Not A Cheap Help But Safest For Deep Coughs

Creomulsion is not the cheapest help for coughs from colds. It is made to do the utmost, whatever the condition. It combines in one prescription seven of the world's best helps.

It is made in particular for coughs from colds which hang on. There is where one dare not risk a help of lesser value. But is it wise in any cough to trust a less effective help?

Creosote is in it, blended, emulsified and tasty. In an ideal way it presents the supreme help for soothing membranes and combating cold germs.

But there are also white pine tar, wild cherry bark, menthol, ipecac, etc. Each is best for some coughs. Here we combine all major helps to fight coughs to the limit from the start.

Because of this expensive combination, Creomulsion costs a little more than lesser helps. The price is $1.25, but your druggist guarantees it. He returns your money if you ask for it.

A three-day cough is a danger signal. There you must use Creomulsion to be sure. But is it wise to trust any cough to lesser help when the utmost is at your command? You never know where a cough may lead. Treat it with the best men know.
