Lydia E. Pinkham's Vegetable Compound

Are You Well and Strong?

"Before my third baby was born my husband advised me to take your medicine and he bought me three bottles of it. When I had taken the first one I began to feel better so I kept on during the whole period. We have a healthy baby boy and we are so proud of him and praise Lydia E. Pinkham's Vegetable Compound for the help it gave me. I feel my stomach since I started to use it and would not be without it."

New Inventions

Clips that may be inserted in baseboards, door frames and moldings serve to keep lamp, radio and telephone wires off the floor. The metal fasteners are slipped into the space between the trim and the wall, the top being bent to receive the electric light cord.

Stowing golf bags in an automobile is simplified by a holder which is attached to the running board. The outfit has a capacity of four bags, is chromium-plated and can be detached easily when it is not wanted.

Converting a closed truck into an open van is made possible by a disappearing top and collapsible sides, all of which are shaved away out of sight.

Tracing drawings, art work and maps on stencils is simplified with a tracing frame, adjustable in six positions, in which the stencil is locked by two clamps.

Lawn mowing is made easier and quicker with an electric mower that is designed like the small hand machine, except that it has a motor that is attached.

If you had to fry a dozen chickens you wouldn't fry them

For the same reason, Hills Bros roast their coffee a few pounds at a time instead of in bulk. This continuous process—Controlled Roasting, produces a matchless, uniform flavor.

Suppose you did try to fry them all at once. What a time you'd have cooking that tender meat evenly!

The right way to fry a lot of chickens is obviously one at a time. That's just the way Hills Bros. roast their fine blend of coffee. By their patented, continuous process—Controlled Roasting. Never in bulk. Only a few pounds at a time pass through the roasters and the flavor is perfectly controlled because every berry is roasted evenly.

No bulk-roasting process can produce the matchless, uniform flavor of Hills Bros. Coffee. And you get all this

delicious goodness because Hills Bros. Coffee is sealed in vacuum tins at the time of roasting. Ask for Hills Bros. Coffee by name. To be sure, look for the Arab—the trade-mark—on the can. Hills Bros. Coffee is sold everywhere.

HILLS BROS COFFEE
