'DRY SNOOP' PROTESTED BY STUDES

Campus Hip Patting Causes Riot at University Chicago—Co-Eds Call Encouragement As Boys Battle Cops—Set Big Fire.

CHICAGO, Ill., May 14.—(AP)—University of Chicago students, holding a "protest meeting" against what they termed "dry snooping" at the university, were dispersed late last night by police riot squads and firemen.

George O. Fairweather, business manager of the university, discounted reports that the students were protesting against "dry snooping." He said no alarm was felt concerning the liquor question at the university, and explained that if the watchman had halted any students to search them, they were seeking loiterers with weapons, not students with flasks. Fairweather said the university district recently had been molested by prowlers. Not until the officers fired their revolvers into the air did the students, numbering 500, abandon the fight which was waged in the glare of a huge bonfire on the university campus.

A police lieutenant was struck on the arm by a brick and several students were slightly injured when policemen tore into the crowd with their night clubs.

Co-Eds Encourage the students from vantage points in dormitory windows and parked automobiles. Cheer leaders ran to and fro, bolstering the student morale.

Several days ago some fraternity members were reported to have charged that watchmen hired by the university had been stopping students on the campus and patting their pockets in search of flasks. They said the watchmen had been placed backstage at performances of the Black Friars, university theatrical organization, to make certain that no liquor was there.

Following last night's Black Friar performance of "Smart Alec" at Mandell hall on the campus, a group of students marched from dormitory to dormitory, recruiting students for a "protest meeting." Timber from the tennis stands was augmented by packing cases, and the pile was saturated with gasoline, the flames from student automobiles and set afire.

Traveling Zoo With Barnes Circus

Miss Patsy Clancy and "King" Zebra

What is said to be the world's largest travelling zoo will be in Medford, Monday May 19. Students of zoology and this includes practically every resident of this community, will welcome this news as the display offered here will contain hundreds of specimens of wild animal life from Asia, Africa, South America, North America, and all other continents. This zoological display is one of the extraordinary features of the Al. G. Barnes circus, which will give two performances here. The menagerie doors will open one full hour in advance of exhibition time so that a complete tour can be made of the large tent, which covers an entire city block. Courteous attendants will be found ever ready to answer all questions. Much knowledge of jungle beasts and brutes can be gained by a lengthy visit to this department.

honor of the birthday anniversary of Olaf, Jr.

The evening was spent in outdoor games and refreshments were served.

Those helping celebrate Olaf's birthday were Robert Merritt, Andrew Severson, Roland Casad, Allen Gebhard, Junior Kline, Melvin and Marvin Mayfield, Harry Nelson, Delbert Ayers, This Speaker, Emory and Joe Culbertson, Joe Johnson, Lewis Hedgpeth, George Merritt, Junior Ayers, Darwyn Speaker, Ernest Speaker and Clyde Fry.

CENTRAL POINT CLASS ENJOY BIRTHDAY PARTY

CENTRAL POINT, Ore., May 14.—(Special)—Members of Robert Merritt's Sunday school class of the Federated church were entertained at the home of Mr. and Mrs. Olaf Severson on the evening of May 5. The party was in

MAIL TRIBUNE WILL FURNISH ELECTION NEWS

KMED and Bulletins at Office Will Give First Returns in Primary Friday Evening.

The Mail-Tribune will broadcast over station KMED, and bulletin and post primary election returns at its office on North Fir street, for state and county, next Friday evening with the closing of the polls at 6 o'clock.

Figures from up-state will be furnished by the Associated Press. Jackson county returns will be from officials, country correspondents, and regular news sources.

First figures will be available shortly after the closing of the polls, as practically all the large precincts in the county have double boards.

In this county double boards have been named for Gold Hill, Central Point, several of the larger Ashland precincts and the Medford precincts.

The double board will start counting at 10 o'clock in the morning, or as soon thereafter as 20 votes are cast. The results are kept secret until the polls are closed, when the judge of the election is instructed by the state law to announce the count. The double boards will eliminate slow counts and make the figures available early and often. Election boards in the county this year contain many experienced accountants.

Results Known Soon

By not later than midnight, near-definite figures will be available on the fortunes of candidates and measures.

Election laws also require that all ballots be counted at the same time. The purpose is to eradicate the "split count," viz: election boards counting special ballots first or vice versa.

Election officials have been especially instructed to bring in the ballot boxes as soon as possible, to avoid delay until Monday. The sheriff's office delivers the boxes, but the election boards return them.

Interest in the election continues apathetic. It is expected to become "the sole topic of conversation" the final day, when the eleventh hour canvass starts flying.

County Assessor J. B. Coleman, recognized as the leading political prognosticator of these parts, "predicts a horse race between Corbett and Norblad, with Ifall the runner-up." He holds that Hall may spring a surprise, "as he has done four times as much campaigning in this section as the other candidates."

Embassies of Hall have been "gunshooting" for the past 10 days, rallying 1922 supporters.

Joseph, the "bad boy" of the campaign, is not a serious contender, with no show of strength except in Jacksonville, where he has a number of old friends.

CLEAN-UP DAY A BIG SUCCESS AVER LEADERS

Roadsides Relieved of Rubbish Heaps By Willing Workers—May Become Annual Event.

Reports from many parts of the county indicate that Oregon's first highway clean-up day was a decided success locally. The hearty cooperation of individuals and organizations made a very marked improvement on roadsides and adjoining properties. Everywhere the response and many expressions of hope that the day would be an annual event.

