Screen Life in Hollywood

By Robbin Coons.

HOLLYWOOD. — The talkies have brought a procession of dignified Broadway actors and actresses, many of long experience in footlight ways, trooping to Hollywood, but the exuberance and beauty of youth nevertheless still soars in the movie market.

Dorothy Janis

Which may prove, as many protagonists have contended, that the talkies are still movies, and that visual appeal rates as high as auricular, microphones or no.

Clara Bow and Alice White, and their lesser sisters among the leading exponents of flaming youth still are box-office charms, as might have been expected, considering their silent-screen popularity.

But even a casual glance over the lists of fairly recent contract names reveals that many of the newcomers to films are of the same vintage—with one important exception—as those of yore. The exception is that they can usually sing, dance, and talk as well as look pretty.

Youth on Parade.

There is Sally Starr, under 20, vivacious, flamboyantly young and peppy. Dorothy Lee, 18, that little "dumb" girl of "Syncopation," is another, and Dorothy Jordan, who is Ramon Novarro's leading lady in his first screen operetta. Then Marian Schilling, a vaudeville youngster who has played two leads already. . . . Zita Johann, star of the stage play "Machinal" . . . and Myrtle Mclaughlin, Marjorie White, Marion Byron, Armilda, Virginia Brunc . . . a veritable parade of youth, to say nothing of the young "old-timers" of the films, such as Anita Page, Loretta Young, Mary Doran, Mary Philbin, Dorothy Janis, Sally Blane, Doris Hill, Dorothy Sebastian and the rest.

Demise.

Movie press agents may as well don crepe. An old friend, long decrepit, finally is dead. The classic moss-grown "gag" about the studio gateman who halted the star as she entered the studio because he could not recognize her in make-up—that poor old p. a. standby has been administered the coup de grace. Olive Borden, willingly or not, did it.

She arrived in her car, her brunet bob transformed to a vivid blonde for a new role, and otherwise made up so that she did not resemble Olive in the least.

A studio p. a., standing nearby, figuratively pulled out pencil and paper, gloatingly. The gateman, however, failed to play his part. He did not recognize her either, but a new system makes such recognition unnecessary.

He glanced at the studio badge on the car and turned to his list. The badge, No. 175, could belong to no other car than Olive Borden's. And that was that. The p. a. departed, abject.

The "king of them all" was dead.

FIRST LATIN CLASSIC TURNED INTO TURKISH

ANGORA (AP)—Leaders of the western cultural movement are celebrating the first translation into Turkish of a Latin classic, Virgil's "Bucolics," which has just appeared in Turkish, translated by the prominent deputy and close friend of President Kemal, Rouchen Eshref Bey.

This is the first of the government's projected translations of Latin and Greek classics which are being made as a result of Kemal's dictum that these classics are the "vertrebal column" of the occidental culture with which Turkey is to replace the Persian and Arabic influences of the past.

About 1,000 men are engaged in the sale, servicing and repair of windmills in southwest Texas.

2 REAL BUYS

40 acre tract—Applegate valley, free river bottom soil; 28 a. in alfalfa, 15 a. produced 50 tons this summer; excellent free water right for all; 38 a. in cultivation; 7-room house, 100-ton dairy barn for 20 cows; equipped with 20 head of cattle, 20 cows milking by spring; team of horses; farm machinery. Personal property valued at $4000. Price $12,500; $3000 cash or will consider clear Medford house up to $2000 and $1000 in cash. Well located, electricity, close to school.

18 acres—close in, 17 acres under cultivation mostly alfalfa, river bottom; free soil; 4-room house, large dairy barn, other buildings, farm machinery, 7 milch cows and 5 heifers, team of horses, some turkeys and chickens. Water and taxes $175 per year. Price $6000. Owner will consider small acreage or residence as down payment.

JUST KIDS . . . . . By Ad Carter

PRINCESS IS GLAD FIND EMPLOYMENT AS SCRUB WOMAN

VIENNA.—(AP) Toiling for a middle class family in the seventh district of Vienna as a maid-of-all-work is the Princess Ida Rosa Sulkoska, only daughter of the late Prince Josef Maria Sulkowska, who died in 1926. She is listed on the Almanac de Gotha.

