New Year, New Cars. Ladies with Wide Hips. France Gets the Gold. We're All Richer.

Nineteen-thirty will be a big year for automobiles and the wise man will meet the year looking his best DRIVING A NEW CAR.

H. J. Klingler of General Motors wires description of a new type of Chevrolet, with more efficient shock absorbers, new Fisher bodies, bigger tires, brakes fully enclosed, greater horsepower and SMALLER PRICES.

The automobile industry leads all American industries in improvement in quality, performance and reduction in cost.

Last year Chevrolet sold more than 1,300,000 six-cylinder cars.

Don't worry about prosperity, but get what you need. One thing is a new car to double the value of your time and double self-approval that stimulates effort.

The San Francisco Examiner says, in big type, across the page, "San Francisco Women's Hips Largest."

So much the better for San Francisco and its future generation.

A woman built like a wooden path is all right for Ziegfeld's follies, well built to crawl through a picket fence.

The mothers of great men, from Charlemagne to Lincoln, from Alexander's mother Olympias, who danced with snakes around her, no other clothing, to the mother of Renan with good peasant blood, you will find real hips, something substantial, not an osteological anatomical specimen, of pelvic depression.

Wall Street put its sore shoulder to the wheel of 1929 with considerable energy yesterday. In accordance with Secretary Mellon's prediction, money was "easy" and the day finished with a brisk rise in prices.

Some worry because gold is going abroad. \$7,250,000 will be shipped to France on the Bereugaria today, making a total shipment of \$105,000,000 gold for the month.

You admire French financiers when you hear that they got \$50,000,000 of that gold. How do the French do it? They work and they save.

As your debts diminish, you automatically become richer. The people of the United States became richer by about a thousand million dollars, during 1929.

Mr. Mellon's statement shows that in twelve months the national debt has been reduced by one billion and nine million dollars.

If Uncle Sam collected his foreign debts, as efficiently as he collects from tax payers at home, we'd be clear of debt soon.

In Germany Mennonite refugees from Russia, encamped with their children, are stricken with a strange disease. Forty children died, in a few hours. Many were sacrificed because their mothers hid them from doctors, following a Mennonite custom of substituting prayer for medical attention.

That method no longer works. "Know the truth, and the truth shall make you free," includes scientific medical truth.

The son of Italy's king will soon be married and 6,000 will be freed.

1930 AUTO LOW, RAKISH AND SPEEDY

Also a Thing of Beauty and Luxury, With Many Mechanical Devices, and In Brilliant Hues — Evolve Non-Fading Enamel and Fancy Lighter.

NEW YORK, Jan. 4.—(AP)—The automobile of 1930, stream lined, low stunk, rakishly painted, and equipped with all the newest gadgets for speed and luxury, made its bows to the public here today.

With more than 300 new car and chassis models on display, the national automobile show opened in Grand Central Palace. It will close a week from tonight, pack up and move on to Chicago, to open there January 25.

Thirty years ago, the first automobile show was held, in old Madison Square Garden. On exhibit there were 31 "horseless carriages." Fewer than 5,000 cars had been manufactured that year.

In the United States during 1929 about 5,000,000 passenger cars and 650,000 trucks were built.

Back in 1900, the problem of "getting the things to run" was the chief concern of manufacturers. Nowadays, however, it is generally taken for granted that an automobile will have plenty of power and speed. So manufacturers have turned to the business of making them beautiful.

Stim as an arch-foolish is the new aristocrat of the highway, long of body and low. Lowest of all are the new front wheel drive designs, around which great crowds of visitors hovered today. To sit in one of these cars is almost like sitting in an old fashioned hobnob.

And there has been developed a new kind of enamel that won't fade, with the result that it now is practicable to have one's car painted baby blue, or rose color, or jade green. While interior decorators and jewelers have worked on the upholstery and fittings, artists have applied the paint.

Lined up against backgrounds of gorgeous tapestry, were a town car painted plane tan and trimmed with brown and burnt orange, a sports touring car painted white with yellow trim, jade green limousine, a sapphire blue coupe, and a roadster done in checkers outlined in tan on a brown background.

In a highly polished democracy they lined up for inspection rakish and expensive foreign cars, with their queer noses, side by side with the sturdier and cheaper of the American makes.

Metal trimmings, dashboard fixtures, cigar lighters, cigarette boxes, and other trinkets are more elaborate than ever before, in closed cars, a new kind of lighting fixture has been introduced. It has a tiny parchment shade, and is pulled on and off by a little chain.

There are numerous mechanical innovations, too, besides the front wheel drive. There are motors with four cylinders, six cylinders, eight cylinders, and one model with 16 cylinders.
