

CAMERAGRAMS

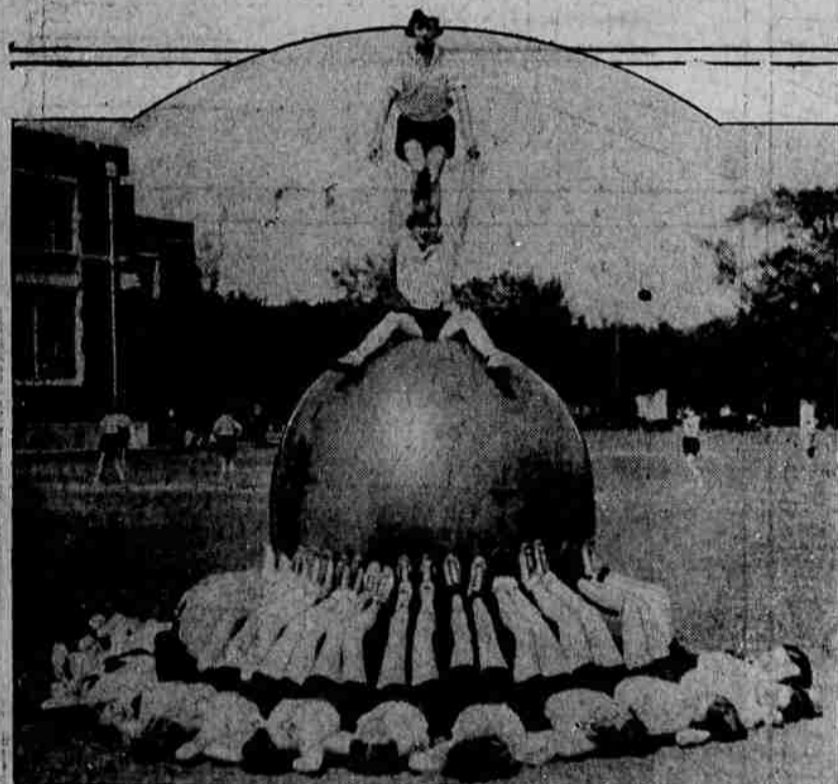

FIT FOR KING and also the queen was charming Miss Ruth Beaton, above, who, in this lovely gown of mousseline de soie, was presented before the rulers of England at Buckingham Palace recently. She is the daughter of Mr. and Mrs. Ernest Beaton.

THE NEAREST YOU CAN COME TO HEAVEN IN THESE UNITED STATES is to climb Mount Whitney, loftiest of the country's purple-mounted majesties. Situated in the main range of the Sierra Nevada in eastern California, Whitney is surrounded by a region of unusual scenic magnificence and grandeur. The peak, shown here in this striking view from the air, towers to an elevation of 14,501 feet above sea level. An interesting fact is that the lowest point in North America, Death Valley, 276 feet below sea level, is but 80 miles east of this gigantic mountain. No matter what time of the year you climb Whitney, which can be done with comparative ease, be sure to bring heavy clothing, for you will find snow and ice on the northern slope.

LOTS OF FORM on this platform—These pretty diving girls are pictured here just before they initiated the "battery" of practice diving boards at Long Beach, Calif., to be used by aquatic stars preparing for the National A. A. U. Outdoor Swimming and Diving Championships to be held there in July.

