

CATTLE INDUSTRY FIRST TO START UPWARD TREND

Steady Advance in Value of Hogs Watched With Interest—Further Rise Predicted—Farmers Rejoice

CHICAGO, July 19.—(AP)—Just about the happiest industry at this stage of the economic situation is that which deals with livestock.

Long Run of Advances Last week there was a reaction in hogs but it did not take place until 32 successive daily price advances had raised the top from \$1.30 on May 28 to \$2.55 a week ago.

President Charles A. Wilson of the Chicago Livestock Exchange terms the livestock gains "seasonal" but added: "The rise from the loss of last winter has been very marked. Hogs, which reached the lowest price in 35 years, and cattle, have made a good recovery."

Others at the yards claim the upward movement has only started and some enthusiasts assert livestock may usurp the position formerly usually reserved to grains as well-wether for a forward movement of commodity prices generally.

Meat Shortage Acute They point out the shortage of meat is still acute and cite that June hog receipts were the smallest since 1885.

And the railroads likewise are happy over the meat shipping prospect. President Ralph Budd of the Burlington railroad said last week: "No other thing since the depression began has heartened me so much as the continued rise in livestock prices."

He added the "rest of the country cannot be restored (to prosperity) until the farmer has purchasing power."

And the farmer takes courage at these concrete results of the recent movement: A carload of hogs sells \$500 higher than a month ago.

A carload of cattle brings \$650 more than at the low point in May.

GASOLINE THEFTS CONTINUE IN AREA

Gasoline stealing and "sympathy racketeering" continues in Jackson county on a slightly decreased scale. State police continued search for "friends" who after a visit with Josephine county acquaintances departed with silvers, bedding, and a rifle with a gold sight.

AUSTRALIA DAIRYMEN BALK AT LOW PRICES

PERTH, Australia.—(AP)—Dairymen have decided to supply no more milk to the people of Perth at present prices.

They demand 28 cents a gallon for their milk, but the distributing companies refused to pay more than 22 cents.

So the dairymen announced their intention to turn all their milk into butter. Only sufficient milk for hospitals and invalids and infants will be made available.

Cableways Will Carry Hoover Dam

LAS VEGAS, Nev.—(AP)—Construction of a network of cables connecting the sheer walls of Colorado canyon is the newest phase of the building of Hoover dam.

Four other cableways will be movable on both sides of the deep canyon, and will be suspended from steel towers up to 90 feet in height erected on steel tracks.

On connecting vertical cables, men and supplies will be lowered.

Anti-knock That doesn't fade in summer heat. The superior hot weather stability of Union 76's increased octane rating is now definitely proved by desert runs. Over 100 miles per hour for fastest stock car mile—30 other records made with 76 gasoline. On a desert dry lake bottom 5 miles long and 2 to 3 miles wide in atmospheric temperatures varying from 90 to 120 degrees, two Auburn cars of the usual higher compression type now being built by most automobile manufacturers broke practically all American Stock Car Speed records last week. It is significant that these were the first records to be established in recent years with a strictly stock car. The premium fuel—the gasoline was 76, taken directly from a roadside pump. What Cooper says East Cooper, one of the most famous racing drivers, observed the record runs and states: "There could be no tougher test for gasoline than that of the dry lake run. With the air dry and hot—vaporization of gasoline occurred almost in the feed lines. A fuel that was not scientifically refined perfectly would never have stood up." How You Benefit 76 gasoline has an advantage over other fuels, of a crude oil supply particularly adaptable in developing a higher octane rating. 76 is designed to stop your engine knocks and give your car new smoothness, no matter how steep the grade or how hot the outside temperature. You'll note, too, that POWER is increased. That's because it contains the power-producing fractions of the distillation range that assure maximum energy on every piston stroke. You will notice this extra power particularly on hills and in traffic pick-up. Five factors: non-premium, anti-knock, added power, increased mileage and the quick starting quality of 76 provide the greatest economy in motor fuel costs. Money Back Guarantee New Union 76 is sold on perhaps the most generous money back guarantee ever put behind a gasoline. Read it! After you try 10 gallons of New Union 76, if you do not recognize an improvement over any non-premium fuel you have used, just send us your receipt and we will refund the amount of your purchase in cash. Switch at Once! Don't go through the summer with an engine that knocks. Just switch to 76 and get an ANTI-KNOCK that doesn't fade in summer heat—one that gives you extra power and mileage too. It's easy to find 76. Just look ahead. Slow down when you see the 76 banner. There you'll find gasoline that breaks almost all of the American Stock Car Speed Records.
