## Daily Book Review

### HEART OF THE NORTH

By William Byron Mowery

Aeroplane, machine guns—all the equipment of modern science are used by the modern Mountie to get his man in this swift-moving tale of the Canadian woods. This whirling of wings over the muskeg, the drone of planes over the age-old forest, heightens the excitement of this one-man fight against a gang of bandits who hold up a Mackenzie River steamer for its load of gold. Over the northern wastes the pursued and the pursuer pass in a breathless adventure of the frozen wilderness—a vivid and authentic picture of the north woods. Price \$1 or get it from our Rental Library to read for a nickel a day.
