

WORK AT AIRPORT PROGRESSES WITH CITY MEN ON JOB

Very satisfactory progress continues to be made in the building of the new \$12,000,000 airport under the supervision of Councilman Joseph O. Gray, chairman of the council airport committee and with City Superintendent Fred Scheffel in active charge of the work, as is shown in the report of Mr. Scheffel submitted to the city council last night.

At this meeting the council voted to add C. Collins, Chas. A. Wing and R. E. McElhose of its own membership to act with the airport committee in cooperation with the chamber of commerce in the work of preparing the airport dedication celebration program.

Superintendent Scheffel's report on airport progress up to July 1 was as follows:

The work of leveling, grading and leveling is practically completed with the exception of four acres to be rough graded, and the balance of the field outside of the runway to be fine graded and dragged.

Trenching work for the drainage was started, and we now have five thousand linear feet of the trenches excavated, and eighteen hundred feet of the tile laid ready for the gravel to cover the pipe.

The foundation for the hangar is completed, and forms for the concrete are being built and we should start pouring concrete within a day or two. We have also laid the tie lines for the drainages around the hangar and aprons. The pipe is in place, and just as soon as Stuart & Sons can deliver the gravel, the trenches will be filled.

The barrels we are using for the boundary markers have been placed and spaced on the field so that should anyone desire to use the field, there will be ample room for landing and taking off.

The road from the Biddle road to the hangar is graded and ready for gravel. All hired equipment for leveling has been disposed of and the city's own equipment will finish the work of leveling. We are also using our own compressor roller and concrete mixer on the footings for the hangar.

The following is the total expenditures to July 1, 1929:

Electrification	\$86,911
Paving, rolling, sprinkling and leveling	7,860,111
Field markers	114,48
Hangar foundation	1,179,29
Engineering	445,92
Tearing down buildings	258,49
Repairs to fences	79,36
Clearing and grubbing	1,301,43
Roads	156,47
Total cost	\$12,204,72

COUNCIL REJECTS BLANKET POWERS TO WATER BOARD

The city council last night, with the mayor and all other city officials unanimously agreed, turned down an ordinance prepared and introduced at the request of the city water commission, which would have given the city body blanket authority to sell water outside of the city limits and to maintain, repair, operate and extend the city water system from time to time outside of the city limits, with proviso that "this authority shall not be held or construed to extend to selling of water to other communities."

The mayor and councilmen, during a brief discussion, after hearing the proposed ordinance read, expressed fear that such blanket authority gave the water board too much power and might be interpreted by that body as giving it the right to sell city water to Jacksonville, or some other incorporated municipality not immediately adjacent to Medford or likely for years to come to be close enough to be regarded as in the immediate vicinity of Medford to become a part of the city by annexation.

The council took this action in accordance with formal opinion submitted by City Attorney Carlin to that body some time ago that Medford could not legally sell water to Jacksonville nor any other municipality not adjacent to Medford.

The council's action was not intended to throw a roadblock in the way of extending the city water system to the Berrydale and Oak Grove districts, which the council some time ago informally agreed to give city water, based on the territory limits of each district, as submitted for those communities at that time.

However, in view of the fact that the limits of these proposed water districts have been extended, especially Berrydale, the city officials decided that when the time came to do a separate ordinance must be prepared for each district and that a plat of the exact territory of the proposed water districts be submitted before such ordinance would be passed by the council. In other words, the matter of granting ordinances for the sale of water to communities outside of the city will be passed on by the city council individually, one at a time, and will not be passed until the limits of each district are satisfactory to the council.

Secretary Mellon inspecting new small size currency. With Assistant Secretary Henry Harriek Bond (seated), he is shown the new bills by Director Hall of the bureau of engraving and printing.

CITY TO IRON OUT FIR STREET HUMP AND SAVE PEARS

Two matters of interest to the fruit industry of the valley, particularly to the growers and packing houses, were acted on by the city council last night, one of which, the proposed doing away with the rough hump in the pavement on South Fir street opposite 8th street, will result in the saving of thousands of dollars to the growers whose pears are hauled by truck to the packing houses.

This rough spot, a series of humps, resulting from depressions in the pavement over the spot where the tracks of the old Jacksonville railroad formerly ran, has long been complained of, as a load of pears passing over it shakes the pears violently, thus causing much fruit to become so cracked or bruised as to render it difficult to sell, particularly late in the season, even to the canneries.

C. C. Lemmon on behalf of the Rogue River Traffic association, last night requested the city officials to do away with this rough section before the packing season begins in early August. He stated that the extent of the damage caused to fruit being hauled over it is estimated as to the cost of repaving this rough section was given as \$1000 by City Superintendent Scheffel for the present state of affairs. He stated that the city finances makes such street work of repaving at such a cost almost prohibitive.

