**For Hard Coughs That Call For Super-Help**  
Creomulsion is made for coughs when colds that hang on. For coughs deep and difficult—coughs where you dare not risk a less effective help. Be careful people—use it for coughs which seem mild—use it to the utmost and be safe. For no-body knows where a cough may lead. Creomulsion combines seven major helps in one. Some coughs yield best to one help, some to another. Doctors often differ on the best help, for coughs are not alike. So here we combine all the best—to be sure. Creosote stands first. Here it is blended, emulsified and made palatable. For soothing membranes and combating germs, it is considered the supreme help in this type of cough. But other helps are sometimes needed—pine tar, wild cherry, menthol, ipecac and others. Nobody can tell to which help your cough will soonest yield. So experts have combined in Creomulsion all best helps in one. No narcotic, nothing harmful to a child, but a seven-way help to deal with all conditions. The price is \$1.25—a little higher than a lesser help. But your drug-gist guarantees it. Your money is returned if it fails to bring the quick, complete help you desire. Don't you think it worth that little extra to be sure that you are doing the most for a cough? **CREOMULSION for Difficult Coughs from Colds**
