Joan Bennett in Craterian Film

Joan Bennett plays the leading role in "The Trial of Vivienne Ware" which comes to the Fox-Craterian for two days, commencing Wednesday, June 22. Based on Kenneth M. Ellis' radio drama and widely read novel, it depicts the thrills of a murder trial and shows to what extent circumstantial evidence may be employed in convicting an innocent person. As Vivienne Ware, the beautiful society girl and heiress, Miss Bennett is tried for the murder of Damon Fenwick, the millionaire architect to whom she was affianced.

As an extra special added attraction for the people of southern Oregon, Victor A. Tengwald will present his own composition "Crater Lake Waltz," as sung by George Andrews, popular baritone in conjunction with latest motion pictures of beautiful Crater Lake National park.

Edward Robison Stars Holly Hit

Showing for the last times at the Holly theatre today is "The Famous Ferguson Case." Much interest has been aroused in this picture due to the fact, no doubt, that the picture has been taken from an actual case. Many remember and recognize the case to which this picture refers—especially the older folks.

Tomorrow, the Holly will present Edward G. Robinson in his latest picture, "Two Seconds." You have seen Robinson as the gang leader in "Little Caesar." You saw him as the scandal czar in "Five Star Final." You saw him as a racketeer in "Smart Money." In "Two Seconds" Robinson again displays his ability and proves again that the saying that he is a man of 1000 characters is not entirely an exaggeration. The picture will be at the Holly for four days starting tomorrow. There are a number of interesting things about this picture and more will be printed tomorrow.

MAN TO MAN

-A STATEMENT BY THE GILLETTE SAFETY RAZOR COMPANY

In its recent confession the Gillette Safety Razor Company told you that, under the stress of introducing a new razor and blade, uniformity had suffered; and told you how our efforts to correct the trouble had resulted in the development of a far superior product.

Several readers have asked us how we can make the bold, positive statement that today's Gillette blades are the sharpest, smoothest-shaving blades we have ever produced. This is a fair question, and here is our reply: A marvelous new testing machine, recently developed, scientifically proves that these blades have never before been approached in keenness.

We cannot discuss the nature or details of this machine because it is being patented. But we can tell you that it measures microscopic dimensions with unflinching accuracy—revealing with mathematic exactness, actual degrees of razor-blade sharpness. So when we state that today's Gillette blades are the sharpest we have ever made we are basing our assertion upon

fact. We know we are right and can prove it.

Further than this—everyone knows that a razor blade must be able to bend without cracking when tightened in the holder. This requires steel of a certain temper not suitable for a keen cutting edge. The problem is to permit flexing and yet have a hard edge that can be ground and stropped for proper shaving performance. Gillette has achieved the solution of this problem in the manufacture of its slotted blades.* These blades are made by a special tempering process that makes the edges exceptionally hard, while the center, of a different temper, flexes easily.

We urge you to try today's Gillette blades—the regular blade in the familiar green package or the BLUE SUPER-BLADE in its blue package. Cellophane wrapped. Do so without risking a cent. If you don't agree they are the sharpest, smoothest-shaving blades you have ever used, return the package and your dealer will refund your money.

The Gillette Blue Super-Blade

The \$2 Kroman De Luxe blade has been withdrawn from production. We offer the Blue Super-Blade as its successor. This sensational blade is far superior to the Kroman and costs considerably less. You pay only a few cents more than for the regular blade and get unmatched shaving comfort. Its extraordinary shaving performance will convince you that the Blue Blade is the sharpest ever produced. A blue color has been applied to the blade for easy identification. It is contained in a blue package, Cellophane wrapped.
