## WEATHER AIDING HAY HARVESTING AT TABLE ROCK

TABLE ROCK, Ore., June 21.—(Special)—If the present sunny weather persists for another week the bulk of the hay harvest in this district will be completed. Bright cutting crews are at work in some of the new orchards here where duffs or a little blight is showing since recent rains.

Farmers from Medford Wednesday made a second attempt to drive a car to the top of Table Rock but after setting less than a fourth of the way up gave it up as a bad job.

Con Devore, the Medford butcher, bought a truck load of cattle here Wednesday morning and, according to the new law regarding the sale of livestock, papers similar to a bill of sale were signed by the buyer and seller.

A crew of workmen was putting up the delivery boxes for subscribers to the Mail Tribune on this route Wednesday.

## Mrs. Steffens Can Write Sequel of Marriage Story

SALINA, Calif., June 21.—(AP)—Mrs. Lincoln Steffens, who wrote a few months ago a magazine article on "How It Feels to Be Married to an Old Man," was a divorcee in superior court here yesterday. She charged Joseph Lincoln Steffens, formerly known writer and lecturer of Carmel, with being "harsh and abusive" and said he refused to speak to her, objected to her attending parties or dances, and was jealous. The testimony was heard behind closed doors.

## ARABLE LAND COVERED BY JAPANESE VOLCANO

TOKYO, June 21.—(AP)—Although the eruption of the volcano Komagatake, north of Hirokawa, resulted in only a few casualties, 33,000 acres of field and forest and 3,350 acres of arable land were laid waste.

Photographs of the stricken districts arriving here revealed a scene of utter desolation. The entire countryside was buried under a mantle of stone and ash.

**Swordman Dead.**  
BUDAPEST, June 21.—(AP)—(55), one Edmond Tegyanszky, world champion sword fencer and winner of an Olympic prize at his chosen sport, died today at a sanatorium here after a motorcycle accident early in the week. He was 38 years old.

**WHL Light Gridiron.**  
LAWRENCE, Kas., June 21.—(AP)—Night football, played under brilliant flood lights, will be inaugurated here next fall by Haskell Indian Institute. Frank W. McDonald, director of athletics, announced today.

**Golf Shaft Maker Dies.**  
NEW YORK, June 21.—(AP)—Robert E. Dickinson, manufacturer of hickory shafts for golf clubs, died in his room at the Hotel McAlpin today of heart disease and the effects of the heat. He was stricken while a passenger in one of the hotel elevators.

**Howard Goes East.**  
SALEM, Ore., June 21.—(AP)—C. A. Howard, state superintendent of public instruction, left here today for Atlanta, Ga., where he will attend the annual meeting of the National Education association. Mr. Howard is scheduled to give an address during the meeting.

Mites are a serious hindrance to the welfare of the hens and breed rapidly in hot weather, says the Oregon experiment station. They will be found under the roosts and where the roosts connect with the house or hanger. The treatment is carbolic acid or a strong sheep-dip painted on full strength.

## Daily Meteorological Report

Friday June 21, 1929  
Medford and vicinity: Fair to night and Saturday. Warm with low humidity Saturday.  
Oregon: Fair tonight and Saturday. Warm with low humidity in interior Saturday.

## HEAD MASTER MORAN SCHOOL VISITS ISAACS

F. G. Moran, head master of the Moran school system, with branches on Bainbridge Island, Wash., and at Atascadero, Cal., stopped over in Medford on route north yesterday for a visit with Dick Isaacs, a graduate of the Moran school.

The unique boys' school, which was originally located on Bainbridge Island alone, underwent an experiment a year ago which proved highly satisfactory. A second campus and buildings were established at Atascadero, and the students move to the California school for the winter months, going north in the spring.

This year, following vacation, according to Mr. Moran, both schools are to be run through the full year and the students may take their choice of locations, or may move from one to the other at the end of the semester if they see fit.

