"DIET" DOES NOT NECESSARILY MEAN "DENIAL"

A Diet That Promotes Health Must Be Complete and Enjoyable

To thousands, the idea of "going on a diet" means a period of hardship and denying one's self of favorite dishes.

In some cases, diet may mean this. But today there are millions who are "on a diet" for the sake of better health and more vitality, who are not suffering as martyrs at the dining-table.

These people sit down three times a day to meals where there are plenty of good things to eat. Of course they are careful to choose foods which will supply their systems with the proper amount of calories, vitamins, minerals and roughage. Then to make the meal enjoyable and complete, they eat jellies, relishes and sweet desserts.

In making essential foods in balanced menus tasty and inviting, countless cooks are learning the value of sugar as a flavor. A dash of sugar to a pinch of salt works wonders in improving the taste-appeal of spinach, cabbage, carrots, beans, peas and other vegetables. The same rule can be followed successfully in making salad dressings. Doctors approve this use of sugar as a flavor because it makes nourishing foods more appetizing. Good food promotes good health.
