Principal Issues Lose \$10 to \$15 Per Share—Total Sales Six Million Shares for Day.

J. dropped \$5, and shares losing \$6 to more than \$10 included Radio Westinghouse Electric, Johns Manville, and Allied Chemical. PORTLAND, May 2.—(AP)—Of fluid butter prices remained unchanged today, but it was reported that a few dealers had found it necessary to shade prices in order to cut down supplies and halt further accumulation. Meanwhile, storage continues unabated.

Egg prices were barely steady. Strawberries are meeting with continued good demand, supplies are moderate and prices advanced again to \$3 per crate of 29 pints to retailers. Quality is very good. The potato market is dull. Best radishes are higher-priced, due to increasing prevalence of pithy and wormy stock. Tomatoes increased to \$6 per lug of repacked Mexicans. Cauliflower shipments from California are light, and Portland retailers are paying \$2.25 per crate.

Milk Bottles of Distant Dairies in Willow Springs

WILLOW SPRINGS, Ore., May 2.—(Special)—Radio fans boast reception of far distant stations, but some of us have done nearly as well on our daily milk bottles.
Honolulu, T. H., holds the record for long distance reception, while the most interesting one to us was a bottle from the "Highland Dairy," Rockford, Ill. Others were from Salt Lake and many were from the north coast cities, with quite frequently Medford. "The voice of a great country."

Brisbane's Today

(Continued from page one)
A report published by Mr. Frederick H. Ecker, president of the Metropolitan Life Insurance Company, concerning 19,000,000 industrial policy holders in the United States and Canada, shows that workers are living longer than they used to. Thanks to science and progress, the death rate among wage earners has diminished. Mr. Ecker's statistical bureau shows a new low rate of 9.4 per 1000 during March. More adults that live, fewer babies that die is a good program.
Mrs. Ruth Hanna McCormick believes in paying her own bills. You cannot say that much of all male politicians.
Fighting for the senatorial nomination in Illinois, she spent \$257,572, all her OWN MONEY. Other funds spent in the campaign came from close relatives.
Those that vote for Mrs. McCormick this fall will know that they are voting not for the nominee of any corporation, but for a woman who pays her own way in politics, and sets a good example.
You say it is outrageous to spend so much money in a primary campaign. So it is. But it was not so in this case, for bribery of voters.
An expensive primary is better than the old-fashioned convention, with bosses of both parties appointing the nominees of both parties, in obedience to corporations controlling both parties.
England, France and Belgium have reduced the redaction rate, which means that you can get money more cheaply there.
You could get it at Paris under 4 per cent while American buyers of stocks were paying 15 per cent. Our Federal Reserve reduces its redaction rate in the New York district to 3 per cent.
"Call money" with which stocks are bought, will be cheap for the present.
Nevertheless, stocks were weak yesterday.
Some apparently were wise enough to know that even cheap money is dear, if you use it to gamble.
Six months ago 3 per cent call money would have meant 100,000,000 share days on the Stock Exchange.
The Western world will hear with regret of another earthquake in Tokyo, unusually strong.
Japan is on the edge of a gigantic submarine canyon, deepest in the Pacific ocean. Frequent ocean landslides explain the earthquakes that have numbered as many as 1500 in one year. The courage of the Japanese is admirable.
The price of sugar for future delivery sold yesterday at the lowest price on record since the Civil War, raw sugar selling for 1.53 cents a pound. Sugar men are worried about the tariff here and in Great Britain.
