BETTER BAKING? OF COURSE!

THIS TEST PROVES IT! How would you like to improve all your home baking? Here's a way. To show how possible it is, make this simple test: Use Sperry Drifted Snow Flour in this delightful muffin recipe. Note the finer results. Drifted Snow—the West's largest selling flour—will improve everything you bake. Follow directions carefully.

2 cups sifted flour 1 well-beaten egg
4 level teaspoons baking powder 1 cup milk
2 table-spoons sugar 2 tablespoons melted shortening
1 teaspoon salt 1 teaspoon salt

SPERRY

DRIFTED SNOW FLOUR

Sift dry ingredients into mixing-bowl. Beat egg well, add milk. Then gradually add this mixture to dry ingredients beating until smooth. Add shortening. Half fill well-greased muffin pans and bake about 20 minutes in a hot oven (425°).

Your oven can bake small popovers much better than Great big ONES

It's the same in roasting coffee. That's why Hills Bros roast only a few pounds at a time by their patented continuous process—Controlled Roasting. The small popovers turn out better because the oven heat bakes the small quantity of batter much more evenly than it could a large amount. And there is no other way to roast coffee as evenly as that originated and patented by Hills Bros. By a continuous process that controls the flavor, only a few pounds at a time pass through the roasters. No bulk-roasting method can produce such matchless uniform flavor as this process—Controlled Roasting. You get every bit of the aroma, flavor and strength developed by Controlled Roasting, because Hills Bros. pack their coffee in vacuum tins. Hills Bros. Coffee is sold everywhere. Ask for it by name. And to be certain that you get the genuine, look for the Arab—the trade-mark—on the can.
