Yes, Mr. Shaw, We're Learning. A Smart Young Girl. Mr. Steuer, et al, Go Flying. To Him That Hath.

Copyright King Feature Synd., Inc.

George Bernard Shaw tells the world that Russia is "the ablest and most enlightened government in the world."

H. G. Wells, who knows more about the real world than Shaw has ever known, even when he was young and doubted his infallibility, says Russia may not get on her feet "because she has produced no body of managers, no body of educated men, free, able and willing to work together.

"An ego-centered autocrat with a political party disciplined to death, a press bureau and secret police is no substitute for that."

Russia imports her managers from America and Germany, but that does not mean that she will never produce her own.

Shaw says an American gangster in Russia "would have as much chance of survival as a rat in a yard full of terriers." Mr. Shaw does not know the American gangster.

Mr. Shaw observes that America kills you for committing murder, kills you for committing murder, and praises you for making money; that in Russia they kill you for making money, and put you in jall four or five years for committing murder. If that's so, the Russians that the following the family and analysis of the state of the control of the track of the control of t and praises you for making money; murder. If that's so, the Russians

Shaw says Americans should face the stupendous possibility that the United States may have something edifying to learn from Russia." Possibly America could learn some-

thing from Timbuctoo, as the hare learned something about racing from

At present the whole world is busy learning. Russia is learning from americans how to organize industry, and American industry and finance are learning from their own mistakes how to avoid similar mistakes in fu-

When Russia has a group of hundred-time millionaires and an occasional billionaire, like ours, money will go to their heads as it went recently to the heads of our big men and small stock gamblers.

FENCED TO TAKE COIN OF CURIOUS

Clarksburg Spot Where Women and Children Met Death Leased for Sideshow - Officers Search

CLARKSBURG, W. Va., Sept. 1.— (AP)—County officers found a board tence erected along the highway in ront of the "slaughter farm" at Quiet Dell when they went there this morr ing, and a man was selling tickets at the gate.

The fence was erected by an enter-prising man who expected to profit

from the curious who have thronge to the place since the bodies of two women and three children were found there. Twenty-five cents was charged for admission of adults and 15 cents for children.

Two workmen at the farm said the I wo workmen at the farm said they were hired by a man named "Kin-cald," and the fence was completed at 5 a. m. today. They said "Kincald told them he had leased the property." Sheriff W. B. Gimm told the workmen to find the man and direct him to report for questioning

CLARKSBURG, W. Va., Sept. 1 .-(AP)—The nation was scoured today for trace of women with whom Harry P. Powers corresponded, to learn if more yielded to his lures of wealth and social position, and died as did Mrs. Asta Eicher of Chicago, Mrs. D. P. Lempke of Worcester, Mass., and

P. Lempke of Worcester, Mass., and Mrs. Elchor's three children. Officers here checked and re-check-ed papers found in the possession of the pudgy 42-year-old student of "sci-entific crime," and admirer of Ru-dolph Valentino. In Detroit, headquarters of a correspondence agency
Powers used, records of the agency
were sought for further clues.
Continue Diging.
Meanwhile digging progressed about

the Powers death garage near here, for trace of any further victims there might be; court officials discussed the possibility of a special term of court to try Powers for the five killings he had admitted, and interest heightened to the court of the co in the suggestion that Powers migh have been responsible for the mys-terious alaying in Washington of Mary Baker, navy department clerk. Search of an old well near Powers'

garage revealed no further bodies yes terday, but police were not satisfied. Still doubting Powers' statement that the five he strangled and best to death "are all there are," they dis-cussed plans for using a steam shovel to tear up the screage about the place, and prepared to search the bed of a nearby creek.

GRAF WELCOMED

PERNAMBUCO, Brazil, Sept. 1 .-(AP)—The Graf Zeppelin arrived at Pernambuco at 5:25 p. m. today (12 p. m. E. S. T.) completing its non-stop flight from Friedrichahafen, Ger-

nany. The big dirigible flaw over Per-

eople cheered. The airship, illuminated and flying low, proceeded southward to be moored at the landing field, eight miles from the city,

New Scientific Eye Finds All Elements

By Howard W. Blakesice

(Associated Fress Science Editor)

BUFFALO, N. Y., Sept. 1.—(AP)—A
new scientific eye which combines
speed of light with magnetism to
detect elements as infinitesimal as
one part in 100 billion was described
to the American Chemical society

The light is practically extinguished in the magnetized liquid by the
elements therein. But each element
takes a different fraction of time to
do the sauffing out and so reveals its
presence.

It is possible for example to detect in our foods very minute quantities of metals which until recently
were not known to be a content of

PINCHOT ASSAILS FARM BOARD AS A COSTLY LEMON

Pennsylvania Governor Urges Farm Industry Be Placed On Economic Equality With Others

SEDALIA, Mo., Sept. 1 .- (AP) -- Assailing the federal farm board as "that huge and costly lemon," Gov Gifford Pinchot of Pennsylvania, said in an address here today that the "welfare of America depends upon justice to the American farmer — justice as the farmer himself understands justice-and not some allegestance justice—and not some alleged panances devised by men who neither know his problems nor comprehend his point of view." Addressing the annual convention of the Missouri Farmers' association

Gov. Pinchot urged the farm indus Gov. Findow urged the farm indus-try "be placed on a basis of economic equality with other industries." He said the farmer, "for years the or-phan of American politics, should be taken into the family and have a coice as to what type of relief should be attempted. Tariff Detrimental

Tariff Detrimental
The present tariff, he charged, is
detrimental to the farmer; he said
he believes in the equalization fee,
and thinks the debenture plan "unquationably has its merits."

quationably has its merits."

