Singley G. Jewett of Portland, predatory animal control chief for the government's biological survey, reported to his office here yesterday that receding waters of Milheur lake in castern Oregon have uncovered more than 46 burfalo skeletons. The discovery was made by Vernon Bailey, government naturalist.

The skeletons have been hidden by the water for at least 15 years lailey said. They were found in groups, indicating, he believes the animals died in partial herd formation.
