

YELLOW AND RED APPLES GROW ON SAME TREE HERE

An apple tree of the Delicious variety at the Southern Oregon experiment station at Talent bears upon one side apples deep red in color, and upon the other side the fruit is a pale yellow, streaked with mild red. The two specimens were shown today at the regular meeting of the Rogue River Traffic association by Prof. F. C. Rehmer, in charge of the station, who said that the tree was the only one of its kind in the state, though a similar tree had been discovered in the Wenatchee district of Washington.

Prof. Rehmer explained that the horticultural marvel was obtained by grafting "a Sport Delicious" branch to a standard Delicious tree, the original Sport, being obtained from a New Jersey tree.

The apples borne on the same tree, alike in all characteristics but color, will be placed on exhibition at the Chamber of Commerce.

Professor Rehmer told the association that the delightful velvet red of the Sport Delicious held a high appeal to the buyer and that he opened his pocketbook more readily for a bright red fruit than the less gaudy. He said there were more Delicious apple trees in the valley than generally supposed and that the coloring would have a direct effect on the profits in years to come.

He also cited an instance in this district of a Bartlett tree producing pears with russet coloring on

one branch while the remainder of the tree was normal.

H. Von Hoevenberg, Jr., and David Wood, members of the winter pear committee, appeared before the meeting and discussed the Bosc campaign now under way in Detroit. This was a lengthy discussion without any definite action.

A telegram was read from the department of agriculture explaining the rules and regulations of the British empire for the shipping of apples the coming season.

TWO ARRESTED IN BURNT BOND CASE

PORTLAND, Ore., Oct. 17.—(AP)—With two men under arrest on charges involving possession of bonds supposedly destroyed last June in a basement furnace at the American Bank building here, authorities today carried on their investigation of the destruction of bonds worth more than \$16,000 in San Francisco and Des Moines. District Attorney Stanley Myers said he had information that more than \$17,500 worth of bonds, part of a recalled \$1,000,000 issue of the Interstate Utilities company, in Washington and Idaho corporation were raked from the furnace.

Held in the county jail here in default of \$500 bond each were Howard Polly, former chief engineer of the bank building, and John R. Nesbitt, 76-year-old real estate dealer of this city.

Jantzen Profits Grow
SAN FRANCISCO, Cal., Oct. 17.—(AP)—Jantzen Knitting Mills reported net profits of \$6.10 per share on outstanding common stock for the year ended August 31, last. This compared with \$4.65 a share for the previous year.

GIRL UNHARMED SAYS PHYSICIAN PANTAGES CASE

LOS ANGELES, Oct. 17.—(AP)—Dr. Peter Sunden, a defense witness, threw a bolt into the trial of Alexander Pantages on a statutory charge late today with the testimony that he examined Eunice Pringle, accused of the theater man four days after the alleged attack and found no evidence of abuse.

LOS ANGELES, Oct. 17.—(AP)—The defense for the moment abandoned its efforts to show a conspiracy against Alexander Pantages as his trial on a statutory charge was resumed in superior court today.

The session which began fifteen minutes late was opened in the absence of the jury because of the argument which developed over the defense move at the close of court yesterday.

LOS ANGELES, Oct. 17.—(AP)—Garland Hirth, a defense witness in the trial of Alexander Pantages, was charged with perjury for his testimony that he overheard a conversation indicating a blackmail plot against the theater manager, it was disclosed at his arraignment today.

Stage On Decline
NEW YORK—(AP)—Jany Cowl thinks the theatre is on its last legs. Talkies, radio and bad manners of audience are responsible. She gave her views in a speech to the women's graduate club of Columbia university.

HEALTH ASSOCIATION MEETING AT PROSPECT

Instruction in Christmas seal sale work was given at yesterday's meeting of the Jackson County Public Health association at Prospect, with approximately 40 members present. The meeting was held with Mrs. Katie Grieve at the Prospect Hotel and tables were set on the large spacious lawn, affording a pleasant sight. The meeting was in charge of Miss Mildred Carlton, president of the association, and moving pictures of the recent health honor roll parade were shown by Horace Bromley.