However, the council recognizing the necessity of doing away with this complained of section in some manner before the fruit hauling season begins, voted to have Superintendent Scheffel and the council street committee make a careful investigation and estimate of cost of repaving, or some other remedy, as soon as possible. One suggestion made was that the section be gravelled and oiled and kept in satisfactory condition that way until at some future time repaving can be done.

An ordinance was passed to require all packing houses located within the city limits to be equipped with a trough or tank, through which the used spray wash must be run over limestones to neutralize the acid in it before the wash is dumped into the city water system, as if this is not done it causes decay and trouble in the water pipes.

SUNRISE CANNON WILL INAUGURATE 4TH AT ASHLAND

A sunrise cannon salute at 4:30 tomorrow morning will usher in the Fourth of July celebration at Ashland for which all plans have been completed. From that time until midnight the Lithia city will be the scene of merry-making, playing host to throngs of people from every part of southern Oregon.

Finishing touches are being put on floats and the entire city is decked with flags and appropriate decorations in preparation for the celebration.

The sports program for the day, arranged by the Ashland Kiwanis club, will include entertainment for every one, young and old. Roller skating, horse shoe pitching, baseball, motorcycle hill climbing and children's sports are a few of the highlights scheduled for the day.

Following a horse shot pitching contest at 9 a. m., and a roller skate event, a parade will complete the morning's program.

Seven machines have been entered in the motorcycle hill climbing contest, which will take place in Lithia park at 1:30 Thursday afternoon. An entry fee of one dollar is charged and the winner "takes all."

Competitive games for children will be directed by Miss Marjorie Goff of Medford, who is playground supervisor at Lithia Park this summer. These games will also begin at 1:30.

A baseball game between Wood and Ashland will be another attraction of the afternoon program. Fireworks at 9 p. m., and dancing both afternoon and evening on the new dance floor will complete the big celebration.

PICNIC FEATURES INSTALLATION OF ROTARY OFFICERS

Seated at a long table in the grove at the Jackson Hot Springs last night were over 50 Rotarians and Rotary Anns, who attended the annual picnic of the Rotary club. During the luncheon each Rotarian introduced himself and "Ann."

Following the dinner the party adjourned to the Hot Springs pavilion, where the newly elected officers and directors were installed. The ceremony was in charge of Wm. Whitelaw. New officers include Frank Newman, president; Ed Shockey, vice-president; Dr. D. A. Chambers secretary; and the following directors: K. L. Dazy, W. W. Allen, W. S. Bolmer and J. W. Wakefield.

Jack Corley, retiring president, was presented with a past president's emblem by the Rotary club in appreciation of his work for the last year.

Dancing, with music furnished by the Altonia Imperial artists, and swimming were enjoyed during the evening.

The committee in charge consisted of the retiring board of directors, with H. L. Bromley as chairman.

PROPERTY TRANSFERS REPORTED INCREASED

That the sale of property, particularly farm land, has been on the increase during the last three years in the Rogue River valley, particularly near Medford, is the opinion of C. C. Murray, local attorney. Members of the local abstract companies have been very busy of late, and find it difficult to keep up with the work.

According to Mr. Murray, most of the property is being sold to people who have just come to Medford. "People seem especially interested in property in and about Medford recently," said Mr. Murray.

AUTO COLLISION RUINS STANDARD ON WEST SIXTH

The white limousine of Sixth street will be several thousands of dollars tonight as the result of a collision between a Buick car driven by R. G. Stinson, representative of the Maytag company of Portland and a Black and White taxi, driven by Marvin Rogers at the intersection of Sixth and Holly last night.

The force of the crash wheeled the Buick over against the beautiful new lamp post, uprooting the latter from its solid foundation. The post, however, saved the situation for the Harrison Street shop window, which would have been next in the line of destruction.

Both machines suffered considerable damage, but neither driver was injured seriously. The accident occurred at 12:15 last night.

Another collision occurred at the corner of Main and Summit at 9 o'clock last night. When a Ford coupe, driven by Merrill Perry crashed into the rear of a Chrysler double parked facing west on Main. The latter car is owned by Kenneth Parrett. The left rear corner of the Parrett car was badly bent, and considerable damage was done the front of the Perry car.

COUNTY COURT SIGNS PAYROLL FOR MONTH

The regular meeting of the county court was held today, and the principal business was the signing of payroll for the county employees who have money for their Fourth of July celebration. They will be paid a day in advance on account of the holiday.

Petitions were also presented to the court for the building of roads in the Trout and State City districts, and final action held in abeyance.

