Ye Smudge Pot

By Arthur Perry
Jumping at conclusions and missing things is still the favorite sport in these parts.

State control of liquor is favored by the Democratic leaders, as a cure for the prohibition mess. There are 48 states in the Union, so only nine less than 57 different varieties of perpetual trouble would result, from state control of liquor.

John Hughes Curtis of Virginia, who lied so glibly to raise false hopes in the Lindbergh kidnaping story, owns a faculty and is a sorry and pathetic figure.

It is rather a sad commentary upon the type of character that our modern Babylons have created—for only in the largest cities have such needless tragedies been found.

It is interesting to note in the list of these casualties, that not one of them represented the pioneer type, only three of them could even be called self made men.

By and large they were all of the second or third generation.

Asa Toll, who did no work for 30 years, moaned yesterday he had not worked for a year, and was unable to find any.

The high school graduating classes are charging "forth into a chaotic world, bordering on anarchy, and full of enemies," according to a bit of offhand advice and warning, hurled at the graduates, voluntarily.

C. Von der Hellen of Wollen township, Thura, has had a handful of wild, or Washington lilies. They have large stems, and furnish a clue to where some of the Von der Hellen asparagus originates.

Oregon, according to a recent survey, is seventh among the states in general culture. It would be interesting to know how the state stands, when it comes to becoming infatuated with fool political notions.

A number of the new autos have a ragged coat elbow, sticking out the window next the steering wheel.

THE MUFFLED KNOCK (Greenview Items) Ladies' Aid society met at the home of Mrs. Emma Carlson last Wednesday. A very good time was had, as all the members, except one, were present.

A veteran tobacco-chewer was encountered yesterday, with no sneers for cigarettes.

Portland has \$22,000 invested in voting machines, which are never used because the metropolitan voters are unable to manipulate the levers, etc., correctly. Maybe the guilt could be bridged if the voting machines were equipped with foot-pedals like a 44.

Some concern is expressed among the Older Girls, for fear there will be no summer. They are behind with their feasting, about how hot it will get.

There has been a tax on dogs for many years. Why not tax cats? (American Medical Journal. When the heavy battling will really start.

Bill Bolger is the bouncing papa of a proud girl who will be high school senior in 1935.

A man strolled up from the north-end of the county seat, and confessed he had been deceived by a candidate's mathematics in the deceased primary and thought the people should start to Hoopsey.

Another gent we expected to drive to the poor farm ere long, is navigator of one of the late, unpopular priced 1932 automobiles.

Str Henry Irving had the worst scrawl on record. (Literary Digest.) Not counting the writing in one of the Jackson county election books.

Heiman Bathis, Ash—Ewin and tub Drj Slabs \$1.00 per tier. You haul 'em. Medford Fuel Co.

Quitters

TWO HUNDRED wealthy men in New York and Chicago have committed suicide the past year, because of financial reverses. In 90 percent of the cases sufficient funds were left to have kept the deceased in comfortable circumstances, for many years.

Why did these men end it all? The answer we believe, can be found in the following extract from one of the farewell notes:

"My fortune is gone and I see no hope of regaining it. Far better not to live at all, than to struggle along from hand to mouth as a failure."

To this man, living in a very modest way, with a roof over his head and enough to eat, but without cars, servants, clubs, etc., etc., represented failure.

Success in life, in other words, had come to mean money—lots of money. He had become an important cog in an entirely artificial world, and when that world crumbled, could see no world left that could repay continued struggle.

THESE men would no doubt have vehemently denied it. Nevertheless it is quite true, that the spring of their desperate action, was vanity—vanity and nothing more.

It was not what they WERE that really mattered, but how they would APPEAR. It was not the real world that mattered—the world of grass and flowers, the world of music and loved ones, the delights of hard work and useful service,—but only that world of steel and stone, of stocks and bonds, of show and glamour, which the passion for riches had created.

In other words, it was merely a repetition of the age old tragedy of building one's house upon the sands,—the shifting golden sands of sudden fortune—instead of upon the rock of character, of genuine achievement, the simple enduring satisfactions of human life.

True the world wide depression, destroyed that house of cards, which a period of sudden affluence had created. But only cardboard men needed to go down with it. For the real world remained,—and a WORLD IN WHICH THERE HAS BEEN NO DEFLATION!

THESE men indeed, had far more to live for in a material way than countless thousands, who take joy and pride in living. They were not faced either by want or starvation, merely by the necessity of going without certain luxuries, abandoning certain habits and standards, to which they had become accustomed.

IT IS rather a sad commentary upon the type of character that our modern Babylons have created—for only in the largest cities have such needless tragedies been found.

It is interesting to note in the list of these casualties, that not one of them represented the pioneer type, only three of them could even be called self made men.

By and large they were all of the second or third generation.

Why Squander?