CENTRAL POINT GRANGE SUPPER FRIDAY NIGHT

(By E. H. Strohmeyer)
CENTRAL POINT, Ore., Oct. 17.—(Special.) On Friday, Oct. 18th the Central Point Grange will have a unique supper at 7 p. m.

All Grangers and families are welcomed, adults 50c per plate and less for children. Grangers are expected to bring something of the following menu: Chicken pie, mashed potatoes, vegetable salad, pumpkin pie, and coffee.

Bring your plate, knife and fork. The supper will be followed by a good program and grange meeting afterward.

EUGENE, Ore., Oct. 17.—(AP)—The Sluslaw national forest was visited by 227,395 tourists during the summer, according to R. S. Shelley, supervisor.

CHRYSLER ROAD SHOW ARRIVED HERE TODAY

The Chrysler Road Show arrived this afternoon from Grants Pass and will be at the Chrysler Agency tomorrow and Saturday.

Mr. Elliott, the local district manager for the Chase Garfield Co., Chrysler distributors, invites all lovers of motor vehicles to call and see the complete line of Chrysler cars in this road show.

After spending two days here, they will go to Ashland and Klamath Falls.

RUM SYNDICATE BROKEN UP

(Continued from Page One)
landing stations, storage houses and distribution points.

Hotel Clerk Held
Patrick Connors, a clerk at the Ambassador hotel in Atlantic City, was arrested as a contact man for the syndicate.

William J. Cathoun, prohibition administrator for New Jersey, who was in charge of the raids in his state, said the syndicate was a "million dollar outfit" which operated a fleet of six ships between St. Pierre and Bermuda and an auxiliary fleet of 10 speed boats.

The ships, passing close inshore along the New Jersey coast, were met by speed boats, which took off the cargoes of liquor and ran them ashore. Unofficial estimates placed the amount of liquor brought in at 10,000 cases a week.

Alleged members of the gang were arrested by federal agents in several New Jersey towns and taken to Trenton for arraignment.

The raids extended over a 200-mile front.

Value of Bosc Pears in Diet Shown by Radio Talk From Detroit Station As Part Winter Pear Committee Work

The following is the latest radio talk, broadcast by the Winter Pear committee, over the Detroit station, in behalf of the Bosc pear campaign now under way in that city:

Good morning! Bosc pears! Old gold outside—sugared sunshine inside.

Fruit is being used more and more in the diet of all peoples. This is particularly true of the European countries, where fruit of all kinds is being consumed in increasing quantities. In view of the present knowledge of nutrition it is certainly an error to regard fruit as something of value only for its pleasant flavor or for its hygienic or medicinal properties. As shown by their composition and digestibility, fruits compare favorably with other and more common foods. According to studies made by the U. S. department of agriculture several years ago, a dollar on the average will purchase as much food value and energy when spent for fruit as when spent for lean meats and similar products.

Superior Fruit.
From the standpoint of desirability as food, pears compare very favorably with all other fruits and in some ways are superior. The fuel value of pears is given in United States department of agriculture circular No. 50 as 215 calories per pound, while that of apples is given as 290 calories per pound and that of oranges 230 calories per pound.

Among deciduous fruits, pears are unusually high in sugars. Studies with a number of varieties show the total sugars of pears to be 15.3 per cent while that of apples is 14.9 per cent and that of oranges 14.3 per cent. This is of special significance since fruit sugars are readily digested and absorbed by the human system. Pears are low in acid as compared with other fruits, a special boon to the many people who enjoy fruit, but who cannot tolerate high acidity.

The average total acidity for a number of varieties of pears is given in United States department of agriculture circular No. 50 as 29 per cent, while that of oranges is given as 79 per cent.