The princess is glad to have something by which to earn a living, although an exceedingly modest one. She receives approximately $6 monthly with board and lodging, but looks on that as passing rich compared with her condition three months ago, when she sought refuge at night in the city's asylum for the homeless and during the daytime went around with a pail and scrubbing brush picking up odd jobs at cleaning floors and windows.

The father of the princess lived in Vienna and founded the famous Sulkowski theater. He married the well-known opera singer, Ida Jaeger, and the Princess Ida Rosa was their only child. The young princess was reared in a Vienna palace, visiting in the summertime the country seats of the family at Feistritz and Pankotin.

DUKE OF YORK IS CURED STAMMER

LONDON—(AP)—Most Englishmen know that the Duke of York, second son of the King, was afflicted with a stammer in his youth and has almost overcome the defect, but few realized how serious was the affliction until the recent publication of the book, "The Duke of York."

The duke's stammer, says the author, Taylor Darbyshire, was so severe that it made life a burden to him. Some words he could not say at all. Thus in his early speeches he always spoke of "my father" or "His Majesty" instead of "the king."

Many specialists were called in, but nothing succeeded until the Duke met Lionel Logue, a voice specialist from Perth, West Australia, and put himself entirely in his hands. Every day for months he studied with Mr. Logue and would sometimes even pull up in the middle of a run with the hounds to return to London for an hour's study.

He practiced all the way out to Australia on H. M. S. Renown, and so successful were his efforts that, on his arrival, he was able to make a half-hour's speech with hardly a trace of hesitancy.

Ever Pick Up a Live Skunk By Its Tail?

Few of us have ever had the temerity to try it, and doubtless, still fewer of us would ever care to attempt it, being quite well satisfied to observe his majesty, "Mephitis Americanis" from a distance. It has been said that a skunk if lifted by the tail is helpless, and can only effect his deadly barrage when standing firmly on his feet.

Acting on this theory Kenneth Fuller Lee, well known outdoorsman and writer, tells in the December issue of "Forest and Stream" how he essayed to test this on a skunk that had taken refuge under a brush pile with just a portion of his tail protruding and affording a hand grasp.

Mr. Lee writes:

"I stepped right up and grasped the skunk by the tail, swung him out of the brush and held him aloft in triumph, much like Jason swinging aloft the Golden Fleece. The skunk didn't like it a little bit, his feet clawed madly at the air and his little black eyes fairly popped from his head . . . but there was no odor. My theory worked. Thank God!

The Sky in December

By Robert H. Baker
(Professor, Astronomy, University of Illinois)

URBANA, Ill. (AP)—The constellation Orion appears in the eastern sky in the evening during December.

On the first of the month it has entirely risen above the horizon at 8 o'clock, and by the end of the month it is in full view as early as 6 o'clock.

Orion is the brightest of the constellations and the best known next to the Great Bear. It is a quadrilateral of four bright stars, with three stars in a line near its center, which form the belt of Orion.

Three other stars somewhat fainter and closer together to the right of the belt, mark Orion's sword.

The middle of the three stars in the sword is really not a star, as it seems to be at first sight. A second glance is enough to convince anyone that it is a little too large and fuzzy to be a star. It is the Great Nebula in Orion.

The Orion nebula is one of the very few nebulae which can be seen at all without the telescope. Many nebulae are visible with the telescope; but photographs with great telescopes and long exposures, often of many hours' duration, are required to show these faint objects at their best.

Nebulae are really faint—not at all like dim stars whose feeble light is owing to their great distances. A nebula just across the street would be as difficult to see as one far out in space, although of course it would look larger.

The majority of nebulae do not shine at all. But we know about them because they obscure whatever is behind them. The great dark rift in the Milky Way, which extends from the region of the Northern Cross far into the southern hemisphere, is a notable example of such obscuration.

The dark nebulae which cause this rift hide from us also the great aggregation of stars, probably 50,000,000,000 in all, which are assembled around the center of our stellar system.

Nebulae are enormous cosmic clouds. They are far rarer on the average than our atmosphere. But this does not mean that they are entirely gaseous. In all probability nebulae contain solid material in the form of fine dust and perhaps larger pieces also.

Some astronomers suppose that the nebulae are the sargasso seas of space into which stray meteors ultimately drift and out of which the stars are formed.
