

# INCREASE AT NORMAL IS EXPECTED

Registration Shows Greater Interest of Men Students—President Predicts Most Successful Term—Nearly All Counties Represented—Teaching Staff Is Increased.

With students still registering from all parts of the state, the enrollment of the Southern Oregon Normal school at Ashland yesterday equalled the enrollment of last year and included a larger than average proportion of men students. President J. A. Churchill is looking forward to one of the most successful sessions of the school and in an interview yesterday afternoon told of various phases of the school work.

Nearly every county in the state is represented in the enrollment with a number of students from eastern Oregon, where the state's newest normal school was opened this year. Nearly 20 students are registered from California and others are attending from Washington.

The faculty has a number of additions, but the general course of study remains the same. Among the new faculty members is Miss Esther Church in the music department. She is well known in Medford and was supervisor of music in the elementary and high schools here last year.

Many Get Schools. In reviewing the work of the school since it was established, President Churchill declared of last year's graduating class of 189, only 14 remained that had not received schools, but he expects to place the remaining 14 before Christmas time.

Coaching Is Aim. The majority of men are attending the school, said President Churchill, with the aim of eventually becoming athletic coaches in small high schools and junior colleges.

subject-matter which he teaches, two courses will be offered in the organization of society designed to prepare the teacher to function as a useful member of the community of which he is a member, as well as to teach his pupils of assuming their proper privileges and responsibilities in society.

Physical education, a part of the two-year course, will be designed to prepare the teacher not only to offer instruction in physical training, but to supply leadership in athletic and recreational activities.

Work in music and art does not aim at the development of individual talent in the arts in the prospective teacher, but endeavors to instill the appreciation, the understanding of fundamentals, and the knowledge of methods which will result in good service in the elementary grades. The instructors in art, music and physical education will supervise practice-teaching in these subjects.

For students who wish to prepare for junior high school work in mathematics or history, elective courses in these subjects will be offered.

# NO BABY KISSER AND BAD MIXER SAYS BLOWERS

Eugene Man Decides Qualifications for Gubernatorial Candidacy Are Lacking—Might Be Independent Candidate.

SALEM, Ore., Oct. 1.—(Special) Lawrence N. Blowers of Eugene, who several months ago let it be known that he might be a candidate for governor, has written the Capital Journal that he will not seek the Republican nomination at the primaries. In a postscript he adds:

"This does not bar me from being an independent candidate, should the circumstances justify such action."

Stating his reason for not seeking the Republican nomination, Blowers writes: "I am not a mixer nor a baby kisser, and lack funds with which to purchase the office."

He continues: "I trust that this announcement will be pleasing to that type of Oregon editors who use their printing presses to secure appointments as postmasters of their home towns or seek diplomatic position, not because they are better qualified than many of their fellow citizens, but because they are equipped with potent printing presses. Great is the power of the press when properly applied."

"I was the first man in the state to advocate opening the Willamette river from Salem to Springfield for large transportation and to prevent floods. What constructive thing has the present governor done for the benefit of the state, in the three years he, with special counsel, has acted as chief executive."

"The Roosevelt highway should have been completed at the earliest possible hour. Our fellow citizens on the west coast have waited long and patiently and are justly entitled to relief. Taxes are burdensome in Oregon, but would not be if parasites were compelled to pay an income tax."

"Oregon needs for governor not a mixer or handshaker, but a doer, and there is plenty to do. Tom Kay, in my opinion, is such a man. If the people had asserted themselves and not permitted a few 'swags' of the Portland press to do their thinking for them, Oregon would not now be lagging behind Washington."

# Horses Do Not Climb Trees! AN ANCIENT PREJUDICE HAS BEEN REMOVED

Anger and fear greeted the faltering efforts of the first automobile. But the hands of AMERICAN INTELLIGENCE guided the steering wheel and controlled the throttle—the automobile drove on to glorious success.

## "toasting did it"—

Gone is that ancient prejudice against cigarettes—Progress has been made. We removed the prejudice against cigarettes when we removed the harmful corrosive ACRIDS (pungent irritants) from the tobaccos.

YEARS ago, when cigarettes were made without the aid of modern science, there originated that ancient prejudice against all cigarettes. That criticism is no longer justified. LUCKY STRIKE, the finest cigarette you ever smoked, made of the choicest tobacco, properly aged and skillfully blended—"It's Toasted."

"TOASTING," the most modern step in cigarette manufacture, removes from LUCKY STRIKE harmful irritants which are present in cigarettes manufactured in the old-fashioned way.

Everyone knows that heat purifies, and so "TOASTING"—LUCKY STRIKE'S extra secret process—removes harmful corrosive ACRIDS (pungent irritants) from LUCKIES which in the old-fashioned manufacture of cigarettes cause throat irritation and coughing. Thus "TOASTING" has destroyed that ancient prejudice against cigarette smoking by men and by women.

"It's Toasted"—the phrase that describes the extra "toasting" process applied in the manufacture of Lucky Strike Cigarettes. The finest tobaccos—the Cream of the Crop—are scientifically subjected to penetrating heat at minimum, 260°—maximum, 300°, Fahrenheit. The exact, expert regulation of such high temperatures removes impurities. More than a slogan, "It's Toasted" is recognized by millions as the most modern step in cigarette manufacture.

# FIND LOST GOLD OF BUTTE MINER BURIED IN CANS

BUTTE, Mont., Oct. 1.—(AP)—Buried treasure, not Spanish doubloons in conventional iron-bound caskets, but United States currency and gold amounting to \$22,295, in two rusty tobacco cans, was uncovered in a cellar in Butte, it was learned yesterday.

The find was made by Mrs. Sarah J. Quinn, pioneer Butte resident. The money is thought to have been the property of Thomas Foran, 65, old-time Butte mine watchman, who died last January. He had lived in Mrs. Quinn's home as a roomer and boarder for more than 30 years. After his death, she was appointed administratrix of the estate, at the time amounting to \$6,062. While cleaning the cellar, the woman noticed the top of a can protruding from the dirt floor. She uncovered a second can, and they were found to contain \$22,295, of which \$225 was in gold. The money was turned in to the Foran estate. Mrs. Quinn is now administratrix of an estate of more than \$28,000 instead of \$6,062.
