You enjoy its SUPERIOR PERFORMANCE even on the roughest roads
You probably know the Oakland Eight best as a car of superior performance. Its exceptional speed—its thrilling pick-up—its masterly hill-climbing power are qualities that people are apt to note and remember. But the Oakland Eight is a car of unusual comfort, too!
A car whose remarkable roadability invites you to open the throttle—and take even the roughest roads with a feeling of restfulness and safety. Reasons? Here they are: An 85-horsepower engine whose high ratio of power to the weight of the car eliminates all sense of effort or strain. A low center of gravity that minimizes swaying and keeps you hugging the road securely. A wheelbase of 117 inches, and carefully worked out springs whose action is controlled by Lovejoy Hydraulic Shock Absorbers. Skillful distribution of weight that contributes to harmony of motion. A steering gear that works on roller bearings.
Performance on the perfect road is one thing—performance where the going's rough is another. You get them both in the Oakland Eight. Come in—and let us prove it!