SHODDY goods are expensive—in the long run, and the run isn't so long as you may think. A woman who buys a tawdry cotton blanket because it is a few dollars less than a wool one is squandering her money—just at the time when she probably can least afford it. The wool blanket will last twice as long and give twice the warmth,—for just a little more money. So why be extravagant and buy the shoddy article?

This also goes for a shoddy coat, or suit of clothes, which will begin to wrinkle, bunch and shrink a few days after it is out of the shop. A well made one of good stout materials will do for years, and costs only a fraction more.

EVEN more so is it true of food, which should be bought not for bulk to fill the stomach, but for the nourishment it contains. A cheap cut of meat from an old, tough animal isn't economy. More than half of it must be trimmed away, useless sinew and bone,—into the garbage pail. Of course partially decayed vegetables are cheaper than good ones—bulk for bulk. But dollar for dollar, you are buying much less nourishment.

Quality merchandise today, as every store keeper knows, has dropped in price much more,—proportionately, than tawdry stuff. This is because the depression has brought to the American people an hysteria for cheapness—the demand for quality merchandise is proportionately less.

THE American people today are squandering millions of dollars in tawdry food, tacky clothing and flimsy merchandise—which must be replaced after a short period of use. The man or woman who is really economizing today is the one who is counting the values as well as the pennies, demanding real worth out of every dollar spent.

It isn't a matter of patriotism. No one is urging you to spend your money in order to save the world from dire calamity. Be selfish—buy quality merchandise and save money this year.

—W. A. W.

Kaiser Wilhelm II Tried Victoria's Self Control

LONDON, June 3.—(AP)—Queen Victoria, near the end of her life, refrained from giving Kaiser Wilhelm II of Germany "a good snub," because she had decided that it "wouldn't do," it was revealed today by the publication of the final volume of her letters.

The name of the kaiser appears frequently in the letters and they show the late queen as a constant advocate of forbearance when his doings aroused British hostility.

When he sent a telegram to President Kruger of the South African republic at the time of the Boer war, exciting furious anger throughout Britain, the queen wrote:

"It wouldn't do to give him a good snub. Sharp, cutting answers and remarks only irritate and do harm, and in sovereigns and princes should most carefully be guarded against."

"William's faults come from impetuosity, as well as conceit, and firmness and firmness are the most powerful weapons in such cases."

In 1897, four years before she died, Victoria made an entry about her grandson, the present king, then the Duke of York. Four years after

PARIS WOMEN MATCH PURSES WITH BELTS

PARIS—(AP)—Angora felt purses to match belts are a new wardrobe wrinkle. The purses are flat, envelope models, while the belts, designed to wear with sport coats, are finished with a cull silver or gilded buckle.

White, red, gray and dark blue are the colors most often used for the purse-belt ensembles.

Today

By Arthur Brisbane

A Puzzle for Congress. Experiments in Magic. Fighting Religion. If Nelson Had Married.

Copyright King Features Synd., Inc.

More than a thousand of war veterans are in Washington now, close to the capitol, where congressmen can see them. Five thousand more are on their way. And they say they "will stay in Washington until 1945, if necessary, or until they get the bonus paid in full."

Also, some have said "We are the young men of this country, we fought for it, and we propose to run it."

This will add to the hard thinking of the senate and house, now wondering how they can attend to the work on hand, including a deficit of about two thousand million dollars.

It is not a pleasure trip for the veterans. They sleep in tents and the "world's richest country" spends six cents a day on the food of each man, two meals at three cents apiece.

On German's "magic mountain," the Brocken, made familiar to you by Goethe, British and psychological investigators, will endeavor in the light of the full moon on June 17 or 18 "to transform a goat into a handsome youth."

The superstitious believe that the thing can be done, with the assistance of "a maiden pure of heart." Two young women, one English, one German, will be provided, in case there should be something wrong with one of them.

One of the maidens, all in white, will lead a white goat by a silver cord into a circle near a pine fire, anoint the goat with blood, honey, and scrapings of church bells, covering the goat with a sheet.

Bystanders will utter Latin incantations, and when the moon is obscured, the sheet will be removed and it is expected that a handsome youth will appear in place of the goat.

That probably can be arranged, if it is dark enough for a handsome young man unobserved, to creep into the circle, while the goat creeps out.

Two dispatches from Mexico remind you of Russian news. In the "State of Mexico," one of Mexico's subdivisions, every Catholic church is closed, because Catholic authorities have not complied with legislation requiring them to name thirty-four priests, none to be foreigners, and no others to officiate in the state.

Another dispatch says the government has taken 22,000 acres of land belonging to the Malpaso hacienda, dividing the land among 300 unemployed laborers. Each laborer gets about 71 acres of land, and promises to cultivate it diligently.

Giving lands to people that have none, as an offset to crushing and dispossessing the church has been part of the Russian program, as it was part of the French revolution.

Time will tell the effects of today's fight against religion. There is no doubt that the French revolution, although it lasted but a short time, greatly weakened the hold of religion on the French people, except, perhaps, among peasants.