The Pennsylvania governor, discussed as a possible candidate for the republican presidential nomination next year, criticized the railroads for seeking to increase freight rates at a time when the farmer "already is overburdened." The cost of distribution of the property of the cost of distribution of the cost of distribution of the cost of distribution of the cost of t overburdened." The cost of distribu-tion of rarm products, he said, is twice as high now as it was before the World war.
"There are too mony profits be-tween producer and consumer." he

"The middleman regularly pays

said. "The middleman regularly pays
the farmer too little and charges the
consumer too much. And he does it
on the war-time basis, when wheat
was selling five times more per bushel than it has been sold this year."
Not Talking Politics
Gov. Pinchot urged the farmer and
city laborer to stand together but
added he was not "talking about political control, and I do not refer
to a third party. On the contrary, I
am talking economic control for the
greatest good of the greatest numgreatest good of the greatest num-ber, which is the object of all gov-

ernment."
The problem of farm relief, he said, has been dealt with in congress not as the farmer wanted it handled, but handled. * * * The farmers asked for the equalization fee. They saked for the departure plan. Instead they were given the huge and costly lemon, the farm board, for which they did not ask."

Aerial Speedsters Reach New Velocity

MACHINERY NOW SERVES PUBLIC

This Issue First to Be Printed and Produced by Newly Added Modern Mechanical Equipment

This issue of the Mail Tribune is published upon its high speed Duplex Tubular Rotary press, which will bring to readers and advertisers faster service, clearer reading type, and all 'he advantages that come with modern newspaper mechanical equipment.

The installation of the press is part of the \$50,000 expansion program of the Mail Tribune. Other new and modern equipment includes a Lud-low machine, Monotype material mak-ing machine and a complete atereo-typing department and machinery and new Ludlow type from new Ludlow type faces.

new Ludiow type faces.

Local carpenters, electricians and workmen have been engaged for the past month erecting and providing for the new machinery. In operation, the Mail Tribune now has one of the most complete mechanical departments in the northwest.

Other machinery installed includes

ments in the northwest.

Other machinery instaled includes a two-speed matrix roller, plate finishing machine, water-cooled plate caster, and minor, but none the less important, machinery.

With the new pross, the Mail Tribune is able to print in colors, and cheetly will apply the exercise content.

bune is able to print in colors, and shortly will publish its own comic strip section in that manner. Addition of the new machine brings a radical change in the daily con-struction of the Mail Tribune. Read-ing matter and advertising, as of old, is assembled in forms, but there the similarity ends.

The forms are "tuatified," after

similarity ends.

The forms are "justified," after which they are placed in the matrix making machine. This powerful contrivance, weighing 7,500 pounds, extra a pressure of 30 tons of the square inch. A "form" of type is placed in the machine, and the "matrix and seconds later with the emerges 30 seconds later, with the entire page deeply impressed on the

aurface.

The "mat" is then curved upon an electrically heated cylinder known as "the scorcher," which dries every particle of moisture in the mat. This completed, the curved mat is placed

completed, the curved mat is placed in the plate caster, metal heated to between 600 and 700 degrees is poured into the caster, making a cylindrical plate, on which the type and advertisements stand out in bold relief. This process over, the plate is placed on the plate inhishing machine, and made ready for the press cylinders. The ends and sides are bevaluated the center borset. Accuracy

dera. The ends and sides are bereld and the center bored. Accuracy
down to the thousandth part of an
inch is required in order to fit perfectly the press cylinders.
The plates are now placed on the
press and adjusted and tightened.
Once in operation, the press grinds
out 30,000 copies per hour, neatly
folded and counted in piles of 50.
Sixteen pares can be printed as a

REVERLY HILLS, Sept. 1. Not much news over the week-end as we look at news nowadays. Flood in China drowned a million. We take that with as little concern as a New York gang killing or the 50 people killed in autos over the week-end. Mr. Mellon in the headliner, borrowing one billion, one hundred million at CLEVELAND, Sept. 1.—(AP)—New high regions of speed for land planes were reached at the national air races today by Lowell Hayles of Springfield, Mass, when he drove his Gee-Bee low-wing monoplane on speed dashes past the grandstands today.

With the wind, in a mile dash, be attained 286.85 miles an hour, and sgainst 264.9. This is faster than the world's record of 278.8 miles an hour and an official record, however.

Bayles made the speed dashes to qualify for the Thompson trophy race mest Morday, the high speed event of the air races.

Lieutenant Thayer Olds of Wairen, 3 per cent. Could have got it at one and a half but wanted to give the boys a break. This means they are going to financial rection.

Oliver Modard of Lake Wood. Onlo, fractured a leg in the crash of his fractured a leg in the crash of his fractured a leg in the crash of his rections and Morard low control when the ruider of the craft broke. The plane was the fourth and most serious of the races.

A strong wind blowing across the field made glider flying difficults.