Low Waste.
In considering the food value of fruits, it is necessary to take into account the refuse or inedible material in the form of skin, pits, seeds, etc. Pears are unusually low in this kind of material. On the average, the refuse of pears is less than 10 per cent of the whole, while that of bananas is given as 25 per cent, that of apples and grapes 25 per cent, and that of oranges 27 per cent.

Dietsicians look to fruits and vegetables to supply that highly essential part of diet known as "bulk." If the foods eaten were of such a nature as to be almost completely absorbed, serious complications would follow. For this reason bulky foods such as fruits and vegetables are necessary.

The importance of fruits in supplying the body with iron and other necessary minerals is recognized by dietitians. United States Department of Agriculture Farmers' Bulletin No. 293 has this to say regarding minerals in fruit: "The importance of fresh fruit and green vegetables in supplying the body with iron and other mineral matter is often spoken of, and it is true that the amount of iron, for instance, which many such foods contain, is large and in proportion to their protein content or their energy value. This means that if the ordinary diet does not supply enough of some mineral constituent it may be obtained by adding the fruit or green vegetable, which will give it, without materially adding to nutrients and energy of the diet already abundant in these respects."

Necessary to Diet.
Dr. Dwight I. Roush of the Roush Sanatorium, Springfield, Ohio, recently made this statement: "Fruit forms a very necessary part of the dietary of man. For the sake of health, people should eat 10 times as much fruit as they are eating at the present time. To be more definite, fruit now forms but four per cent of the American dietary, while they should make up 40 per cent of the daily ration."

Ways of Serving Pears.
It is a fact that the average American has not fully discovered the possible uses of pears in the diet. In European countries where pears are better known, they are put to a far wider variety of uses. While many Americans have become accustomed to eating pears out of hand, few have had the opportunity to eat them in other ways. What American, for example, is used to eating pear pie? Yet in Great Britain pear pie takes its place along with apple and gooseberry pie. Pears baked in the oven are unsurpassed as dessert fruits. A baked Bosc pear served with sugar and cream, for example, has no superior and a treat is in store for those who have not eaten them prepared in this manner. As a salad fruit, the pear holds a distinct place. In this capacity it can be used in either the raw or cooked state. Pears are delicious when pickled and pear butter is an old standby among culinary authorities. Pear fritters and pear dumplings are less known but are worth trying for the person who desires variety in foods. Pear sauce deserves equal rating with apple sauce and is entitled to more recognition than it has received. Pear sauce, served with cake and coffee makes an excellent dessert for any occasion.

HERE IS YOUR SUIT

SOMEWHERE in our new selection of fall clothes is just the suit you've been looking for—with the kind of "hang" that looks so well on you and the color that "belongs" to you.

THE FABRICS are new, interestingly woven in sensible designs.

THE STYLE is correct and made to fit!

THE PRICE is well within the reach of YOUR pocketbook!

COME in tomorrow... see our attractive new KELLER-HEUMANN-THOMPSON'S. Here, we repeat, is your suit.

No More "Iron Maidens"! AN ANCIENT PREJUDICE HAS BEEN REMOVED

Never again need scientific research grope in darkened cellars behind doors bolted against torture. AMERICAN INTELLIGENCE has swept before it the ignorant barrier which stupidly impeded men of genius and science marches proudly on.

"toasting did it"—

Gone is that ancient prejudice against cigarettes—Progress has been made. We removed the prejudice against cigarettes when we removed harmful corrosive ACRIDS (pungent irritants) from the tobaccos.

YEARS ago, when cigarettes were made without the aid of modern science, there originated that ancient prejudice against all cigarettes. That criticism is no longer justified. LUCKY STRIKE, the finest cigarette you ever smoked, made of the choicest tobacco, properly aged and skillfully blended—"It's Toasted."

"TOASTING," the most modern step in cigarette manufacture, removes from LUCKY STRIKE harmful irritants which are present in cigarettes manufactured in the old-fashioned way.