REESE CREEK AND E. P. CHURCH JOIN IN 4TH

REESE CREEK Ore., July 2.—(Special)—The community church of Eagle Point is combining with Reese Creek in a Fourth of July celebration picnic on Big Butte creek. The public is invited. It is planned to meet at the school house at 9:30 a. m., and follow the leader to the grounds where a picnic lunch will be enjoyed with plenty of ice cream.

FIREWORKS BANNED WITHIN CITY LIMIT

Fireworks are taken in Medford. This holds true for all parts of the city. The city fire department is capable of starting fire, according to Chief of Police McCreedy, who sounded a special alarm today to all prospective celebrators of the Fourth.

"Shut setting off fireworks within the city limits are subject to arrest, said the chief.

Each year the fire total mounts higher on this date than at any other time. Medford, having what is said to be the lowest rate in the state, will be able to maintain that standard with the cooperation of the good people, according to Chief McCreedy.

The shooting of any fireworks, or any other type of fireworks, will not be permitted on government forest land, tomorrow or any other day, according to Supervisor H. P. Hankin of Crater National Forest.

Suspended Duluth Collector WASHINGTON, July 2.—(Special)—Assistant Secretary Lowman today announced that Oscar B. Dahly, collector of customs at Duluth, had been suspended pending hearings on charges against him.

FAIR BATHER SEES PEEPING TOMS ON APPLAGATE RIVER

"Peeping Toms" with high-powered binoculars, operated last Sunday along the Big Applegate river, with its favorite swimming spots, resulting in some consternation among the bathers, and a short and stern chase by the men. Close to a thousand residents of Southern Oregon were enjoying the cool waters over a ten mile front, when a woman passing by in a swim, caught sight of two young men, on an embankment above her, gazing intently through a telescope. She screamed and the hunt started. The sheriff said this morning, steps would be taken to thwart them tomorrow, when scores will visit the district.

The Big Applegate river is full of pools, and is ideal for swimming and the country back of the swimming holes is high and brushy. A "Peeping Tom" can hide easily and that is what the men did last Sunday. No description was secured except that they were young men and well dressed.

A number of American Legion members, engaged in repairing the Boy Scout camp, engaged in the unorganized hunt and later the rangers at the Lone Star ranger station were notified and promised to keep an eye out for any men with opera glasses.

The only dressing rooms along the Applegate are clumps of bushes. The discovery of the presence of "Peeping Toms" had no effect on the popularity of the river for swimming, and scores visited the section this week. A second round is expected there on the Fourth of July.

WETTEST JUNE IN SIXTEEN YEARS IS WEATHER RECORD

The most conspicuous feature of last month's weather is that it was the wettest June of record since 1913, according to the monthly summary prepared by L. Walter Dick, head of the Medford weather bureau, which reads in part as follows:

June, 1929, had a mean temperature of 62.4 degrees, exactly equaling the average for June of last year, and 1.6 degrees below the past average for the month during 16 years of record. The highest value was 97 on the 23rd and the lowest was 36 on the 2nd. On this last named date light frost formed in some of the cold sections of the valley, doing considerable damage to beans, corn, potatoes and tomatoes, but injury was spotted, no general damage affecting the valley as a whole occurred.

The month was the wettest June of record with the exception of June 1913. The total precipitation was 2.54 inches, more than three times the normal. (The greatest amount of rainfall occurring in June in the past was 2.09 inches in 1913). Most of the rain fell during the first week, the last 15 days being entirely free from precipitation, except for traces on three or four days. Moderately severe thunder storms occurred on the 3rd and 5th, but no lightning damage was reported. A trace of hail fell on the 5th.

Total wind movement amounted to 3156 miles, giving an average hourly velocity of 4.1 miles. The maximum velocity was 29 miles per hour, from the southwest on the 3rd, and the prevailing direction was from the northwest.

Thirteen days were clear, five were partly cloudy and 12 cloudy. There was no fog, but light smoke and haze were of fairly frequent occurrence. A lunar halo was observed on the 12th. A meteor of unusual brilliance and size was noted on the evening of June 23. A trail of smoke was left by this meteor and was visible after the meteor had disappeared.

The summary reads:

Date	Max.	Min.	Mean	Precipitation
1	92	38	65	.05
2	79	36	57	0
3	75	46	60	.34
4	68	51	59	.89
5	64	78	56	.89

PERSONAL INVITATIONS FOR OREGON VACATION

Thousands of personal invitations to visit Oregon this summer and enjoy the evergreen playground are being sent out from the Los Angeles office of the state chamber to prominent members of civic organizations in all parts of the southwest. Included with the invitation is a beautiful recreational map, a highway folder and descriptive matter dealing with all sections of this state. In conjunction with this letter campaign, the state chamber is conducting an advertising program in the leading newspapers. Arthur Foster of the state chamber staff opened his headquarters on July 1, at Yellowstone national park and will direct travel over Oregon highways.

