Comment Day's News

YOU read the foreign news at all you probably caught this para

graph; "One hundred and thirty thousand tons of Italy's fighting ship-practically one-third of the entire navy -will be retired under a program beginning August 25. The purpos is to SAVE MONEY."

When any European nation begins laying aside instruments of war in order to save money, it is interesting

HERE is an interesting thought: If all the nations in the world would cease all expenditures for war purposes for the next 15 years, the tremendous burden of debt that weighs these nations down and puts such a clog on the transaction of business could be lifted, WITHOUT additional taxation.

It really looks as if that would be a good idea, doesn't it?

I' would be a good idea, but it can't be done.

It can't be done because of FEAR. Each nation is afraid to reduce its military and naval expenditures because if it did some other nation might go on ADDING TO its armament and so become strong enough to dominate the world.

Fear keeps us from doing a lot things that ought to be done.

WE are now at a very low point of one of the great depressions of history. PERHAPS we are at the LOWEST point.

If you had sufficient courage, you might buy up to the limit of your cash and credit and make a lot of money. But fear restrains you. So you sit tight and do nothing.

In the years to come, you will look around you and see wealthy people who made their money because in this present period of extrame depression they weren't afraid to go ahead and take chances on the fu-

You will then say to yourself: "Fear is a terrible thing. It prevents people from realizing their opportunities."

BUT back in 1929, when prices of everything were still going up. there were people who QUIT BUYING because they were afraid prices would go down. Thus they were saved from

So fear, you see, is useful at some times, just as it is a handicap at others. There are times to be afraid and times NOT to be afraid.

The truly smart person is he who not to be afraid.

In this world, there are optimists and pessimists. Both are useful. Generally speaking, the optimists should be in control in times such as these when morale is low and courage is lacking. The pessimists should gain control in years such as 1927, 1928 and 1929, when everything was booming and the future looked perpetually rosy.

Unfortunately, the exact opposite of this is true. In boom times the optimists hold the reins and in de-