In the Applegate district Mrs. Lee Port and Mrs. Buck organized the community and assigned the various sections of the road to residents. Among these leaders were Mrs. A. F. Kleinhammer, Mrs. Poole, Mrs. Mollie Ray, Mrs. Harry Brown, Mrs. Coppel, Mrs. Bert Marr, Mrs. Floyd Hippy, Mrs. Winstingham and Mrs. Leonard McKee. The school children were enlisted in the campaign and virtually the entire neighborhood spent the day clearing away rubbish from the roads. Great interest was taken by individual property owners in cleaning up their own premises and the work is still going on. The rubbish was gathered up by a forest service truck and carried away to a dumping ground.

Oak Groves Work

In the Oak Grove district everyone entered wholeheartedly into the work of the day, led by Mrs. Brockway and Mrs. Hiles. Talks were given to the schools and great interest was aroused in the homes by this means. Miss Alice Hanley, in charge of roads north and west of Jacksonville reports that much good work was also done in that section and that the roads were left in very good condition.

At Butte Falls, Mrs. Guy Moore started a campaign which culminated in a successful clean-up day Monday, May 5th. At Eagle Point the clean-up activities were in charge of Mrs. H. G. Brown and Mrs. Mattie Brown.

Through the cooperation of the county court and engineer trucks were sent out and many loads of rubbish were gathered by county prisoners on roads where there are few people to take care of the matter in a community way.

Gave Plants

Believing that highway beautification was in line with the spirit of the day, the local Garden club gave away plants and bulbs from their gardens to all highway residents who would plant them in view of the highway. Over a hundred called during the day and it was noticed that many were newcomers to southern Oregon who were very glad to get flowers started on their places.

Much publicity was made possible thru the generosity of merchants who give time on their radio advertising hours to clean-up talks and by the papers who gave much space to material on the same subjects.

Now that our roads have been put in such good condition it is hoped that people of Medford and other parts of the county will take pride in keeping them so. One worker remarked that she was rather discouraged last Sunday when she saw places she had helped to clean up the day before again littered with papers from picnic lunches. If a proper spirit of cooperation could be shown all year, next Highway Clean-up Day would not see so much needing to be done.

The Texas state highway department has started a campaign for the preservation of trees along the right-of-way of state roads.

the even Firestone has ever built. "In making this broad statement, let it be remembered that present Firestone tires hold all world's records on road and track for safety, mileage, speed and endurance. In 1922 they would permit more than 40 miles an hour with safety. The automobile has since been completely redesigned and speeds more than doubled in many instances. Balloon tires have brought this about by forming a "cushion" between the car and the road, thus making high speeds as comfortable as low speeds.

"This new Firestone balloon is far in advance of anything that has heretofore been manufactured and answers the question of many motorists 'Is my car safe at its highest speed?'"

New Firestone Tire Presented

H. G. Tucker, Vice-president and general manager western Firestone organization.

The Firestone Tire & Rubber company this week announces a new balloon tire to be known as the "Firestone Heavy Duty Balloon" that is said to be the "last word" in pneumatic automobile tire manufacture.

"Firestone brought out the first straight-side automobile tire, the first rubber non-skid tread, the first commercial dismountable rim, the first patented gum-dipping process and the Firestone balloon tire, and now this new tire," says T. Freeman of the Firestone Service Stores, Inc., "built far in advance of today's car requirements surpasses in strength, toughness, traction and wear resistance any

George Bancroft Star of Rialto Hit

George Bancroft, whose burly manners and lusty laughter have won him millions of friends among movie-goers, will be seen and heard in his latest Bi-talkie, "Ladies Love Brutes," at the Fox Criterion theatre four days beginning today. The story is based on a play, "Parton My Glove," by Zoe Akins, author of "Sarah and Son." Bancroft is seen as the structural steel worker who becomes a successful businessman and tries to "crash the 400," with surprising results.

PHOENIX SENIORS BUSY AS SCHOOL END APPROACHES

PHOENIX, Ore., May 14.—(Special)—School terms here will close Friday the 23rd.

As the term draws to a close the attention of the community is called to the various features.

Friday night, May 18, the junior class will entertain the senior class with a banquet at the Blue Flower lodge. This has been a regular yearly occasion for many years past in the Phoenix school and both the junior and senior classes look forward to the banquet with interest.

Sunday, May 19th, is baccalaureate Sunday and special exercises fitting to the occasion will be given during the morning church hour, from 11 to 12.

The pastor, Rev. F. F. Schell, and the choir are making special preparations and plans for this service. The community is invited to attend the graduation exercises at the school.

An enlarged parole program has been inaugurated by the 534-south state parole board, twice as many cases being heard each month as in the past.

RUSSELL'S

THE 4-way cold KELVINATOR gives these Extra Services!

- Automatic Super-Fast Freezing—Iso-Thermic Tubes, an exclusive Kelvinator discovery, provide for the first time amazingly fast automatic freezing of ice cubes and desserts.
- Cold Storage Compartment—In de luxe models, a temperature always below freezing for storing fresh or frozen meats, fish, game and those new frozen delicacies you now find at many markets.
- Greatest Ice Capacity—De luxe models provide more ice, size for size, than any other refrigerator. A single freezing gives from 20 pounds in the smallest size to 34 pounds in the largest size.
- Kelvin Cooler—An accessory, useful in two ways: First, to freshen vegetables and keep them fresh; and second, as a water cooler. All-porcelain, inside and out, and fitted with faucet.

In the same sense that the self-starter, electric lights and four-wheel brakes multiplied the service afforded by the motor car—so Kelvinator's extra features multiply the service given by electric refrigeration in the home. These extra services are highly desirable. No one would want to try to get along without them. Once you fully realize the merit of these extra services, you will prefer Kelvinator's 4-Way Cold and multiple services in home refrigeration.

BUY ON EASY TERMS

The model Kelvinator you require may be purchased on easy terms through Kelvinator's attractive ReDisCo monthly budget plan.
