The new depth drained the water of shallower wells and trouble followed.

COLLEGE FUNDS GAIN APPROVAL OF COMMITTEE

SALEM, Ore., Feb. 25 (AP)—Approval in full of the appropriation asked by the state board of higher education for the five institutions of higher learning and refusal to rescind previous action consolidating the board of child labor inspectors and the industrial welfare commission with the state board of labor were the outstanding features of the ways and means session last night.

E. C. Sammons, member of the education board, was before the committee the second time, and while being grilled by committee members informed them that faculty members in the Oregon institutions are paid lower salaries than the average, not only throughout the United States but on the Pacific coast.

Lauds University

Sammons lauded the University of Oregon for standing third in the United States in the extension service carried to adults.

"That's just the trouble with us," rejoined Senator W. H. Strayer. "It sounds nice and it is nice. But we've got a champagne appetite on a bear income."

The estimated requirements of the five institutions from tax sources for the biennium total \$6,115,073. Of this \$1,231,170 is requested by direct appropriation and the remainder comes from the millage taxes fixed by law. The requested appropriation includes \$50,000 for a training school at the La Grande normal schools to be supplemented by \$80,000 raised locally.
