director for Metro-Goldwyn-Mayer, and voices the experience of 39 movie directors. “Lux Toilet Soap gives my skin a satiny-smoothness,” says Raquel Torres. Like nine out of every ten screen stars, this Metro-Goldwyn-Mayer beauty uses this white, fragrant soap. And in Hollywood all the great film studios have made it the official soap for all dressing rooms.

PRESIDENT STUDENT OF NEWS GRIST

Compilation of Dispatches and Editorial Opinion Perused Each Day — More Than 35 Dailies Received at White House — Tariff and Farm Relief Big Interest Now.

By Richard L. Turner.
Associated Press Staff Writer.
WASHINGTON, June 5.—(AP)—President Hoover is keeping a vigilant watch upon the trend of public sentiment on the great questions of government, as it is reflected in the press of all sections of the nation.

Late each day there is placed before him his own specially prepared and private newspaper, dubbed “The Yellow Journal” by White House attaches, not for its contents, but because it consists of clippings mounted upon sheets of yellow foolscap loosely bound together with the red tape that adorns, literally, so many of Washington’s public documents.

Essentially, the president’s paper is a compilation of news dispatches and editorial opinion gleaned from the columns of more than 35 daily papers, which are received at the executive mansion. But even this is not sufficient to meet the desires of the chief executive, and to it have been added the services of two specially selected clipping bureaus.

If his busy schedule permits, Mr. Hoover makes a careful study of the clippings before leaving his office, although he sometimes takes them to the White House proper and goes over them there a little later. He prefers, however, to dispose of “The Yellow Journal” before leaving his desk.

Special Interest.
President Hoover is most interested at present in the reaction of the press to two of the great domestic problems of the day, tariff revision and farm relief. Numerous journals from the agricultural northwest have been added to the list of papers usually received at the White House so that the president may have a thorough knowledge of the attitude of the press on these topics.

The papers from which “The Yellow Journal” is compiled are the dailies of the larger cities. The task of combining the smaller papers has been given over to the clipping bureaus. These, incidentally, were chosen with some difficulty as first inquiries revealed that only a few such establishments make a practice of clipping editorials.

The president’s own newspaper was established during the Wilson administration. It was the idea of Joseph Tumulty, President Wilson’s secretary, and was used in varying degrees by both President Harding and President Coolidge. At the outset of the Hoover administration its scope was enlarged by increasing the number of papers from which it was compiled and adding the services of the clipping bureaus.
