POP-ULAR... It might be good manners to be chewing gum all the time, but to one who never has learned the art it is mighty rude to be chewing away all the while.

MOVIES, BOOKS, ART AND...HOOEY

THE supreme test of any work of art is—to our mind at least—its reality. If it isn't real, it isn't art.

WE were careful to emphasize this as our view only, for we realize it is not the accepted view of pictorial art.

BUT in the so-called literary arts,—the drama, fiction, and movies, we are surer of our ground.

It was with this point in mind, that in this column about a year ago, in speaking of the movies, we wrote:

"So many modern movies are disappointing because they are so obviously fake,—so hopelessly juvenile.

Since then, in our opinion, the movies have greatly improved, or else our taste has deteriorated.

WE would like to claim the discovery of newsreel possibilities but have recently learned the idea of having programs exclusively "news."

THIS demonstrates, to our satisfaction at least, the truth of our contention, that the supreme test of art is reality.

BEFORE we close this very erudite discussion, we might add something we overlooked in our remarks upon the Greely expedition yesterday, and that extraordinary record of it, "The Outpost of the Lost."

There again was reality—so much more thrilling and exciting than 99 per cent of what we find in modern fiction that it gives one a terrific thrill.

Which doesn't mean, of course, that true book lovers will ever cease preferring such masterpieces as "War and Peace," "Vanity Fair," or "Richard Feverel" to any record of actual events, however exciting, that has ever been, or ever will be, written.

THE BOYS WERE PUFFED UP BUT NOT DAD

Here's a pretty how-de-do: Dear Doctor:

I am an old man, and have never used tobacco in any form, but I have three boys who acquired the habit with the rest of their high school education.

One day they took me on a visit to Bedford's Island to see the Statue of Liberty.

So we went up—and up—and up, past the lady who, until we reached the point where we could look upon the world through her eyes.

"Now, my sons," sez I, "I don't want to rub it in but I really think you boys ought to see what tobacco has done for you."

Certainly you did right, sir. From the tone of your letter I know you said it in a friendly way, as a pal of the boys.

Let me quote a paragraph from a recent report on a study of the composition of cigar smoke by Dr. Emil Bogen of Cincinnati:

"Under ordinary conditions many competent observers have failed to note any deleterious effects whatever from the use of cigars.

Cardiac arrhythmias are irregularities of heart action; thrombo-angitis obliterans is a type of painful gangrene of the feet generally, but not always found in young Jewish men who are excessive cigar smokers; nicotine amblyopia is partial blindness attributable to chronic tobacco poisoning.

Here's a good test for any smoker or who would like to check the effect of the tobacco on his heart: A normal man or woman ought to be able to run a mile, puffing, of course, but running all the way.

Mr. Bogen concludes that "A sound individual may hear what is for him moderate doses without injury, but even these are often noxious for the unsound or for other sound individuals.

It isn't hereto to kick a man's shins while some big guy holds him for you. But that's the way football heroes are made.

If a nation grabs distant lands to pay mounting expenses at home, it is called "imperialism." When a town does it, people call it "city extension."

Mr. Ford said last Friday in Dearborn that he had bought some 30 acres for a plant, in the city of Cologne, but said nothing about a light car, to compete with small European cars.

It's no longer a hick toxin if the doctor can tell his wife things without losing practice.

If the navy experts decide how many 8-inch guns equal how many 6-inch, there's still the job of determining how many gobs equal how many Jack Tars.
