## ANNUAL ELECTION SCHOOL BOARD AT TABLE ROCK 17TH

TABLE ROCK, Ore., June 7.—(Special.)—The Table Rock school board met Thursday night to close up the business for the past school year and get reports ready and notices posted for the annual school meeting and election of officers June 17.

Glen and Claud Wilson and Alvin Hamilton started Monday morning on the long journey to the Kansas wheat fields, using for transportation a motorcycle equipped with a side car.

Many claim that the present rainy weather is an almost exact reproduction of the weather in June, 1913, when hundreds of tons of hay throughout the valley were ruined.

Mr. and Mrs. G. C. Nicewood and daughter, Dorothea, of Medford were visiting friends here last Sunday.

A Medford firm delivered a Hotpoint electric range to the C. W. Sage home Wednesday, which is expected to prove quite a convenience during the summer months.

The present wet weather is holding up much outdoor work, such as thinning fruit, cultivating and haying, and if it continues much longer will be very apt to spoil what hay is down, which is said to be considerable.

Although damaging to hay, the large amount of moisture now falling is highly beneficial to grain fields, pasture and corn and potatoes and will undoubtedly cause a large increase in fruit crops, especially in the higher sections where the shortage of moisture was already beginning to be felt.

Many from here attended the young people's meeting at Sams Valley last Sunday evening.

J. M. Dodge, the Medford well driller, and family were Sunday visitors here with relatives.

Irwin Frey and A. Edler, who are employed at Chemult, spent the week end with home folks.

SAMS VALLEY, Ore., June 7.—(Special)—Since we have been visited by showers throughout each day and rains at night for the past week, the hay men are wearing long faces over their first cutting of alfalfa which is mostly down, while the fruit men's faces are weathed in smiles; the rainy weather is wonderful for them unless it should bring back the old blight conditions that used to cause so much anxiety and which they have not had to combat for the past several dry springs and summers.