Samuel Johnson, in his life of Milton, expresses the opinion that to suspend religious exercises even temporarily is dangerous:

"To be of no church is dangerous. Religion, of which the rewards are distant, and which is animated only by faith and hope, will glide by degrees out of the mind unless it be invigorated and reimpresed by external ordinances, by stated calls to worship, and the salutary influence of example."

It having been announced that young men graduating from the naval academy at Annapolis will be forbidden to marry within two years after leaving Annapolis, Congressman Cockhan of Missouri will introduce a bill to prevent any such regulation.

Men in the army and navy should marry early because of the probability of their being killed young in case of war, and the desirability of their leaving descendants to fill their places.

It would have been a good thing if Nelson had married the young Canadian girl with whom he was so desperately in love, when he commanded a frigate cruising off the Atlantic coast in our war with England. If he had married that girl, from whom fellow officers dragged him to his ship by force, he might have left after him some interesting little Nelsons and refrained from making such a fool of himself with Lady Hamilton.

Personal Health Service

By William Brady, M. D.

Signed letters pertaining to personal health and hygiene, not to disease diagnosis or treatment, will be answered by Dr. Brady if a stamped self-addressed envelope is enclosed. Letters should be brief and written in ink. Owing to the large number of letters received only a few can be answered here. No reply can be made to queries not conforming to instructions. Address Dr. William Brady in care of The Mail Tribune.

LET US RALLY ROUND THE SPINACH.

According to a press service item, Dr. Walter C. Alvarez has assigned spinach to the rabbits and to people who have the digestion of an ostrich. It sometimes cures them of indigestion.

But it causes a sensitive people a lot of trouble. Dr. Alvarez estimated that the rabbit food craze is worth \$500 a month to any stomach specialist.

This Dr. Alvarez is a good man, and a year or so ago he got out one of the finest little books a layman or a physician either can read on the subject of "Nervous Indigestion" (published by Hoeber, N. Y.). Still, like other good doctors, not to thrust himself forward at the moment, he has his own fads and fancies, and one of them is the idea that it is wrong for people to use much so-called roughage in the daily diet.

That it is better to keep the diet smooth, that is, to exclude many such items as spinach, asparagus, bran or whole wheat, because these may irritate the intestine. I am giving my conception of the teaching of Dr. Alvarez. I want to call particular attention to the fact that he makes no sweeping condemnation of roughage, but on the contrary concedes such diet real value in many cases—as in the present item quoted above. If you have the digestion of an ostrich happen to need anything for indigestion.

I suspect Dr. Alvarez sees chiefly sick people, dyspeptics, old sourfaces, diet drunks, graduates of the various mail-order food specialists' courses.

Some of them have had their teeth, tonsils, appendix and everything removed, and still suffer from fear of exposure. All this must be pretty sad. I wonder that the poor man bears up and keeps as cheerful as he seems in his book. But just the same that sort of life gives even the most determined optimist a tinge of pessimism. It is bound to do so. In

Wall Street, was a great man in that part of the country fifty years ago, and accumulated millions. His wife, who has just died, left more than ten millions, with more than two millions in government bonds.

This weakens the theory that women know nothing about business, although life insurance statistics show that it usually takes about three years for some man to get any money that a widow may inherit.

Hirohito, Japanese emperor, going in state to open parliament in Tokyo, is guarded on all sides as he passes through the streets, policemen searching the crowd for weapons. This must seem unbelievably shocking to the older Japanese. To them any thought of an offense against the sacred person of the mikado would be inconceivable.

The Red Star, representing Russia's army, warns Japan not to annoy Russia, or run a risk of war, by letting the Japanese militarist-jingo element go too far.

Japan's prime minister says his country has no idea of any trouble with Russia, and doesn't intend to have it, which shows good judgment. If Japan fought Russia today, she would find Russia unlike that of the czars and corrupt grand dukes.

West Contract Co. of Portland awarded \$127,455 contract for widening and paving Brooks-Salem section of Pacific highway for distance of seven miles.

QUESTIONS AND ANSWERS. No Sugar Substitute. Could you give me a substitute for sugar in my tea or coffee? I am trying to reduce. Mrs. S.

Answer—No. There is no substitute that is good for your health. Don't Give Baby Popcorn. Our 17 months old baby likes popcorn very much and it does not seem to bother him. Mrs. P. F. C.

Answer—Because of the chance of inhalation of a bit of the hull and its lodgment in the lung or in a bronchial tube, I should advise you not to give a baby popcorn until he is over 3 years of age. In any case if a youngster should "choke on" any such foreign body, pick him up by the feet and thump his back between the shoulders with the end of your fist for a minute. If this fails to dislodge the obstruction, and enable him to cough it out, place the child immediately prone on the floor or table (belly down), face turned toward one side, and apply prone-pressure artificial respiration until medical help arrives. If you are not prepared to apply artificial respiration, don't dare go to sleep tonight before you send for the free booklet on resuscitation. Enclose with your request a stamped envelope bearing your address.
