and caused Copco to start building a little below the state line.

Of even greater importance is the coast road now nearing completion, a project which only a few years ago was considered only a wild dream until B. F. Jones came out and stirred up the animals. The entire coast region from Sonoma county to Astoria will do all in their power to draw traffic to their road and belittle the Pacific highway. There will be several cross roads from the coast to the Willamette region and all heading for Portland. The prospect of getting funds for this section is dark indeed. It is a well-known fact that every home-seeker that can be coaxed to locate in the state by Portland organizations will be settled in that trade area. After one road to Tillamook will be two or more, more settlers, more small gardens, berry, chicken and goat farms. More job hunters clamoring for work, more voters for the political machine, more trade for Portland stores including "the big store." Why spend money on a mountain 340 miles away, with no promise of returns.

Eastern Oregon also wants more roads. Bill Hanley knows his onions as well as he knows Oregon and if any crumbs fall from the Portland table, he will get them.

To the Editor:

It appears from a recent editorial in The Mail Tribune that you are not much pleased to see Portland horsewoggle a lot of the highway funds for building new speedways to Tillamook before the Pacific highway over the Siskiyou has been rebuilt or modernized.

In this matter the metropolis did not act strange or unnatural in any way, just played the game the way she has always played and in fact the way many county seats play it: To the victor belongs the spoils. To build the best roads around the capitals where most voters and taxpayers are located and did not the voters at last election cause the removal of the state government from Salem to Portland? In return of which we got free power, got rid of our local highway commissioner

and caused Copco to start building a little below the state line.
