NEWSPAPER FOLK INVITED TO VIEW CRATERIAN MOVIE

The employees of the Medford newspapers and their families will be the guests of George A. Hunt company at Hunt's Craterian theatre tomorrow night, at a private showing, or pre-view of that nationally much talked of and discussed all-talking film, "Gentlemen of the Press," a newspaper drama, which begins its Medford engagement next Sunday afternoon with shows afternoon and evening daily until next Thursday.

This private show for the local newspaper folk tomorrow night will begin at 10:30 o'clock, immediately after the regular audience has left the theater after the second show, and will last until midnight. Every newspaper worker in any capacity of Medford, and his or her family, or in case of lacking families, their sweethearts or escorts, are urgently invited to become the guests of the management at the pre-view, and be on

HOSE QUESTION IS LEFT TO TASTE OF NET PLAYERS

WIMBLEDON, Eng., June 6.—(AP)—It's up to the women to decide whether or not they will wear stockings while playing in the all-England championships here. The tennis authorities have not and decided not to interfere, even though the change in the customs of staid old Wimbledon has caused much discussion.

After a private discussion of the affair yesterday, the governing committee issued a brief communique in reference to "the nature and extent of clothing suitable to competitors," adding "the committee prefers to reply as heretofore on the good taste and good sense of the players, whom the committee wishes to regard so far as possible as their invited guests."

PROBE REPORTS JAP SHIP BURNED AT SEA

LONDON, June 5.—(AP)—A dispatch to the Exchange Telegraph company from Tokyo said the Japanese steamer Ugo Maru had arrived at Kamchatka, Siberia. Authorities were said to be investigating previous reports the vessel had burned and its crew of 43 and 780 passengers lost.

The ship was under charter by the soviet fish trust and was bound for Kamchatka from Vladivostok. Soviet authorities in denying the mishap charged the reports were spread to make it difficult to recruit other fishing crews.

SPECIAL EDITION FOR CELEBRATION SIXTH ST. LIGHTS

The Mail-Tribune will put out a special edition of the paper Saturday afternoon as an added feature of the celebration accompanying the turning on of the new illuminating system on Sixth street. Usually the smallest paper of the week, the Saturday edition will be considerably larger, with special feature attractions in keeping with the celebration.

The merchants and business people along Sixth street will play the role of hosts to the rest of Medford, and the city will enjoy one of the most carnival and gala festivities experienced in many years. An orchestra will be engaged and street dancing will be held during the evening. Favours and confetti will flow freely through the evening and a number of stunts will be staged for the amusement of the public. The lights along Sixth street will be switched on at 8:45.

To maintain a slender figure, no one can deny the truth of the advice: "REACH FOR A LUCKY INSTEAD OF A SWEET."

Frantic Campaigns . . .

to substitute other cigarettes for Lucky Strike fail largely because Luckies' superiority so quickly demonstrates itself. Lucky Strike represents a milestone in the progress of cigarette manufacture. The toasting process makes Lucky Strike the brand of distinction, and, in the opinion of 20,679* physicians, is the reason Luckies are less irritating. No other cigarette enjoys this secret heat treatment which removes impurities and irritants, produces a flavor beyond comparison and assures the smoker the maximum of delightful smoking pleasure and comfort.

*The figures quoted have been checked and verified by L. V. BRAND, R. S. BRIN, and MONTGOMERY, Accountants and Auditors.

George P. Hill
 President,
 The American Tobacco Company, Incorporated

The Lucky Strike Dance Orchestra will continue every Saturday night in a coast to coast radio hook-up over the N.B.C. network.

USE OF ELECTRIC SCREEN IS TOLD AT COPCO FORUM

Members of the Copco Forum enjoyed a most interesting program this noon when several well known authorities on fish screens addressed the meeting on the subject of electric fish screens. The talks were of an instructive nature.

Shirley Baker, who represents the U. S. bureau of fisheries, outlined the activities of this bureau in the conservation of fish through the installation of proper protective devices in stream and irrigation ditches.

After a thorough investigation it was found that the electric fish screen seems to be the best protection for large intakes rather than the old type mechanical device used for smaller streams.

Mr. Baker complimented the Copco group on their organization and thanked the company for the fine cooperation which he and his associates had received in their local activities.

Professor McMillan gave a short history of the electric fish screen, in the development of which he is greatly interested, and stated that the first move in perfecting the electric screen was made by the power companies in 1926. He also described the new method of placing the electrodes of the screen in the stream and told of a new type transformer which is designed to take care of the special current required to operate this device which operates at only six cycles per second.

V. E. Gilroy, field engineer in charge of the installation, told of the installation of the two electric screens at Gold Ray, one of which is at the tailrace and one at the intake. The technical details of the screens were described by Mr. Gilroy, who stated that the screen at the tailrace was closely watched since its installation May 12, and, although scores of large salmon had approached the screen, they had all been diverted without any harm. He expressed thanks to the Copco group for their helpful and friendly attitude and complimented the Forum upon their fine spirit of esprit de corps.

Bill Coleman, well known expert on fish screens, told of the work being done in perfecting the electric fish screen and said that proper fishways will take care of passing fish over dams up to 50 feet in height. He also spoke of the excellent cooperation received from Copco and thanked the company for its efforts in assisting the work of the state game commission.

Harry Olson presided as chairman of the meeting.

Guests at the luncheon included the following: Shirley Baker, representative of the U. S. bureau of fisheries; V. E. Gilroy, field engineer in charge of installation of fish screens; Prof. F. O. McMillan, professor of electrical engineering at the Oregon State college; and W. R. Coleman, superintendent of fish screens of the Oregon state game commission.

\$10 REWARD

This paper will pay \$10 reward for information leading to arrest and conviction of anyone tearing down the new Mail Tribune paper boxes.

Notice is hereby given that there is a fine and interest, most for destroying property of this kind, and this paper will prosecute to the full extent of the law any and all persons who in any way deface or destroy these boxes.

Clean boxes wanted at the Mail Tribune office.

"JUST TRY IT"

American Popular Music (jazz, so called) and Radio have increased the desire to play the piano; but few want to go through the drudgery of dry technique without tunes. They want to play popular music, and classical music, too, but they want to play now, not three years from now. All who play the piano play jazz, or try to play it, or wish they could play it. To meet the situation, new and quicker methods have been devised, with special methods in modern jazz as an art form, and as a help in the playing of classical music rather than a hindrance.

The Haight Supplemental System

is one of these new, short course methods, and is for any person over twelve whether a player now or not.
