Ordinary coffees are roasted in bulk—several hundred pounds at a time. Therein lies the cause of a faulty roast. For it is impossible to always roast each big batch to the same degree.

Hills Bros. Coffee is packed in vacuum cans. Air, which destroys the flavor of coffee, is removed and kept out of these cans. Ordinary "air-tight" cans won't keep coffee fresh. But Hills Bros. Coffee is always fresh! Order some today. Ask for it by name, and look for the Arab trade-mark on the can.
