

22 UNIVERSITY STUDENTS FROM SOUTHERN OREGON TO GRADUATE FROM INSTITUTION COMING WEEK

(Special to Medford Mail Tribune) UNIVERSITY OF OREGON, Eugene, June 14—(AP)—Twenty of the 47 students at the University of Oregon, who form the largest graduating class in the history of any institution in the state, are from Jackson county. Eight of the candidates for degrees are from Medford, seven from Ashland, two from Grants Pass, one from Jacksonville, one from Trail, and one from Central Point. These students have been very active during their four years on the campus. They are:

Margaret Bacon Turner, who will receive her bachelor of arts degree, is a major in education. She is a member of Phi Beta Kappa, national scholastic honor society, and of Sigma Kappa, national social fraternity for women. Miss Turner is from Medford.

Geraldine R. Gardner, Medford, will receive her bachelor of arts degree in music. She is associated with Mu Phi Epsilon, national music honor society for women, and Phi Delta Theta, national social fraternity for women. She was also an accompanist for the glee club.

Marjorie D. Kelly, Medford, is to receive her bachelor of arts degree in physical education. She is a member of the Master dance group, Hermitian club, and the campus luncheon committee.

Cecile N. Cooper, Medford, will receive her bachelor of arts degree in music. She belongs to Phi Beta, national drama and music honor society for women, and Alpha Xi Delta, national social fraternity for women. She is also a member of the glee club and the Polyphonic choir.

Loren Beverly Egeberg, Medford, is to receive his bachelor of arts degree in chemistry. He is a member of Alpha Tau Omega, national social fraternity for men.

Henry Sheldon Fitch, Medford, will receive his bachelor of arts degree in zoology. He was a member of the cross country team of 1927 and 1928 and on the track team in 1928.

Evelyn M. Dew, Medford, is to receive her bachelor of arts degree in music. She is a member of Gamma Phi Beta, women's social fraternity, Phi Beta Kappa, national scholastic honor society, Mu Phi Epsilon, national music honor society for women, and Pi Lambda Theta, national education honor society for women. Miss Dew also is a supervisor of music in the Eugene public schools.

Arthur Schoeni, Medford, is to receive his bachelor of arts degree in journalism. He is associated with Sigma Pi Tau, local social fraternity for men, Sigma Delta Chi, national journalism honor society for men, Order of the O, Order of Emerald "O", and Priors, a senior class honor organization. Mr. Schoeni was the editor of the Daily Emerald 1929-30, and the manager

of the school this year and every effort has been made to make it a successful one. Mrs. Fred Wilmot is in charge of registration and all children of the valley from kindergarten to the intermediate age are invited to attend. Children will please bring pencils and writing paper to school with them.

Those unable to register last Friday will be accepted at the school on Monday morning.

PRINCE SENDS WORD TO SEGRAVE'S WIDOW

LONDON, June 14—(AP)—The Prince of Wales, who was much interested in the exploits of Major Sir Henry O. Segrave, who was killed yesterday in a speedboat accident, today sent a message of sympathy to Lady Segrave. It read:

"Please accept my deepest sympathy in your and the country's great loss."

SALEM, Ore., June 14—(AP)—An appropriately bound and printed copy of resolutions on the death of the late Governor Patterson was presented to Mrs. Patterson yesterday by the state board of control. The board went to the Patterson home at Eola, Polk county, where the presentation was made by Acting Governor Hamilton.

Rev. Carman Mell will lead the song service and the pianist will be Mrs. Robert Taylor assisted by Mrs. Abby Thomas.

Mrs. A. J. Anderson will have charge of the opening worship period each day.

Rev. C. B. Porter will have charge of the Habit talks assisted by Rev. Mell, Rev. Eaton and Rev. Iverson.

The Presbyterian Baptist and Christian churches are sponsoring

Robertson, Central Point; Arthur Schoeni, Medford. Fourth row: Margaret Turner, Medford; Paul Wagner, and Marcus Woods, Ashland.

PUBLIC WORKS CONSTRUCTION TO SHOW GAIN TO SECURE HOME

ROSEBURG, Ore., June 14—(AP)—At a meeting of the soldiers' home committee of the Roseburg chamber of commerce today it was decided to enter work upon securing the present state soldiers' home as the site for the proposed national home in Roseburg.

A bill now before congress voting \$2,000,000 is expected to be passed soon by the senate. The committee will come to Roseburg during the summer, according to present plans, to definitely locate the site.

SEATTLE, Wash., June 14—(AP)—Public works construction in the Pacific northwest is moving along at a rapid rate with every indication pointing to even greater activity during the next two months, a survey conducted by the Pacific Builder and Engineer, construction news magazine, revealed.

A total of \$40,125,286 has been spent on public works projects so far this year. This, the magazine pointed out, shows that the Pacific northwest is contributing its share toward prosperity.

During May, the survey showed, 179 public works contracts involving an expenditure of \$4,370,611 were awarded in this region.

Although Washington, Oregon, Idaho and Montana all let sizeable contracts last month, the June figures for the same states probably will be two or three times the May total, the survey indicated.

Projects on which bids have not yet been let will run into high figures during June. This month's awards for the Lake Union bridge in Seattle alone will total as much as the May figure for the entire Pacific northwest.

In addition to the bridge contracts, Pacific Builder already has listed 72 other projects on which awards will be made before July 1. They include bridges; Washington, 5; Oregon, 4; Streets and roads; Washington, 27; Oregon, 19; Idaho, 5; Montana, 2; Sewers and waterworks; Washington, 5; Oregon, 1; Reconstruction; Idaho, 2; Power plants; Oregon, 1; Street lighting; Oregon, 1.

