

ASHLAND COUNCIL VOTES MODERNIZE WATER PIPE LINE

ASHLAND, Ore., Sept. 20.—(Special)—In order to replace the old wooden pipe line that leads from the dam to the pipe line in Ashland canyon and to replace it with a modern steel pipe and thus bring the Ashland water system to completion along strictly modern lines, the city council on Tuesday night voted to finance the repairs, which will amount approximately to \$25,000. The old pipe was laid over 20 years ago. The cost of the improvement will be borne by funds from the city light department and the money is already in the treasury for the present improvement.

The overhauling of the city water system was begun in 1927 with the construction of the reservoir on Crowson Hill. At that time a good deal of the old pipe line was replaced by steel pipe and various minor improvements and changes were made. During the past year the Bender dam was built. The laying of the new pipe line, which was ordered on Tuesday night, will complete the entire project which will represent the expenditure of a half million dollars. Construction will start on the replacement of the old pipe just as soon as the fall rains have reduced the fire hazard. The survey for the new line, which will parallel the old one, has already been made by City Engineer F. H. Walker. The distance covered by the project will be about one mile. The old wooden pipe has given considerable trouble during the past few years owing to the frequent breaks.

MRS. N. C. CHANEY TO ATTEND LOUISVILLE LEGION CONVENTION

Mrs. Newton C. Chaney, state president of the American Legion Auxiliary, will leave Monday evening for Louisville, Ky., to attend the national convention of the Legion and Auxiliary. She will install the officers of the Rose City unit Thursday evening, and leave that city Wednesday on the Oregon special for Spokane, where the Washington and Idaho delegations will join the Oregon group. The special train will stop at St. Paul, Minneapolis, Indianapolis, Chicago, and other cities, where they will be guests of the auxiliaries. They will arrive in Louisville September 29. The convention will open September 30 and close October 3.

Mrs. Chaney will return to Medford by way of Texas, where she will visit her parents, Mr. and Mrs. William Hughbottom in Dallas. Recent appointments made by Mrs. Chaney include Mrs. Gordon McCracken of Ashland, national defense chairman and Mrs. Betty V. Hall of Medford, legislative chairman. Mrs. Edward Leach of this city will entertain in honor of Mrs. Chaney Saturday afternoon.

Brisbane's Today

(Continued from Page One) duced no effect, for Colonel Lindbergh declined at the outset to admit any danger in flying.

Mrs. Lindbergh seems to have adopted Roosevelt's motto, "Deeds, not words." No young woman interests the American people more than she does, and since her marriage she has not uttered one word for publication.

Col. R. W. Stewart, formerly the head of Standard Oil of Indiana, beaten in a fight with Mr. Rockefeller, is on his way to England. Perhaps he goes to join the Shell company in a great British oil merger and anti-Standard Oil fight. Colonel Stewart will visit Sir Henry Deterding, head of British "Shell," the biggest Rockefeller rival in the world's oil trade.

If the British want action and an American representative who knows the oil business, they show intelligence in selecting Colonel Stewart. It looks like a real oil fight. Betting is wrong, and apart from that, it might be unwise to bet against the Rockefellers. They have never acquired the habit of losing.

Albert Ottiger, able New Yorker, returns from Russia amazed at his discovery that all Russian convicts, except political prisoners, have every year two weeks' vacation to visit relatives. Mr. Ottiger was "startled by Russia's achievements in industrial undertakings."

