

SEND CREW TO PREPARE LAKE LODGE

First Workers Leave Today For Season's Activity at Crater Lake—New Features This Year—Cafeteria, Trail Horses, Rim Veranda—40 Passenger Launch Built.

New features of Crater National park this year will be the new cafeteria, with seating capacity of 150, and connecting grocery for the sale of camp supplies, both of which will be operated by the lodge management on the rim at the camp grounds by July 20; the fact that 18 saddle horses from the University of Oregon riding academy will operate daily in carrying tourists back and forth on the trail from the rim at \$1.50 per trip; and that the new veranda 80 feet long and 12 to 14 feet wide along the rim by the lodge, will be covered with awnings and ready for use by July 15.

The work of getting the lodge ready for the season's opening July 1 began today, as announced by General Manager R. W. Price of the Crater Lake National Park company, when the first cleanup crew of 12 employees under C. S. Richardson, manager, and H. E. Dean of Portland, chief of the lodge for the seventh consecutive year, left Medford for the lodge this morning.

Next Tuesday June 25 the lodge office crew of six will leave under direction of W. J. Vincent, auditor of the company and lodge for the past 12 years, and also Miss Josephine Price, who will act as her father's assistant during the season.

On the morning of June 26 a crew of six men under Miss Vincent will go to the lodge from here and from then on until July 1 the remainder of the large number of employees will be leaving in groups of eight to ten daily until the entire staff of 80 employees is functioning.

This will be the first time in the lodge's history that the employees will be able to ride in autos all the way from Medford to the lodge to prepare for the opening of the season without trudging through deep snow.

Stages Start July 1

Eighty per cent of the company's employees this year will have been in its employ at the lake from two to four years. Among the employees will be 25 girl and boy students of the University of Oregon.

Seven stages will begin operating daily between the lodge and Medford, Klamath Falls and Chiloquin on the morning of July 1 for the season.

As soon as the snow is off the rim road in the Wineglass vicinity the new 10 passenger launch of the Crater National Park company that was built last winter by the Telford Bros. of Klamath Falls will be lowered into the lake, to operate on that body of water the rest of the season, for the amusement of the tourists.

The work of completing the cafeteria building, which will seat 150 persons and be so constructed that additions can easily be built on the structure to enlarge that capacity whenever needed in the future, will begin today business daily from July 20 on, open from 9:30 a. m. to 10 p. m.

The equipment for the cafeteria will be shipped from Portland on July 5. Miss Evelyn Dew of Medford will be in charge of the cafeteria during the season.

The 12 new for-rent cottages of the concession company located at the rim near the cafeteria will be ready for occupancy with the opening of the season and during that period and fall more cottages will be built.

Frank Salter will, as usual, be in charge of all the concession company's building work this season.

The present outlook is for an increased attendance at Crater National park this season over last year's record-breaking attendance of over 113,000 persons, although the park and the company officials would be well satisfied if last year's record is maintained. This is because financial conditions in California and among the farmers of the middle west are not so good as last year.

Benson at Ft. Lewis

WASHINGTON, June 20.—(AP)—The department of commerce was authorized today by the war department to establish a Benson light at Fort Lewis, Wash., as a part of the air navigation facilities on the San Francisco-Seattle Airways.

Head—Sheep bridge constructed across Deschutes river north of here to provide means of moving sheep to and from Bend stockyards.

Striking Beauty

Helen D'Arcy, striking beauty and toast of London, is the heroine of "For the Love of a Lady," which will appear in the Mail Tribune beginning Monday, June 24.

FINANCE EXPERT FINDS GROWERS TOO OPTIMISTIC

John A. Meade Tells Traffic Assn., Consumers May Balk At High Price Talk—Speck Estimates Bartlett Pear Crop.

John A. Meade, comptroller of a Seattle, Wash., finance company, in a brief talk before the Rogue River Traffic association this afternoon declared: "That, while my views might seem out of harmony at this time, there is too much grower optimism regarding fruit prices." He has visited the fruit districts of Washington, Idaho, Utah, California and this state.

"There is too little regard for the consumer right now," said Mr. Meade, "and the consumer is the one we have to deal with last. Everyone knows that high prices bring sales resistance. Now is a time to operate with caution."

C. M. Speck estimated that the Bartlett crop of the Rogue River valley this season, including the Grants Pass district, would approximate between 17,000 and 18,000 tons, compared to 19,000 tons last year. Representatives of canning interests are now in the valley interviewing growers relative to the sale of their crops.

The matter of this section being represented in the pending suit of the interstate commerce commission to determine refrigerating car costs was referred to the traffic committee. Fruit sections of Washington have invited the Rogue River valley to join with them. A plan is afoot to have California join with the northwest in an all-coast representation. Attorney Rawles Moore explained that the refrigerator case was of high importance to this section.