Everyone knows that heat purifies, and so "TOASTING"—LUCKY STRIKE'S extra secret process—removes harmful corrosive ACRIDS (pungent irritants) from LUCKIES which in the old-fashioned manufacture of cigarettes cause throat irritation and coughing. Thus "TOASTING" has destroyed that ancient prejudice against cigarette smoking by men and by women.

"It's Toasted"—the phrase that describes the extra "toasting" process applied in the manufacture of Lucky Strike Cigarettes. The finest tobaccos—the Cream of the Crop—are scientifically subjected to penetrating heat at minimum, 260°—maximum, 300°, Fahrenheit. The exact, expert regulation of such high temperatures removes impurities. More than a slogan, "It's Toasted" is recognized by millions as the most modern step in cigarette manufacture.

"It's toasted"

No Throat Irritation—No Cough.

COLLEGE EXPERTS SCAN DAIRY COST

H. E. Selby and A. S. Burrier, two experts of the farm management department of the Oregon State college, this morning began the cost and economic survey of the dairy industry in Jackson county which will be carried on for the next two years by the Agricultural Experiment station whose headquarters are at Corvallis.

About 20 dairymen will be chosen in an impartial manner from a complete list of dairymen of the county with six or more cows, and these twenty will be visited by the survey experts. The survey is part of the state wide study of the dairy industry, which is declared the most important farm enterprise in Oregon with the possible exception of wheat raising.

County Agent R. G. Fowler is cooperating with the visiting experts in the selection of the 20 dairymen.

RUM PLANT FOILED

(Continued from Page One)
these accusations were false, malicious, without any probable cause or color, and constituted wilful misconduct in his profession by Joseph.

Conspired With Condit
"That Joseph suborned and conspired with one Clivig C. Condit to further bring the supreme court into disrepute by accusing and charging another justice with having granted a divorce to the said Condit for the consideration of the receipt of a quantity of liquor, Joseph was instrumental in causing the Portland Telegram to publish said charge. The charge is utterly untrue, made out of whole cloth, and constitutes wilful misconduct on the part of Joseph.

"Joseph also was instrumental in publicly accusing and charging, through the Portland Telegram, the supreme court and some of the justices of corruption and favoritism in the case of Wadsworth vs. Brigham, recently decided by the supreme court.

Telegram Used
"In the Naylor will case, decided by the supreme court, Joseph was instrumental in attacking the integrity of the supreme court through the Portland Telegram, and claimed that the decision was the result of favoritism to E. B. Tongue, Hillsboro attorney.

Another charge by Mannix is that Joseph advised and abetted in the publication in the Portland Telegram, alleging that Mannix had betrayed a client's confidence and conspired to rob another client.

More than a year ago Mannix filed a disbarment proceedings against Joseph with the grievance committee of the Multnomah Coun-

STRAY SHOTS PEPPER RANCHERS, IS CHARGE

Promiscuous and careless shooting during the first two days of the present season has not only frightened this game out of reach of the ordinary local sportsmen, but has resulted in several injuries where hunting has been permitted on the premises of Jackson county ranches, according to a prominent Medford nimrod.

One farmer was peppered in the back of the neck by some of the stray shot, he said, while another tiller of the soil was hit—elsewhere.

That most of the careless shooting and damage was done by young boys, was an explanation given in the report.

CHRISTIAN SCIENCE LECTURE AT RIALTO

A free lecture entitled "Christian Science: Its Simple and Inevitable Appeal," will be given in the Rialto theatre, Friday, October 18 at 8:00 p. m., by John C. Lathrop, C.S.B., of Brooklyn, Passaic, N. J., member of the board of lecturership of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

New Way to Improve Skin

A wonderful discovery is the new French process which gives MELLO-GLO Face Powder its unparalleled smoothness and makes it stay on longer. The purest powder made—its color is tested. Never gives a pasty or flaky look! Will not irritate or clog the pores! Its youthful bloom stays on longer. Remember the name—MELLO-GLO, Jarmis & Wood Drug Store.
