For the Children's Sake Buy Good Bananas

Bananas are the most wholesome of all fruits if of proper quality—if not—well, the following is from the Encyclopedia of Foods:
"The best bananas are the full plump fruit—If the fruit is thin or flat-looking it was probably cut too soon and thought it may ripen and become yellow it will never attain the flavor and delicacy of the properly developed fruit.
"A plump sound banana ripened is as wholesome as it is delicious and as readily digested as any other fruit. The greater part of the nutriment in ripe bananas is in sugar form—otherwise in starch as in raw potatoes."
To feed children improperly ripened bananas is dietetically the same as feeding them raw potatoes and because of the tendency to improperly chew bananas may create digestive disturbances."
There is a lot of difference in bananas—three grades in fact: 1st, 2nd and culls. Tomorrow we show the finest first quality bananas—beauties—in fact just right for the children.
