Building Grange Hall — Construction of the new Grange hall at Lake Creek is progressing well, members of the farmers organization announced here today. The foundation is now being laid and the Grange groups are anticipating a good year in the new building.

To Entertain at Craterian

Royal and Carl Atkins, "The Boys of Yesterday," coming tomorrow to the Fox Craterian.

They are known as "The Boys of Yesterday," and they have pedaled their unique and ancient tandem bicycle over 6000 miles through various states of the union, appearing in leading theaters and singing over outstanding radio stations. Royal and Carl Atkins, widely known entertainers, are the typical "hill-billy" type, although hailing originally from Bellaire, Michigan. For some time, they were featured over the ether waves in the state that manufactures most of our motor cars, but last August they began their mile-eating trip, which has taken them through over half the nation's commonwealths. Their principal form of entertainment consists of a musical saw and a harmonica, and in their smile-provoking costumes, together with their trusty tandem wheel, they will appear upon the Fox Craterian theater stage tomorrow and Saturday as a special added attraction in conjunction with the screen showing of Warner Baxter in his newest film hit, "The Amateur Daddy."

prior to their departure immediately after their local theatrical engagement.

These two happy-go-lucky performers arrived here from California, where Governor James Rolph entrusted them with a letter to be delivered to Governor William M. Rucker of Michigan, to be presented at the national cherry festival next July, at Travers City, Mich.

Ben Hur To Show On Big Screen At The Holly Friday

Holly patrons will remember the thrilling scene in "Hell's Angels," where Zepplin appeared through the crowds and also the terrific "dog fight" with dozens of planes. These scenes shown on the Holly giant magni-life screen were considered the most thrilling ever shown on a local screen. But even greater thrills are in store for Holly patrons who attend the theater Friday and Saturday to see the triumphant return showings of one of the greatest pictures of all time, "Ben Hur," now greater than ever with sound effects and musical synchronization. Probably the two outstanding scenes are the chariot race and the sea fight. The Antioch chariot race is without doubt the most spectacular sequence ever shown in any motion picture, while some idea of the magnitude of the sea fight between the Romans and the pirates may be gained when one realizes that the construction of 100 ships was necessary for this one scene alone. These two magnificent

sequences, as well as others, will be shown on the Holly giant magni-life screen, thereby offering the theater-going public the greatest thrills in the history of pictures in the city of Medford. The Holly giant magni-life screen is three times the size of the regular screen and is perfect for mass scenes where the entire screen is filled with characters and action. Tomorrow night, James Stewart, baritone, will be heard on the Holly stage in a song presentation in observance of National Music week. "The Big Timer," with Ben Lyon, closes tonight.

Lewis in City—M. R. Lewis of Corvallis, irrigation engineer of the Oregon Experiment station, arrived here this morning from the north to spend the day with local experiment station workers. Mr. Lewis plans to leave by train this evening for Portland.

The FINEST TIRES FISK Has Ever BUILT

Here are two Fisk Air Flight Principle Tires that are far superior to any tire your car has ever rolled on.

Just as different combinations and shapes of metals reduce the weight and increase the strength of your modern car, so an entirely new and different combination of cords and rubber in tire design and tire construction, patented and exclusive methods, have produced a tire of excess strength without excess weight. The Fisk De Luxe and the Fisk Rugged, embodying all the improvement which the exclusive Air-Flight Principle brings to Fisk Tires offer you a superior type of service than you have ever before received from any tire, regardless of make or cost.

The FISK All-Cord Process

Note the even regularity of Fisk All-Cord and the distortion of Ordinary Cord.

The reason for this difference is that Fisk All-Cord has no cross threads, instead each cord completely surrounded and insulated with rubber, runs parallel to the next; preventing that continual chafing and friction which is always present in ordinary cord fabric. The flexibility of Fisk All-Cord is even at all points while the flexing ability of ordinary cord differs widely. Flexibility is absolutely necessary and the tire with the greatest flexibility is the one which offers the greatest resistance to road strain and bruises.

No other make of tire can offer you these exclusive Fisk features.

The Seven Points of SUPERIORITY of Fisk Air Flight Principle Tires

- 1 Larger Air Chamber
- 2 All-Cord Process
- 3 Multiple Cable Bead
- 4 Increased Flex Area
- 5 Stream Line Tread
- 6 Greater Road Contact
- 7 Air-Flight Balance

Trade in your present Tires. We will allow you full value for every mile left in them.