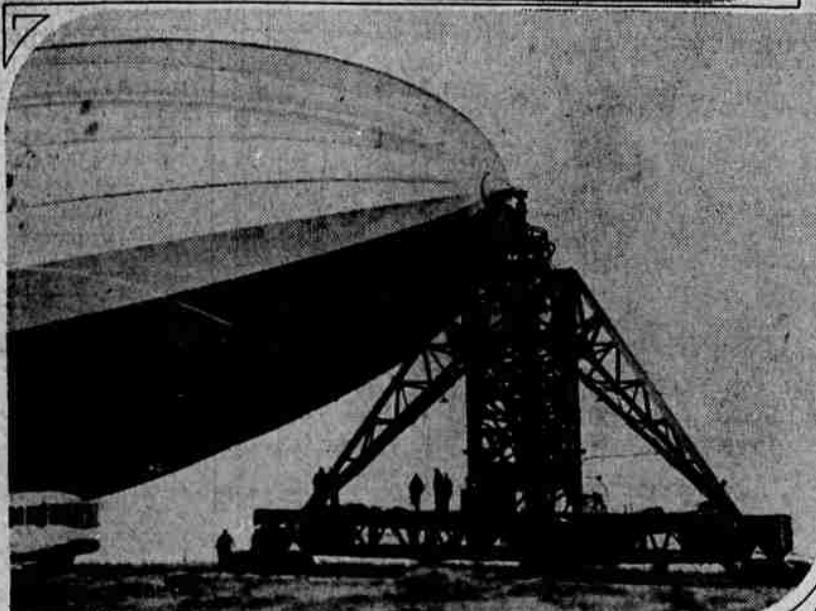

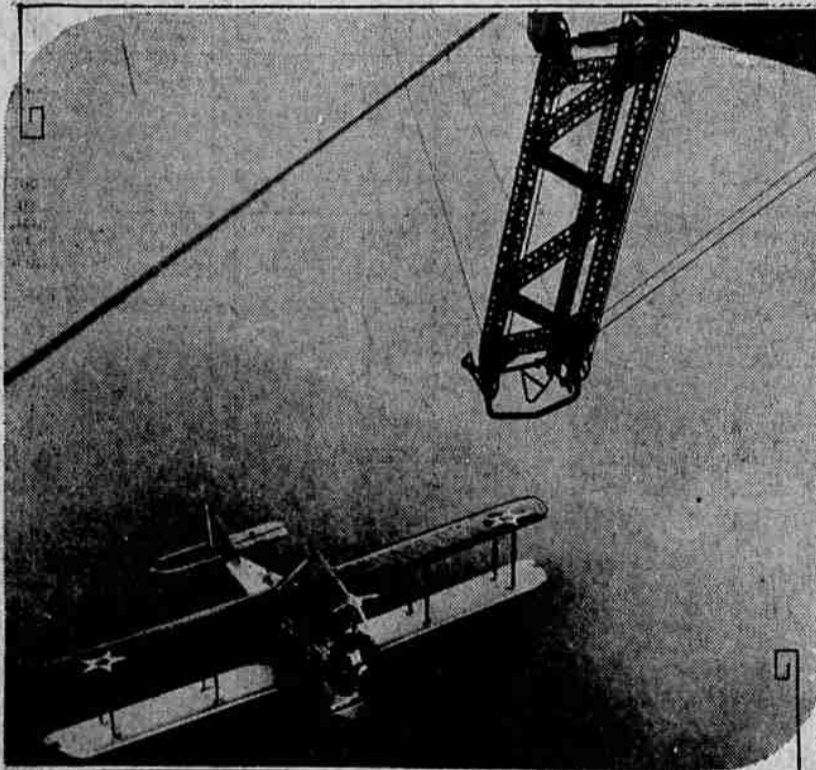

TRYING OUT SOME NEW STEPS AT THE BALL are these girls of a Wichita, Kan., high school, in preparation for their annual class fight with the girls from the rival high school. Juanita Wise, on top the ball supporting Maurine Johnson on her shoulders, is directing the practice. The ball, loaned by the government, was sent from Fort Leavenworth.

THE WEALTHIEST young lady in the world is cute little Baroness von Goldschmidt-Rothschild, above, who is heiress to \$100,000,000.

FOR SLEEP or swim these pajamas are going to be the class this summer. Jean Arthur, movie star, gazing at the horizon under this huge straw chapeau, gives us a beach pre-view of this natty striped creation.

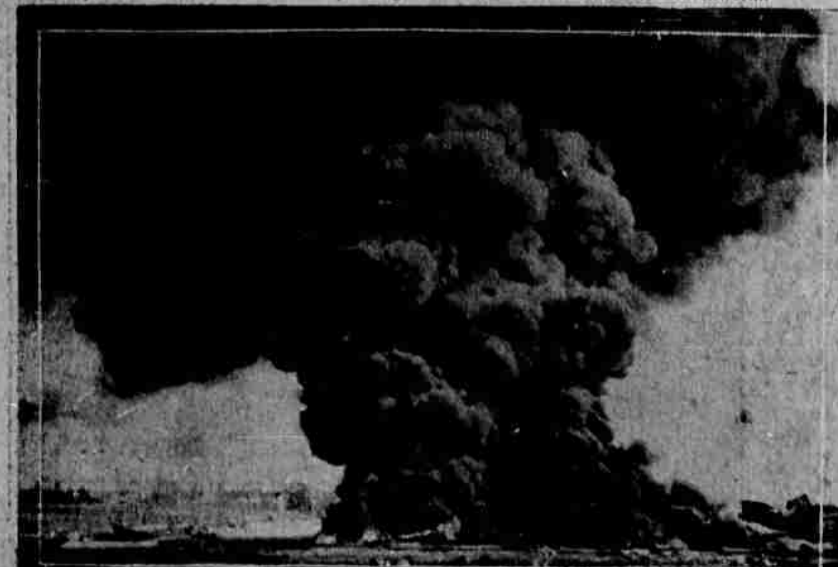

KEEPING PACE WITH THE PROGRESS IN AVIATION, the dirigible Los Angeles, pride of the United States Navy, is shown here participating in new aircraft developing bar of the dirigible in its first attempt to hook on while in flight. President Hoover saw this feat performed during the recent naval review off the Virginia Capes. A new invention, a portable stub mast, used to tow the Los Angeles out of its hangar, shown below in operation, makes it possible for 60 instead of 200 men to handle the giant ship.

"WHOOPEE LUPE" is what they are calling Lupe Velez, above, gingery star of the movies. Judging from the roguish look in her eyes you might think she has come right by her monicker.

CANADA'S PRIDE—This statue, depicting the Canadian doughboy as he appeared ready for action on the front lines, will be erected as part of a memorial to Canada's war dead. It is more than eight feet tall.

THE HARBOR—OF ALL PLACES TO HAVE A FIRE!—But that is what happened at Los Angeles harbor recently when a great quantity of piling and other tar-soaked logs ignited and provided a spectacular blaze. The smoke was so dense and black that it darkened the skies for miles.