A group of boys from the Bainbridge Island school are making a trip from Seattle to Atascadero on horseback, having started from there a few days ago. Their baggage will be transported south on a truck. They will arrive in Medford some time during the first of the week, it is thought.

## SOURCE OF FUMES REMAINS A MYSTERY

EL PASO, Tex., June 21.—(AP)—The source of hydrogen sulphide gas which took the lives of two children and overcame 16 other persons at the Little Mexican settlement of Ascarate, near here, Wednesday, remained a mystery to investigators today.

Following an impromptu court of inquiry convened yesterday by city and county officials at which chemists identified the gas, United States army gas experts from Fort Bliss were detailed to assist the investigators in their efforts to determine its origin.

Officials of a gas line company and a refinery near the settlement told the court of inquiry an examination revealed no leaks in their pipes.

## Box Factory Burns

POMONA, Calif., June 21.—(AP)—The Valley Box company factory was destroyed in a \$100,000 fire that held up traffic on the Southern Pacific railroad two hours.

## SEES REAL FARM RELIEF

(Continued from Page One.)

package entered against the farmer's crop returns. Before making this division, the directors or a members' meeting may, if they so desire, set aside, within certain limits, an amount for the accumulation of an operating surplus fund.

Department of Agriculture For It.

"Cooperative marketing by the farmers has been recommended and fostered by the agricultural extension department of the United States for many years. The department has worked hard on every phase of it with great success, considering the very limited funds placed at their disposal.

"There is nothing new or untried about it. Farmers' cooperative marketing is not more mysterious, complicated or dangerous than marketing by the individual business concerns. It is the same operation that in the absence of cooperative organizations is performed by service corporations for a profit.

## Farmer Holds the Sack.

"From less thousands of scalpers, jobbers, brokers, distributors, selling organizations and commission houses are now doing the farmer's marketing in competition with each other, with the farmer's product a mere pawn in the game, to go up or down, sold at a fair price or a cent to get the business, and incidentally the packing charge, the warehousing fee, the storage fee, the sales commission, the broker's charge, the interest charge. All of which must be figured on a cost plus basis for the service corporations to make a profit.

"You have never known anyone to question the right or advisability of the farmer to hire the help he needs to operate his ranch and grow the crop, or to buy the machinery he needs to harvest the crop.

"And yet those who oppose cooperative marketing raise multitudinous objections to the farmer setting up his own sales organization, buying the machinery and hiring the help necessary to do these things for himself instead of turning his crop over to many and various commercial concerns to handle and do with as they please, and turn over the balance, if any, to him.

## Cooperation Forced on Farmer.

It can truly be said that cooperative marketing has been forced on the producer by reason of the fact that steadily diminishing prices has dwindled to the point where after everyone else has had his profit there is no profit left for the farmer. Frequently but even a return of the cost.

"It can further be truly said that the large number competitive concerns that are now doing the farmer's marketing for him, is due to the fact that it is almost a sure thing for all except the producer. Everyone wants to get into a business that has this element of certain profit or guarantee against loss. Hence we have innumerable concerns handling the farmer's products in competition with each other on a percentage for service rendered basis.

"All commercial sales services businesses of personally capitalized concerns are conducted by forces of salaried employees, each highly specialized and competent in his line, controlled by a board of directors and headed by the best executive they can hire.

"Do you see anything about that that a farmer-owned and controlled cooperative marketing organization cannot do? The producer's money pays all the salaries and all the expenses now on a cost plus basis. It certainly can pay the cost direct and have the plus left over.

Farmers' cooperative marketing organizations, actually owned and controlled by farmers, can and do get a greater efficiency at a less cost, and at the same time better average prices for the farmer's produce.

"There are now in existence hundreds of successful farmers' cooperative marketing organizations in every branch of the industry, from eggs and dairy products to fruit.

"Independent financial resources has been their biggest problem.

# Clearance New Coats

## Coats \$25

15 coats in tan, grey, black and mixed cloths. Some fur trimmed, others with scarf collars and no fur. Values up to \$79.50. To sell at a clean-up price

## \$25