Albert Burch president of the Fruitgrowers' league, informed the gathering that the prospects were bright for securing the services of Prof. E. P. Hartmann of the Oregon State college to study marketing and storage conditions in the east. He said that the regents would make their decision as soon as they returned from their present tour, and that it was a question of finances and securing a teacher to take Professor Hartmann's place. He said the financial aspect would be attended to by contributions locally and that the task of securing a teacher was not insurmountable.

Barnes Tells Troubles

J. C. Barnes, a grower, reported that in his canvassing of the valley to secure guarantors for the winter pear campaign, he encountered difficulties among the small growers as some declared, "I am not going to pay any assessment to send Professor Hartmann from Corvallis to New York, as it is just a scheme to establish a bureau." Mr. Barnes opined that a better talker than himself could convince the small grower.

After the meeting Mr. Barnes stationed himself at the only exit and sold five tickets, to each shipper, to the fruitgrowers' banquet to be held next Wednesday at 6:30 o'clock at the Hotel Medford, when the final plan of the Bone and Winter pear campaign will be announced. It is estimated 300 people identified with the fruit industry will be on hand.

The annual election of the traffic association will be held next Thursday and C. M. Speck, Dr. Dean and J. Penney were named a committee to make nominations.

David Rosenberg brought up the question of operation of best lifting machines. He said that he had been warned by the manufacturers, "not to fire a mechanic to operate the machines, as they would be tinkering with them all the time." Mr. Rosenberg intimated that the machines did not need tinkering.

ORPHAN BALL TEAM PLAYS GRANTS PASS

What promises to be a hard fought game will be played next Sunday at Grants Pass between the Grants Pass nine and the dispossessed Jacksonville baseball team, now known as the "Orphans," having no particular town for which to play. The Orphans, including some of the best baseball talent in the valley, has a new pitcher, and is determined to win an easy game from the Grants Pass club.

Louis Firth, manager of the Orphans, has been gathering an imposing list of players, and as determined his charges will make up for the defeat they experienced at the hands of the Ashland team last Sunday. It was this defeat that caused Jacksonville to disown the team.

CONFER DEGREES AT HARVARD UNIVERSITY

CAMBRIDGE, Mass. June 20.—(AP)—Harvard university, at its 252nd commencement today, conferred honorary degrees on 12 men who have won distinction in many fields, including Secretary of the Navy Charles Francis Adams, former Secretary of State Frank B. Rowland, and Governor Franklin D. Roosevelt of New York.

CENTRAL POINT HEALTH CENTER OPENED FRIDAY

Project Is Source of Pride To Workers—Made Possible By Generosity of Firms and Individuals—Patrons Invited.

A source of pride for all Central Point and vicinity is the recent construction of a new health center, the first in Jackson county, and said to be the first of its kind in the state. The center, located in a new building on West Main street, will be formally opened tomorrow afternoon with a tea, to which all Central Point merchants and business men, together with the executive board of the Jackson County Health association have been invited.

The construction of the building has an interesting history, and as revealed yesterday afternoon, revealed public spirited co-operation on the part of Central Point merchants and business men, together with the co-operation of a number of Medford firms.

The first center was established last year in quarters above the Mary A. Moo drug store, but due to continued growth in interest in health matters, the quarters were soon found to be too small, necessitating a search for a larger and better location.

Kenneth Beebe of the Beebe & Kinde Service Station company, operators of stations in Medford and Central Point, offered the free use of a portion of a lot on which he has a service station, opposite the Hotel Central, Monday for the construction of the building. Lumber was furnished at cost by the Medford Lumber company, and Central Point merchants who furnished supplies at cost or below the regular price, were the Freeman Implement company, W. E. Alexander, Fred Wiley and W. L. Wagner. The latter did the plumbing.

The wiring was done at cost by the Peoples electric store of Medford, and a number of fixtures were supplied by the Treowidge Cabinet works. The Central Point chapter of commerce, through J. B. Sholey, donated \$30 with which a large run of chairs, a table and awnings were purchased. The health committee repaired equipment already on hand and made curtains.

According to present plans, the center will be open one day a week, probably on Wednesdays, with a school nurse in charge, to conduct first aid courses and others having health problems to solve. The regular child welfare clinics will be held the second Tuesday of each month.

The building is not quite completed, but is expected to be ready for the formal opening tomorrow.

Playclothes the Kiddies Will Wear Out-of-Doors This Summer

Sun Suits . . . 98c

Cool little suits, designed to allow a healthy coat of tan. In peach or blue, combining plain and flared linen. Ages 1 to 4. Sketched at left.