Bids also will be received this month for more than 20 other projects which the Pacific Builder expects to announce as fast as plans are completed.

Grading, graveling and surfacing led the May contracts, with a wide margin, with 63 contracts, totaling \$2,957,065. Pavings and sidewalks came next with 47 jobs totaling \$748,626.

HAIFI, Palestine, June 14—(AP)—New excavations have been started by the Rockefeller expedition at Athlith, an ancient crusaders' fortress south of this city. Work has also resumed at the foot of Mount Carmel where remnants of prehistoric man were found last year.

UNCLE SAM TO STUDY HABITS OF COLUMBIA RIVER OF COLUMBIA GALLOWAYS WAITS CLARENCE KING OF COLUMBIA EUREKA KILLER

Largest River of West to Be Given Close Scrutiny by Geodetic Survey—Gather Data On All Angles of Stream.

PORTLAND, Ore., June 14—(AP) At The Dalles, on opposite sides of the Columbia river, two steel towers have been erected by the United States geological survey for the purpose of gaining more accurate knowledge of the habits of the great stream.

This equipment, installed at a cost of \$7,000, and paid for by the federal army engineers, marks the climax of 52 years of record keeping of the idiosyncrasies, habits, potentialities of the flow, a time record that stands first throughout the world.

Since 1878 the geologic survey has been gathering data at that point where the new towers stand, but the record was obtained through the use of small boats in midstream and the results were not as accurate as desired. Now, steel cables connect the towers, set 1240 feet apart, and a two-man cable car is swung from the line and may be operated from either shore high above the water's surface.

Suspended from this car by a long line is a meter that may be lowered and raised at will and which measures the speed and flow of discharge at all stages of flood. At low water the Columbia is 80 feet deep beneath the cables.

As the result of the charts made by the survey through more than a half century of observation much information is available for the vast watershed of the Columbia below the Snake river. Three studies of possible power development locations have been based on the survey charts and figures—Cascade Locks, The Dalles, and Umatilla rapids. The estimated horsepower at each side was determined in this way. Irrigation possibilities, flood forecasts and other more or less vital information is also obtained here.

The survey maintains 95 similar stations in Oregon, but the one at The Dalles is the largest and most equipped west of the Mississippi river.

The towers, each 56 feet high, were erected under the direction of G. N. Canfield, district engineer, assisted by B. S. Barnes, associate engineer, of Portland.

One unique feature of the towers is the aviation lights. On the cable crossing the river are strung four lights, while large signal lights which flash code letters surround each tower. The signals are equipped to turn off and on automatically at night. The station, it was pointed out, is on an air route and near a landing field on the Washington state side of the river.

With its new equipment the geologic survey will be able to record the temperament of the Columbia more accurately than has been possible to do before. The station was made possible through financing by the army engineers who will also gain valuable data.

Work was completed about two weeks ago.

SAO PAULO, Brazil, June 14—(AP)—The first recording studio for gramophone records in Brazil has been opened here. It will make discs of Brazilian music, both vocal and instrumental, and reproduce records brought from the United States in order to save duty.

To boost British empire trade an organization of trade delegates from every dominion is planned by the British Chamber of Commerce.

Win High Honors ECONOMIC MEET WESTERN UNIT AIRS FARM AID

Marketing Aid to Be Discussed at Sessions of Northwest Business and Agricultural Interests at Boise.

IDAHO FALLS, Idaho, June 14—(AP)—Western agricultural and business interests will analyze their economic prospects for the next three months at a conference here June 19 and 20, called by the western advisory board and agricultural council.

The discussions, both in their geographic representation and their subject matter, will extend beyond the usual scope of such a conference. Besides consideration of transportation needs, commodity output and price prospects, the program will include a new element—organizations under the farm marketing act—as well as a session on plant quarantine regulations and their effects.

To make room for these added features, the conference will continue for an extra day beyond its usual limit and representatives of a dozen states will be heard. Besides the five states included in the council, the deliberations will be joined by representatives of Oregon, California, Washington, Nevada, Arizona and New Mexico.

The operation of the farm marketing act will be discussed by James Webster, president of the Intermountain Grain Growers, Inc., who will pay particular attention to handling wheat and the advantageous location of grain storage facilities close to points of production. The effect of the marketing act upon the wool industry will be considered by Frank J. Hagenbarth, president of the National Wool Growers association.

Organization of the potato industry of the northwest will be presented by E. J. Iddings, dean of the college of agriculture of the University of Idaho, and the status of the National Potato Institute will be the subject of a report by C. J. Carlson, zone committeeman for Utah and Idaho.

C. A. Cole, secretary of the Oregon board of horticulture, will be the only member of that state to attend in an official capacity. He is scheduled to speak during the discussions on varied subjects.

CANBERRA, June 14—(AP)—The cornerstone has been laid here for a Roman Catholic cathedral to cost \$2,500,000. The ceremony was attended by Prime Minister Scullin and Commonwealth Treasurer Theodore, both members of the faith, and many church dignitaries.

Two-thirds of the area of the city and county of San Francisco is water.

BUENOS AIRES, June 14—(AP)—The Argentine Federation of Agriculture has asked the government to help relieve conditions in the rural districts by providing work on railroads and roads for unemployed farm hands.

The Japanese silk industry will continue the 20 per cent production curtailment for another year.

"I telephoned we would be there at six"

A COURTESY CALL

MANY disappointments—and sometimes embarrassment—result from "just dropping in" on folks.

A telephone call is so quick and reassuring that most people think of it not only as a courtesy due others, but a real convenience to themselves—and it costs little.

Anyone, anywhere, any time from your own telephone, or from public telephones conveniently located everywhere.
