A SERIOUS SITUATION IN JACKSON COUNTY

OVERLOADED trucks, driven at an excessive speed, are rapidly destroying the good dirt and macadam roads of Jackson County. The problem is a serious one.

It is easy to recognize and deplore the situation, but it is not so easy to devise a remedy. We notice that in many eastern states special "heavy-load," hard-surfaced highways are being built, so strong that fast and heavy trucking can be carried on without injury or materially increasing the cost of upkeep.

Perhaps this is what we must come to in Jackson County. But such construction is so expensive that under present circumstances it is simply prohibitive.

TRUCK transportation has come to stay. It can't be outlawed and no sane person wants it to be outlawed. But it must be regulated if our country highways are to be saved from complete destruction.

There are laws now against trucks, excessively loaded, and there are also laws against speeding. In our opinion the time has come for a revision of these laws, both locally and throughout the state, based upon a scientific determination of the facts.

Then with an accurate knowledge of what truck transportation can be safely tolerated on our highways, and what can't be, THERE SHOULD BE an adequate rural traffic squad to patrol the roads, and see that THESE LAWS ARE STRICTLY ENFORCED.

UNLESS something like this is done, we can see no escape from a continuation of this highway-destruction process. And such continuation will eventually end, not only in ruin to the roads, but an aroused popular feeling against all truck transportation, that industries dependent upon it will seriously suffer and legitimate local development be needlessly curtailed.

WHAT FOOLS!

IT is one of the major mysteries of literature, that the magazine, that years ago adopted as its slogan, "What fools we mortals be," did not survive.

For what fools most of us are. And how our foolishness seems to grow.

The other day a man rolled a potato to the top of Pike's Peak with his nose, a few days later a woman won the rocking chair championship, and now Avon Freeman, 35, has annexed the enviable title of "champion juvenile flagpole sitter of the world."

Avon, it seems, sat on the end of a flagpole erected near his home in Baltimore for eight days, while his father, who is electrician, played a spot light on his perch from 8 to 12 every night.

THE amusing thing is not, that there are a few people always ready to do silly and foolish things. The amusing thing is that such people are always assisted of genuine wealth, and frequently fame and fortune, thanks to the same American public.

This boy flagpole sitter, for example, was given a public reception at which 20,000 gushing people gathered, while the Mayor of Baltimore presented him with an autographed testimonial honoring the famous Baltimore soul, and declared he represented the "pioneer spirit of early America." At the last supper there were over a score of juvenile flagpole sitters in Baltimore trying to break Avon's record, the accommodating Mayor declaring they furnished an inspiring exhibition of that "grit and stamina so essential in the great struggle of life."

Now one of those posthumous performers would have been put on if the individuals concerned had not been assisted, by past experiences, that a sufficient number of the dear people will fall for anything, to make any publicity stunt, however ridiculous, "profitable" if not actually profitable.

What fools we mortals be.

In the tenth lesson of "our" "spells" there was no such thing as "plaid."

The three words most affectingly used by him to preserve the power of the vowel are, "YES, NO, DEAR."

Wife that word was called the "Simian" because it brings Stanley close to him, a full hour.

It must be disappointing to a mosquito when he stings on a bald head, and finds himself so long the wretched.

When you forget your name, you are called a "square."

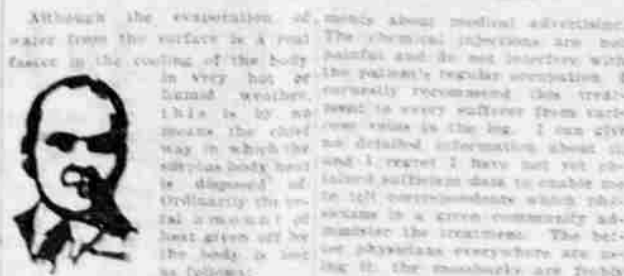

When you forget your name, you are called a "square."

Personal Health Service

By WILLIAM BRADY, M. D.

Special letters pertaining to personal health and hygiene, and to disease diagnosis or treatment, will be answered by Dr. Brady if a stamped, self-addressed envelope is enclosed. Letters should be kept and written to him, being in the only number of stamps received, and a few may be wanted at times. No reply can be made to queries not enclosures in instructions. Address: Dr. William Brady, in care of this newspaper.

THE HUMAN RADIATOR AND HOW IT WORKS

Although the evaporation of water from the surface is a real factor in the cooling of the body in very hot or humid weather, this is by no means the chief way in which the surplus body heat is disposed of.

From this point of view, the body is not a radiator, but a radiator in the sense that it radiates heat in the form of infrared rays.

Do you remember looking into the "radiating" glass of a window? You will see a faint, shimmering light, which is the infrared rays radiating from the body.

Do you remember looking into the "radiating" glass of a window? You will see a faint, shimmering light, which is the infrared rays radiating from the body.

Do you remember looking into the "radiating" glass of a window? You will see a faint, shimmering light, which is the infrared rays radiating from the body.
