For the Love of a Lady

by Jeffery Farnol

SYNOPSIS: Helen D'Arcy, impressed and outraged by Sir Richard's behavior, tells him that he is determined to marry the beautiful Helen. Richard spies a fellow shadow in the night and follows it to Tom Pitt, developing a mysterious note addressed to Helen's maid, Betty. Richard finds the note when Tom left it in a garden outhouse, when to his surprise Helen approaches him—but he is so strange, meek, and changed, a picture of lovelessness in the bright moonlight.

Chapter 23
A RADIANT DAWN

Tenderly but quickly, Sir Richard grasped his lovely burden, Helen kicking feebly and voicing mild protests. Vanished was my lady's haughty spirit and disdain, that fierce temper with which she had struck Sir Richard only a few hours before.

"Why... what...?" she whispered.

"The dew," he explained. "It lies heavy and I fear for thy pretty feet."

"Oh, 'tis hateful to abuse my helplessness," but my lady's voice betrayed her utter lack of scorn and its gentleness surprised even herself.

Keeping close to the shadows of the garden, Sir Richard carried my lady, and she, nestling within his arms, felt a delightful sense of release and comfort, so much so that she rested her head against Sir Richard's shoulder.

Thus they came to a rustic seat beneath an ancient cherry-tree and carefully he placed her upon it, seating himself beside her. Once more he unfolded the letter to the moonlight and together they read it carefully.

"Our Thomas becometh somewhat vague in places," said Sir Richard.

"But," said Helen, pointing to a certain line, "this is clear enough, and forthwith she read:

"Should you hear sight of his whereabouts, hasten to tell me, for naught is so sweet to me as to see you."

"Richard, surely this means you," into her voice had come again that exquisite note of tenderness.

There ensued a silence and Helen, grasping Richard's arm with both her hands, watched his thoughtful features as he studied Tom Pitt's scrawling—the bold line of nose and brow, the sombre eyes, the sensitive mouth and the square jet of chin... A strong face? Yes, decidedly! A good face? Beyond all doubt! Now as my lady sighed, Sir Richard turned to look into her uplifted eyes and she saw in his mobile lips a curve of unexpected tenderness.

"You feel no cold?" he questioned.

"No, indeed—oh, no!" she answered, bending to peer at the letter again. "The night is very warm. But what more make you of this rogular message?"

"Well, this mention of the Haunted Mill inspires me to prophesy that verily haunted 'tis like to be, and so much for this. So come we now to myself and myself."

"And what of me?" she asked.

"Well, first thou art my Helen!"

"And thou art presumptuous!" said she, though her voice was kind, a caress and not a reproach.

"Second, thou'rt mine own especial housebreaker that, caught 't the very act, yet faced me undaunted—"

"Nay, Richard; I vow no poor soul was ever more fearful than I."

"Then art braver than I deemed!" said he, and took her hand in both of his. "Also 'twas to serve thy friend! Here he raised her hand to his lips and kissed it. My lady nestled closer to Sir Richard, her slim hand still held firmly in his grasp. Again they sat silent, reluctant to break the peaceful quiet of the enchanted night. At last, my lady spoke in voice meek and small:

"And... you... left your ring where you found it, the ring I had lost to one I thought you... you left it to ward suspicion from me at peril of your life... wherefore?"

"You were my friend."

"And would be so still," she answered. "By ever grateful friend."

"Then Helen, in friendship's name, I bid you tell me where is your cat's-eye ring?"

"I lost it," she answered, turning to him in swift surprise. "But why do you—?"

Truffon's dire predictions coming true. And she said "love will find a way." Continue the story with tomorrow's chapter.

Palatable foods are better for us

"AN IMPORTANT thing to remember about eating is that we should enjoy our food," says one of the country's eminent food scientists. "Remember that sugar is one of the finest condimental foods in the world."

He went on to explain that sugar is nature's incomparable flavor. It helps to relieve the monotony of our daily diets. It is an aid to nutrition and health because it enables us to enjoy a greater variety of foods more.

"Sugar is wholesome," he said, "and it is inexpensive. Everyone can benefit from this favor which adds so much pleasure to many of the foods we eat."

The advice of this famous man can be carried out in planning almost all daily dishes. Fresh or cooked fruits are full of minerals, vitamins and other health elements. They are made more delightful to our taste by the addition of sugar.

The flavors of nearly all vegetables are very much improved by adding a pinch of sugar in cooking. Sugar in connection with chocolate or cocoa makes milk a delicious beverage. Most foods are more delicious and nourishing with sugar. The Sugar Institute.