JULY RIVALS JUNE IN ALTAR MARCH

Not to be outdone by the month of June, which so far this year holds the record for marriage licenses, July has started off with a bang. With five licenses issued the first day, six yesterday and seven today, it begins to look like this month is on the ascendency in the eyes of King Cupid. Perhaps, however, it is only because the first week of July is so near the month of June and more or less reflects some of its well known glory.

Those found on the record books this morning were: Ulman J. Carpenter and Emily Louise Kavanagh, otherwise known as Emma Lou, well known milliner of Medford; Claud F. Grigsby, 24, of Central Point, and Hazel Taylor, 19, of Medford; Everett F. News, 24, of Klamath Falls, and Margaret Zundrun, 28, of Medford; Vettie Biles, 19, of Gold Hill, and Margaret Wyatt, 17, of Gold Hill; Roy Eldred Stapleton, 24, of Martinez, and Dorothy Roy Self, 22, of Yreka, and Eva Paulson, 19, of Wood; G. S. Sloan, 33, and Ida May Dolan, 29, of Copco, Calif.

If gravy is to be judged on flavor you wouldn't make gallons at a time

You can "season to taste" a pint of gravy much more accurately. For a similar reason Hills Bros. roast only a few pounds of coffee at a time, instead of in bulk, by their patented, continuous process—Controlled Roasting. The flavor is actually controlled always. No other coffee can taste like Hills Bros. Coffee because none is roasted the same way.

Fresh from the original Hills Bros. Coffees. Easily opened with the key.

SARGON'S POWERFUL INVIGORATING TONIC

New Scientific Formula Contains Ingredients Which Are Designed to Impart Tone and Strength to Entire System and Which Are Valuable for Their Influence Upon the Appetite and Digestion.

The instant and phenomenal success of Sargon is easily explained. Its effect is almost immediate. Right from the first dose people who are suffering from lowered vitality begin to feel its stimulating, tonic effects. Thousands of half-sick, run-down men and women who have taken it with the most astonishing and gratifying results report that it seems to pick them right up and put them on their feet.

It is not only a powerful reconstructive tonic designed to impart tone and strength to the entire system, but it is a constitutional treatment as well and exerts a tremendous influence upon the processes of assimilation and elimination. It also contains other ingredients of recognized therapeutic value which are valuable for their influence upon the appetite and digestion.

Sargon is fulfilling its great mission. It is doing it in a new and revolutionary way; the way that the men of science who labored for years to perfect a scientific formula intended to do.

It's not doing it by overstimulating and blasting out the intestinal tract with poisons, irritating purgatives, and chemicals that do more harm than good. Neither is it doing it with pleasant-tasting "digestive tablets" which give only temporary relief, if any at all. Neither does it pretend to purify the blood by burning it out with chemicals, because the men who make Sargon know that there is no medicine or drug which is an effective blood purifier.

Sargon is accomplishing its results by helping Nature to correct the improper functioning of these all-important organs and fluids of the body. It is designed to aid, and has been proven conclusively that seven out of every ten people, past the age of thirty, suffer from deficient bile flow caused by a sluggish liver. And unless the liver is performing its proper functions, the process of digestion, assimilation and elimination become deranged, resulting in dyspepsia, gas, flatulence, constipation, auto-intoxication, and other ailments.

Almost overnight Sargon has become the sensation of Medford and daily crowds are visiting the Macell Drug Co. to secure a supply of this remarkable new treatment that has aroused such universal interest through the amazing results it has produced in overcoming troubles that have baffled all other efforts for relief.—Paid adv.

LA GRANDE, Ore., July 2.—(Special)—The picking of Royal Annet and Bing cherries scheduled to start about July 15. Union county is anticipating the biggest cherry crop in years, or about 80 carloads, double last year.

"WORTH WEIGHT IN GOLD"

Verdict of Woman Who Tried Pinkham's Compound

Tully, N. Y.—"It hurt me to walk or sit down without help and I felt sick and weak. My mother-in-law took Lydia E. Pinkham's Vegetable Compound and she induced me to take it. I am now on the fourth bottle and have also used Lydia E. Pinkham's Sensitive Wash. The medicine that will do for me what the Vegetable Compound and Sensitive Wash have done are certainly worth their weight in gold. I think I have given them a fair trial and I expect to take two more bottles of the Vegetable Compound."—Mrs. CHARLES MORGAN, R. F. D. 1, Tully, N. Y.
