Hurricane Hurls Whales Against Side of Vessel

BOSTON, April 7.—(AP)—The wind blew a hurricane, it rained whales and the animal cargo of the good ship Hagen were seasick.

So reported Captain Paul Winhorse today when he docked the Hamburg-American steamer, three and a half days overdue, after a stormy passage from Germany.

For five days, Captain Winhorse said, the vessel battled hurricanes and gales. During the height of the storm, he said, the gale shrieked at 100 miles an hour.

At this point, the skipper reported, two great waves met from opposite directions directly ahead of the ship and spotted into the sky to a height greater than the masts. As the waves broke, tons of water thundered aboard the Hagen and the captain feared the vessel was being torn apart. Scores of whales were seen to be caught in the maelstrom, the captain said, and several were thrown against the steamer.

The Hagen bore evidence of her difficult voyage in two splintered life boats, several shattered doors and bent and twisted iron rails even as high as the upper bridge.

One of fourteen monkeys shipped aboard the Hagen gave up his human ghost in the throes of seasickness. Two young elephants were violently sick during much of the voyage.

Our 1932 Plan

The manufacturing cost of the various brands of Quality tires is very much the same.

To give you better Tire Values and better prices, a saving had to be made somewhere in the manufacturer's cost of putting tires on the Independent Merchant's Shelves.

To accomplish this we added the buying power of a number of Southern Oregon dealers to that of our own and found that in making a direct factory contact, buying in quantity shipments for our combined requirements, costing the factory only ONE BILLING, SHIPPING, ADVERTISING, SELLING, and COLLECTION CHARGE for this entire territory, we could make a material saving in price.

We are passing this saving on to you as shown in the following prices. This is our effort as Independent Dealers to give you the best possible value for your money.
