

GRAFT FOR ENGINEERS OF SOVIET

Trial Reveals Old System Not Dead in Russia—Arch Plotters Tells Passing Industrial Secrets to French Officials.

MOSCOW, Dec. 2.—(AP)—Leonid Ramzin, "arch plotter" of the eight men on trial here for working to overthrow the Soviet government, today told how he and his men spied on Soviet industries and passed their information along the devious channels to the officers of the French general staff.

This happened in the trial where the four judges ruled only a few days ago there would be no more mention of "friendly foreign governments."

Through the mysterious agents identified by the letters K. A. and K. said Ramzin, he and his associates passed every kind of information they could about the Soviet industrial development to a "certain French institution in Moscow."

The itching palm of political graft stretches out even in Soviet Russia, another of the eight testified today.

"Bribery and graft are second nature of the engineers with whom I worked in this plot to overthrow the government," said M. Kupriyanov, one of the defendants. "The industrial party group with which I was associated got 50,000 rubles in one year as a rakeoff from foreign concerns in a purchase of cotton machinery."

LITHIA HOTEL IN CHAIN IS REPORT

ASHLAND, Ore., Dec. 2.—(SpL) Many rumors relative to the new management of the Lithia Springs hotel are afloat, none of them verified. B. R. Westbrook, who has been manager for the last 21 months, leaves tomorrow, and no new manager has reported.

STORY 1 (Continued from Page 1)

to more fully rid the country of criminal aliens was urged.

Another matter placed in the category for later determination was a recommendation to authorize federal building of secondary postal facilities, to prevent "further uneconomic leasing."

Taking the position that the tax on capital gains enhances speculative inflation and impedes business recovery, the president advocated an inquiry of the economic effects of the tax and its general relation to income tax law.

Still another study proposed would be directed to the workings of the anti-trust laws to determine if economic evils attributed to their operation "can be remedied without sacrifice of the fundamental purpose of those laws."

STORY 2 (Continued from Page 1)

straight for mountain country. A survey was also made from Diamond lake to Crater lake. The present road is a one-way road, winding over the sand and through the jack pines, and a good road, it is felt, would increase patronage at both spots.

Boon to Tourists Another semi-federal road project on the list for this area is the Tiller-Trail route. Douglas county recently voted \$20,000 for improvement of this road, and the Trail district, by special road levy recently set aside \$500 for its improvement.

The road, on a government survey, is passable even now, and has several advantages. It shortens the distance from Portland to Crater lake about 30 miles, and on the trip north eliminates the winding grade of Sexton mountain, coming out at Canyonville.

As soon as the 1931 budget is definitely approved, the work of mapping out a road program for the county will get underway. Oiling of many country roads will be an important item.

The present membership of the socialist party in Great Britain is now about 2,100,000, where as in 1920 it was 4,355,000.
