NO ARRESTS NOW FOR DELINQUENT AUTOMOBILE TAG

The state police have been instructed to make no arrests for non-conformity with the auto license regulations, until on and after July 15—the end of the motor season. Beginning with that date, according to instructions received from Salem today, all autos will be required to bear 1932-33 plates. While no official word has been forthcoming, it is held unlikely that any further extension will be granted.

Effective now, all foreign licensed cars, whose 60-day permit to operate in this state have expired, are subject to arrest. Most of the permits operative in this county, ending July 1, and a close check on them will be made by the state police. A number of California licensed autos, whose owners are engaged in a gainful occupation in these parts, will be required to purchase Oregon licenses or lock up their vehicles. The names of all such have been compiled, and the state police have received orders to state no evasion.

Insurance of temporary permits by the sheriff's office this morning showed a sharp decline, as a result of the Fourth of July holiday. It is expected to pick up next week.

There has been a decided increase in the number of new license plates appearing in this city the past week.

Zaro Offers Novel Program At Holly

There is "something new under the sun" appearing at the Holly Theater this week. Zaro, who is appearing all week at the Holly is the most talked of personality to come to Medford for some time. The eminent scientist, and distinguished astrologist, presents a modern adaptation of the strangest and oldest science known to humanity, astrology, which accurately foretells the future and explains the past. Astrology has predicted almost every earthquake, war, flood, drought and every major catastrophe the world has known. There is no embarrassment in the manner in which Zaro answers questions and no names are mentioned, says John Niedermeyer, manager of the Holly.

Wednesday will be "answer all" day at the Holly. At that time Zaro will answer all questions possible during his allotted time on the program and the others will be placed in a sealed envelope and placed in the box office so that patrons may get them the next day.

Hidden from your view

Huge deposits of hard carbon inside your car engine! Your 35¢ oil may be responsible. It's much more serious than mere knocks and lost power. Hard carbon splinters grind into your valves, down cylinder walls, even through the bearings

THIS KIND BLOWS AWAY
An entirely different type of carbon is formed by Shell Motor Oil. A powdery carbon as harmless as soft soot. Most of it blows right out with the exhaust gases.

ANY OIL must lubricate to the very top of the pistons, where it burns—and forms carbon. But some oils form more carbon than others. And some deposit a ruinous hard type of carbon. The 30¢ and 35¢ oils are often the worst carbon formers.

But you don't have to clog your motor with hard carbon. Change to Shell Motor Oil. It forms a powdery, soft carbon—and only 1/3 to 1/5 as much carbon as do even the most expensive oils.

The correct grade of Shell Motor oil for your car will cost you only 25¢ a quart. It is positively guaranteed to do as good a lubrication job—just as long—as any other correct grade oil for which you would pay 30¢ or 35¢. Pocket that difference—and avoid hard carbon, besides!
