#### MEDFORD'S CANNERY PROBLEM TO BE EXPLAINED

SOME TIME ago we called attention to what Hillshoro, Oregon has done in making its one cannery an outstanding fincial success, and a medium for community b-tterment and development.

We asked why Medford, larger and more favorably situated in many ways, could not achieve a similar success in this portion of the state.

That editorial was reprinted by the Hillsboro paper, and after reading it, Mr. Edward Schulmerich, president of the Com-mercial National Bank of that city, who was largely responsible

which is to be held in your city during the month of June. While I am in Medford I will be pleased to give you details as to the methods used in making the Ray-Mailing Company the successful concern it is today. I will also be pleased to appear before the industrial committee of the Medford Chamber of Commerce and give them the benefit of our experie

Officials of the local Chamber of Commerce are enthusiastic ver this offer, and Mr. Schulmerich has been invited to give a talk before the chamber's industrial committee, probably a public meeting, the time and place to be announced later.

We are sure all the people of Southern Oregon will look for ward to this address with the greatest anticipation and interest. It should be one of the most important events of the year, as far as a definite solution of our earnery problem is concerned

#### WHO WILL WIN IN NOVEMBER?

YES, the gubernatorial campaign in this state, this fall, should be of unusual interest. Unusual, because old party lines will be abandoned and scrambled, as never before.

As a matter of fact, as the situation now stands, the tradi tional roles of the Republican and Democratic candidates are almost completely reversed.

A S far as there is any real difference between the two major parties, the Republicans represent conservatism, the Demoerats radicalism; the Republicans, a general maintenance of the status quo; the Democrats an appeal to the "deer pee-pul" a full reliance on that time-honored slogan, "Turn the rascals out!"

But with the "L-raisin" "George Joseph leading the ponderous and slow-moving G. O. P. elephant; and the same and conservative Edward Bailey leading the hard-kicking and pestifer ous Democratic donkey, the partisan rank and file will face the familiar predicament of the chamelon on a Scotch plaid.

Mr. Joseph will inevitably appeal to all that is bred in the Democratic bone; and conversely Mr. Bailey will appeal to everything that the typical Republican holds most sacred.

As a result, unless one or two independent candidates come efforts to pester the president, and consort as much as possible with his political foes, in order to be "milliant."

in to relieve the strain and clear the atmosphere, the result in November will be as difficult to predict, before the event, as the "milliant." result last Friday.

OF course it is the general belief now that nothing can beat Joseph, just as it was the general belief a week ago that

Then there is the emotional factor. As the recent primary demonstrated, people, as a whole, don't vote as they think, but as they FEEL. And human feelings are particularly susceptible to that old law of action and reaction, the inevitable swing of the pendulum, in this dance of life.

Somebody sends in a slipping of an Item referring to the suicide of a girl aged 21. The girl's friends remembered she had been depress-ed and they readily acquiesced in the newspaper verdict of suicide while melancholic, and the melancholia, the vulturouss friends condude, was induced by an inferior ty complex. Try and explain that

Answer.—Thank heaven most of

us have our inferiority complexes, and only a few suffer from superiority complexes. Melancholla is form of insantty, not mere loneliness, homesickness, friendless feeling or inferiority complex. Neither where the silentest ground for these the silentest ground for is there the slightest ground for the popular notion that these ordinary anxiety or werry or disappointment spells, which most of us have now and then, can or do lead to insanity. If the young woman in this instance really was insane (as I thing she must have described it, were clearly symptoms or effects of her illness and not the cause of the tragedy. That isn't a very happy thought, but it is consoling. Here is the happy thought I hope to plant in every reader's mind: It is excessively rare (almost unknown) for a per son who is actually developing any form of insanity to think so himself; as a rule he or she is the very last to acknowledge insanity. On the other hand, it is quite a rare for any one who suspects, fears or believes he is "going insure." to go insare. So remember this when and if the melancholic days come. This is not the place to enumerate the real causes of insanity,' but inferiority complex is not one of them, for if it were we should all be demented excep-maybe a few morons.

As they rode along through the air it was the strangest, most won-derful sight to see the lights gleam-ing from these different hotels and places up in the air.

Sometimes they would go through a dark cloud and when they were out of it they would once again sea the twinkling lights from the windows of the great hotels,

Now and again they looked at the earth below. There were som beacon lights to be seen, and dim tered lights along the streets of towns and villages—but the brightest lights were all up in the air.

Far above them they could see the stars. They looked very small, it was like a Fairyland with the earth below and its flickering lights and the air through which they

were flying and its gay lights, and above them the twinkling lights of the stars.
They flew and they flew and they flew, and pretty soon the alr and