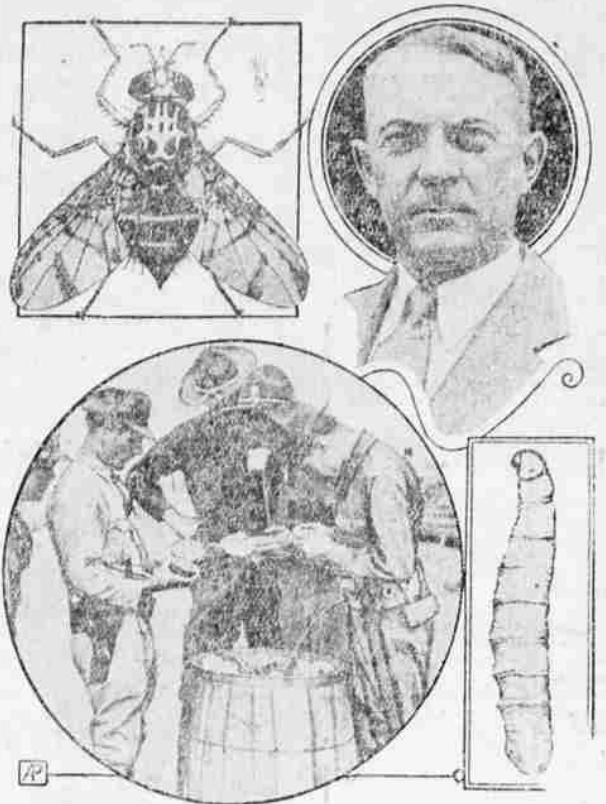

Perhaps our government underestimates these Russians. We did well after we got rid of King George. Russia may be doing as well, having got rid of a czar that made King George look like a brilliant statesman.

Mr. L. F. Loree, who believes in mergers, and big ones, would like to combine 17 railroads with the Delaware & Hudson. Common sense says the bigger the mergers the better, since the public must pay for all unnecessary overhead, duplicate salaries of freight solicitors, duplicate purchasing departments, waste on uneconomical routing, etc.

If the people haven't brains enough to watch the big mergers they wouldn't have brains enough to watch little roads combining acrely. Our glorious constitution was born on September 16, 142 years ago, followed long discussions and many compromises. But it's undoubtedly the world's best constitution.

Some respectable citizens believe that the constitution doesn't count when it interferes with their drinking. That may pass. Oregon Weather Oregon: Generally cloudy tonight and Saturday, probably light rains in the west portion, mild temperatures. Moderate northwest to west winds on the coast.

Fruit Fly Battle Is Advanced To Native Mediterranean Area

Prof. H. J. Quayle (upper right) will lead an attack on the Mediterranean fruit fly in its native regions. An indication of the strict quarantine imposed on Florida fruit this spring is shown below, with national gearboxes examining confiscated fruit. The larva stage of the pest is shown at lower right.

WASHINGTON (AP)—Warring hosts against the Mediterranean fruit fly are advancing to attack the enemy on its own territory—countries bordering the Mediterranean sea. The motor yacht Utowana has left with Allison V. Armour, wealthy New York patron of science and collaborator of the department of agriculture, and Prof. H. J. Quayle, University of California entomologist and leader in the attack.

The best, affording rapid movement, is equipped on board for scientific study of collected material. A brief survey of the fruit fly situation will be made in the Bermudas and the Azores, with the main work to be carried on in the important citrus area on the Mediterranean coast.

The heart of the attack will be carried by Valencia, Spain, after which other Mediterranean areas will be taken up in succession with stops at important points. Study is expected to occupy the remainder of 1929, and during the winter months Professor Quayle may carry the work to South Africa to cover fruit fly economies and behavior during the fruit harvesting months of January, February and March.

The expenses of the survey, while made under the auspices of the department of agriculture, will be defrayed by Armour, who has cooperated before in making available the vessel he has equipped for biological or other scientific and technical survey work. From the survey it is expected information will be gained as to the behavior of the insect under the climate and other controlling factors of the Mediterranean area and the measures used there to forestall crop losses.

Professor Quayle will be the agent for the department, university authorities having extended his approaching sabbatical leave to start the work immediately. He was drafted recently by the secretary of agriculture to be one of a special committee to make a study of the fruit fly situation in Florida. He has made personal studies of the fly in different parts of the world, including an extended survey in the Mediterranean region many years ago.

and torn, was seen to emerge from the muzzle of the gun. He hung for a moment, then dropped from the elevated mouth of the cannon to the ground. The act had been part of the daily program at the exposition. Beha—Local city reservoir improved. Corvallis—New legion hall building being completed.

SPRINGFIELD, Mass., Sept. 20.—(AP)—Herich Aikenhouse, who was substituting for Captain Wilno, the human cannon ball, was in a serious condition at Springfield hospital today as the result of an accident at the Eastern States Exposition here yesterday. Thousands of spectators were in the stands to see Aikenhouse shot from a cannon and land in a net. There was a roar and puff of smoke as the powder charge was exploded, but the human projectile failed to appear. A moment later the performer, his face bleeding

TABLE ROCK FOLK FIND COUNTY FAIR GREAT ATTRACTION

TABLE ROCK, Ore., Sept. 20.—(Special)—Jackson county fair week was observed to some extent by practically every one in this community, although it came at one of the busiest times of the year. All those who attended report a wonderful attraction and a delightful time, at both the day and night sessions. Added to pressing work already on hand comes the annual task of filling silos, which began Wednesday on the Ralph Wilson dairy farm.

