Local and Personal

Water Too Warm for Fishing

The big fish are still waiting for the temperature of the Rogue river water to change, judging from a report which came Monday from the lower Rogue. A curious coincidence is noted in the fact that 74 miles from Gold Beach, the mouth of the Rogue river, the water at Foster creek is 75 degrees in temperature. Small fish are on the move, and the large ones are quiet, according to the report. No salmon are seen. The survey concludes that no movement is expected until the water temperature drops to 60 degrees. —Grants Pass Courier.

Johnsons Motoring South

Daily Book Review

MARGARET YORKE
By Kathleen Norris

The story of a woman who married in haste and wrecked her happiness and that of those closest to her. It tells how she picked up the pieces and began again. It portrays the developments against their own wills of a great love between a man and a woman. Margaret Yorke, when Stanley Crittenden falls in love with her, is not the quiet little social secretary of whom his rich aunt has grown so fond, for she is a woman with something to hide. How she protects herself and why she finally makes the man she loves a full confession, makes one of Mrs. Norris' most dramatic romances. Price $1 or get it for a nickel from our Rental Library.
