

BANK CANDIDACY IS ALL NEWS TO CHAS. M. THOMAS

Former Judge C. M. Thomas, when his attention was called this noon to items appearing in the Washington, D. C., news bureau of both the Oregonian and the Journal yesterday connecting his name, the middle initial of which both newspapers had wrong, with candidacy for appointment to the federal land bank at Spokane, said it was all news to him, and had nothing further to say, thereby implying he had neither sought nor was seeking the office.

The Journal's news bureau said in part: "Another job in which a vacancy is expected soon is that occupied by Asa Thompson in the federal land bank in Spokane. Thompson, who was appointed from Oregon, is rated a resident of Spokane, and the place is sought by C. W. Thomas of Medford and Harold Brumbaugh of Albany. The appointment rests with the federal farm loan board. The Oregonian's news bureau said: "The Oregon senators are holding up their recommendation for head of the land office at The Dalles until the return of Representative Butler. It is assumed that Dr. J. W. Danahy of Arlington, the incumbent, will be reappointed."

"Recognition of eastern Oregon will probably be a deciding factor in the appointment of a member of the board of the Spokane Land bank from the Oregon-Idaho district, to succeed Asa Thompson, who has resigned the Spokane office."

"The Oregon candidate will probably be drawn from the eastern part of the state, which does the bulk of the Oregon business with the federal institution. Judge C. W. Thomas of Medford and Harold Brumbaugh of Albany have both been recommended to the senators."

CO-OPERATIVE TO RECEIVE TURKEYS IN POOL SHIPMENT

Preparations were underway today by the Farm Exchange Co-operative for receipt of the first of the turkeys to be shipped by the Rogue River Valley turkey pool to the New York market.

The packing of the birds for shipment will start tomorrow, and it is expected that the first carload will be dispatched Wednesday.

Under the rules of the pool, killing and dressing of the turkeys started today for delivery tomorrow.

It is estimated there are 25,000 turkeys in the Grants Pass and Medford districts that will come into the pool, although a small portion of these birds may be held for the Christmas trade.

Between 6,000 and 7,000 pounds of turkey have been signed up for the pool.

It is planned to ship out a car of turkeys from this city Wednesday, Thursday, Friday, Saturday and Sunday, and one on Monday, if the supply warrants.

These shipments will reach New York City, consigned to Savage & Co., the Saturday before Thanksgiving.

Any turkeys from this valley received after that date, will be shipped by express, not later than November 16.

The advance prices range this season from 25 to 32 cents. A guarantee fund of \$30,000 has been posted in the Jackson County bank for use of the turkey pool.

Gasoline Killing.

PORTLAND, Ore., Nov. 4.—(AP) C. A. Hall, 55, died in a hospital here today from burns suffered yesterday when a stove exploded as he was starting a fire. It was believed he used gasoline in starting the blaze. Mrs. Hall was badly burned and was in a hospital here.

INTER-CLASS DEBATE ON CHINA POLICY AT HIGH SCHOOL NOV. 6

The inter-class debates between the freshman and sophomore, and junior and senior classes will be held before the study hall at the high school Wednesday. The subject will be: "Resolved, That the foreign nations should abandon their extra-territorial policies in China." The champion team will be determined by eliminations.

Each class will have both an affirmative and negative, and will be represented as follows: Senior affirmative, Albert Hollopeter, Ruth Hoeker, Robert Christner; senior negative, Charles Barnes, Norris Porter, Dorothy Walters; junior affirmative, Joan Reddy, Marjorie Marshall, Don Wold; junior negative, Barbara Deery, Doris Bundy, William Doorn; sophomore affirmative, George Bennett, Max Carter, Leola Van Dornmark; sophomore negative, Betty Culp, Elton Newton, Elizabeth Fleischer; freshman affirmative, Alva Edwards, June Davis, Ruby Hall; freshman negative, Anna May Eason, Winifred Roscherbaum, Lois Snyder.

EUGENE PUBLISHER TO SPEAK BEFORE FORUM

Frank Jenkins, editor and publisher of the Eugene Register and the Roseburg News Review will be the principal speaker at the Chamber of Commerce forum dinner to be held at the Hotel Medford at 6:30 Wednesday evening.