Miss Evelyn Hamilton will leave Sunday for Eugene, where she will enter the University of Oregon as a Junior. Harvey Robertson of Prospect and a student of the University of Oregon was here Wednesday conferring with Donald Wilson in regard to returning to Eugene for the fall term. The stock was a Table Rock visitor last Friday, Sept. 13, and left a baby girl at the home of Mr. and Mrs. G. F. Keesman. A new Ford truck was purchased last week by Gen. Wright, local dairyman and milk route operator.

AUSTRIAN CLIMBERS PLUNGED TO DEATH

VIENNA, Sept. 20.—(AP)—The bodies of two young Austrian mountaineers were recovered yesterday after a strange mountain tragedy. Tied together by a long rope, one of the climbers slipped and dragged the other down. The center of the rope caught and the two youths, suspended over a deep crevasse in the Latemar range of the Dolomites, swung back and forth, one at each end of the rope, for 24 hours, until it broke, dropping them to death.

BASEBALL BROTHERS WILL STAGE SERIES

HAWK SPRINGS, Wis., Sept. 20.—(AP)—Two baseball teams composed entirely of brothers, are to play a world's series of their own, starting tomorrow. One team is the Marlat brothers of Hawk Springs and the other is the Stanzak brothers of Waukegan, Illinois. Hawk Springs will be the scene of the first two games and the other two will be played in Waukegan, Sept. 28 and 29. If they break even in the four games, the teams then meet on a neutral diamond to decide the world's brothers title.

Community Chest Aims Are Outlined

One of the commonest mistakes made by workers and others who are to render the economical features of the chest method of money raising, supervision and disbursing as the main reason for the chest. More better welfare work through a united program is the end the chest seeks to gain. The economics of the chest method—now thoroughly proven by years of experience in the 300 chest cities of the country—are merely a means toward this end. Classified advertising gets results.

LOCAL SCHOOLS FARED WELL IN HONORS AT FAIR

An analysis of the list of awards made at the Jackson county fair, on the educational exhibits entered by the school children of Medford, in competition with those entered by the Ashland schools, reveals the fact that Medford carried off the lion's share of prizes in the elementary and high school divisions. In classes 1 and 2, involving the work of the elementary school children, the prizes were distributed as follows: First, Medford 18, Ashland 7; second, Medford 13, Ashland 11; third, Medford 15, Ashland 9. The superiority of Medford's entries in penmanship was particularly apparent. The penmanship exhibits were composed of specimens of third, fourth, fifth and sixth grades, and junior high school work. Medford made a clean sweep of all first, second and third prizes awarded in the five exhibits of penmanship. The usual showing in penmanship by the children of Medford schools, is credited to the instructors, and to the fact that the Rice system of teaching was adopted last year. In comparing the showing of the various elementary schools of Medford, the list of awards yields

the following facts: The Washington school won 7 first prizes, 3 seconds, and 2 thirds; the Lincoln won 7 first prizes, 3 seconds and 2 thirds; the Roosevelt school won 6 first prizes, eight seconds, and 4 thirds; and the Jackson school won six thirds. A fact of interest is that all of the first prizes won by the Washington school were awarded on work done by pupils under the instruction of Miss Alice Crossan.

In class 3, made up of Junior high school exhibits, the distribution of prizes was as follows: First prizes, Ashland 13, Medford 9; second, Ashland 8, Medford 11; third, Ashland 6, Medford 5. In the class 4, or senior high school division, Medford won 21 out of a possible total of 24 prizes. The distribution was as follows: First prizes, Medford 13, Ashland 2; second, Medford 8, Ashland 1. The high school exhibits were composed of shop work, agriculture exhibits, Latin notebooks, science notebooks, mathematics notebooks, and work of sewing and cooking classes. A summary of total awards reveals the following: First prizes, Medford 49, Ashland 22; second, Medford 32, Ashland 20; third, Medford 29, Ashland 13.
