SILVER DEPOSIT FOUND ON GOLF LINKS IS CLAIM

The Dalles Country Club Yields Rich Samples From Bottom of Old Well—Will Sink Shaft

THE DALLES, Ore., June 13.—Possibilities of rich silver deposits near this city were seen today in the report of Lester S. Harrison, Kellogg, Idaho, mining man, that he had discovered rich samples of the ore on the property of The Dalles Country club.

Harrison said he had reamed off ore samples from the bottom of a well, sunk several years ago for the purpose of irrigating the golf links at the club. He said cuttings indicated a rich silver bearing strata six feet thick.

Harrison has completed negotiations with the directors of the club and entered into a contract to develop the ore properties, giving the club a 10 per cent royalty.

A test bore was made recently near the well, and a four-foot seam was discovered at a depth of 286 feet. Harrison this week took advantage of the removal of the pump used in the irrigation system to ream the well. He said steps will be taken to sink a shaft on the club property and thus ascertain definitely the extent of the ore.

Harrison left today for Portland to have definite assays made of the cuttings he took from the well.

American Dancer Has Run of Luck Playing Baccarat

LE TOUQUET, France. Jenny Dolly, American dancer, had a run of luck at a new baccarat table in the casino today, carrying off winnings which other players estimated at 2,000,000 francs, or about \$80,000.

She left at dawn after an all-night session at the table and took her bank notes with her.

EXPERTS WILL OPEN WARFARE ON ALL PESTS

Experiment Station Will Be Opened in Portland to Study Mosquitoes—\$10,000 Available.

PORTLAND, Ore., June 13.—The marshaling of an array of expert entomologists to combat the spread of pests of all kinds in all states was seen here today by Dr. W. V. King, federal entomologist, who arrived here from Louisiana to study the habits of Aedes Aldrichi, or mosquitoes.

Dr. King spent many hours in spots where the summer pests were reported to be numerous here and in selecting a site for an experiment station. The government has appropriated \$10,000 for the study.

"While there may be 30 varieties of mosquitoes on the Pacific coast, there is only one brand that is causing trouble," King said. "Pests of all kinds are more plentiful now than before because of the extensive cultivation."

The federal entomologist said that in some cases war against one pest would kill off its enemies and he said this was the case in the war against the boll weevil of the south.

CENTRAL POINT MAN SUFFERS HAND INJURY

CENTRAL POINT, Ore., June 13.—(Spl.)—Ermal Shaver had the misfortune to get his hand crushed in a pulley while working on the Watkins ranch on Tuesday. Dr. Poelitz is caring for the injured member.

ROSEBURG SURE TO BE SITE FOR VETERAN HOME

Only City Making Bid For Institution and Offering Free Land—Bill Post House.

PORTLAND, Ore., June 13.—(P)—Reports reaching Portland today from Washington, D. C., indicated there was no question but that Roseburg would be given the new national soldiers' home, a bill authorizing which was passed by the house yesterday.

It was said, however, that just before passage the measure was amended to the extent that a site in Roseburg was not specified, but the location was left to one of the Pacific northwest states.

Since Roseburg is the only city that has put up a strong bid for the home, and since that city had offered a tract of land for that purpose, those interested in veterans and in hospitalization here believe there is no question as to the site.

The measure stipulates that the city, county or state must donate the land for the institution. No other city has offered land for this purpose.