The meeting will be in the form of an inauguration of the Central

Civic Council, newly-elected body with representatives from each service club, the city council, the Chamber of Commerce and the planning commission. All service and civic club members will attend the forum.

A meeting of the forum committee was held this noon to outline plans for the dinner. A brief musical program will be presented in addition to the other numbers outlined.

Brisbane's Today
(Continued from Page One)

makers orders and wear long skirts.

The "fashionable" five percent of women will wear long skirts at night, with a tail at one side dragging on the ground.

The other ninety-five percent, less fashionable, but more intelligent, will stick to the short skirts.

That is good news, if true, but usually the majority is led by the minority, in styles.

And moving pictures, showing "the latest," as soon as it is produced, causes styles to change in three months. It used to take two years to make a change.

The British are optimistic, and to say so, about our Wall Street earthquake, feel that our regular business will suffer little. American speculation was draining the world of its gold supply, and less stock gambling should correct that.

Interesting situation in Chicago's cleaning and dyeing business. Racketeers, with shooting and bombings make it exciting to be a cleaner and dyer.

Now heads of the cleaners and dyers' union start a big competing business of their own, costing \$1,000,000.

The house dyers announce a lock

out of all union employees, and start an open shop.

Huntly boss cleaners and dyers put it, "Union heads, competing with us, can finance themselves only by grafting on union members. By discharging all union members, we shall destroy grafting competition at its source."

Unions and bosses will now call in racketeer assistance, doubtless, as old Italian cities used to bid for the fighting services of great captains.

Dr. Hibben, president of Princeton University, tells the Presbyterian theological seminary that he believes in "a personal god." God is "a personality with which human beings may come into contact."

"Science," he says, "support a view of God which permits a personal element."

The progress of science and especially knowledge of astronomy, cause much revision in men's ideas of God.

Only the simple minded imagine a being with flowing sleeves and a long white beard, managing this solar system and ten millions of others personally, with detailed attention to the worries and problems of each of the 1,500,000,000 creatures on this earth.

Christians in old days believed that Adam and God spoke to each other, face to face, using the Hebrew language, supposed to be spoken in the Garden of Eden.

Surely old ideas are modified. But if God is not a personal being, with a nature "permitting a personal element," he is not anything that men could possibly understand.

The ancients said "If the camels had a god, their god would have four legs and a hump."

Men's nature craves a god, talk some language, and interesting himself in inferior creatures.

Secretary Seward made a good bargain when he bought Alaska for \$5,000,000.

The interior department says Alaska contains at least a hundred and fifty billions tons of coal.

To buy twenty tons of coal for a cent is good business, to say nothing of gold mines and forests.

Secretary Wilbur suggests that extracted, instead of being burned this Alaska coal be developed as up, wastefully, according to the it should be, all its by-products usual custom.

Dr. Hibben, president of Princeton University, tells the Presbyterian theological seminary that he believes in "a personal god." God is "a personality with which human beings may come into contact."

"Science," he says, "support a view of God which permits a personal element."

A kidney discovery of great importance Natural aid found in Mexico (Also for high blood pressure and indigestion)

EVERYONE who hears of this discovery is amazed. It comes from Mexico. It is the pure fresh sap of the famous maguey plant—a great health food, a valuable tonic in kidney deficiencies, high blood pressure, indigestion and glycosuria. This marvelous discovery is a natural vegetable milk called "aguamiel" in its native country. There it has been used for centuries, but now it has been concentrated and imported here with the name shortened to Agmel.

Agmel is particularly successful as an aid in the "degenerative" diseases and faulty conditions in the genito-urinary system. All men and women entering middle age should investigate Agmel. Everyone of every age should learn at once about this wonderful natural

aid to health—particularly those who are being warned of danger by frequent arising at night, backache, high blood pressure and other symptoms. Imported by The Agmel Corporation, New York and Mexico, D. F.

"Digestion Now Perfect!" Food did not digest and caused great distress. I was run down and constipated from improper diet and hard work. After taking Agmel I find that my digestion is perfect, I sleep well and feel normal in every way.

—L. B. Curtis, Hollywood, Cal.
