THE Cortes, Spanish parliament, takes a vacation after working steadily for fourteen months. It has been a busy session. The grandees of Spain, who would have thought it could never happen, have lost their lands, partly because they would not sympathize with the revolution, partly because they are grandees. The order of Jesuits, wealthiest and most powerful in Spain, has been suppressed, and all of its property that could be found, including all real estate, confiscated.

TRUE the dead languages have a place in our cultural life,—and an important place,—but if we could be CERTAIN, of every high school and college graduate having acquired the ability to think clearly and independently, we would not worry about their faint knowledge of the beauties and complexities of Greek and Latin.
