

For the NIGHT FLYER "LIGHT" SPELLS "SAFETY"

Through dense darkness, through fog and rain—the mail must go; service must be maintained—and the pilot at the control of the speedy mail plane and the giant motor-transport depends a lot on LIGHT—It keeps him in his course and helps him to safely land his precious cargo of passengers and mail. The era of the air is here! Communities abreast of the times are air-minded—they are welcoming the age of air transportation and reaping the prosperity it is bringing—they are encouraging it with safe landing fields—and modern airport facilities. Government beacons light the path of the airways . . . In this great age of the air, LIGHT is playing an important part . . . This company is proud of the part it is playing in the air development of southern Oregon and northern California. We point with pride to the fact that we are furnishing service to 35 government beacons and 10 airports and landing fields in the territory which we serve!

Celebrate the Dedication of Medford's \$120,000.00 Municipal Airport Monday

Tomorrow, the people of Medford and southern Oregon will participate in the dedication of Medford's new airport which has been completed at a cost of \$120,000. The Northwest Air Tour will land in Medford on that date and an afternoon and evening air circus will be staged. All "Cope-land" is proud of the achievement of Medford's fine airport and will wholeheartedly assist the Legionnaires of Medford Post 15 in assuring the success of tomorrow's dedication.

The California Oregon Power Company
