

TO START WORK SECONDARY ROAD IN SAMS VALLEY

The county court, as soon as the state highway commission approves of estimates submitted, will order work started on the Sams Valley secondary road to give employment to residents of the district through which the road passes. It will cost \$27,000. This sum is furnished by the state but the work will be under the direction of the county court. In this way employment is furnished county residents. Had the work been done by contract, the choice of labor would have rested with the contractor.

The county court has secured the right of way and arranged all other preliminary details so that an early start can be made, weather conditions permitting. From 20 to 30 men will be employed and the job will last once started, for two or three months. County Engineer Paul Rynning said today that balances of special road levies not collected last year were now coming in better than expected and that several special levy road jobs would be completed the coming summer and would furnish work for a small number of men residing in the districts. It will be the policy of the county court to give the work to residents of the district where the road is being built. Completion of projects started last year and included in the new program are: McLeod bridge road, near McLeod; the Connelly road, in the Butte Falls district; the Ulrich road, in the Prospect district, and the Edmundson road on Rogue river.

It is expected that the \$20,000 budgeted for work on the Lake Creek and market road and the Dead Indian

WEATHER BRINGS CANCELLATION OF HEALTH PROGRAM

The Health Honor Roll program, scheduled for Thursday in the city park, has been called off because of the rain. Miss Ruth Swanson, school nurse, announced this afternoon.

In its place short observances of the completion of another year in health work will be held in the various schools for the children participating in the health program.

The children will be presented with Health Honor Roll pins. The cup will be awarded the school having the highest per centage health chores completed and a banner will go to the school with the highest number of boys and girls on the Health Honor Roll. They will be presented in the schools and no public program will be held as a grand finale to the Health Honor Roll year.

The children have expressed great interest in the health work throughout the year and accomplished great progress. It is hoped that the change in program, necessitated by the weather, will not prove disappointing to them. Miss Swanson said this afternoon, in promising the pupils a jolly time in each school, when the awards are presented.

market road will be available so as to give a small bit of employment. Nothing definite has been decided on these projects.

Some of the road program work consists of dirt, and some rock, and some will require graveling.
