INCREASED SUGAR TRADE IN ISLANDS PLAN OF BRITISH

Closer Union Between Trinidad, Windward and Leeward Isles Aim in Boosting Volume of Empire's Barter

LONDON.—(AP)—The long arm which the British empire stretches Caribbean sea is reaching out for around the sparkling blue of the sugar. Powers in Downing street have spoken. Seeking a new region wherein to quicken the empire's progress, they have singled out this lush and palm-fringed paradise of islands, strung like gaudy beads all the way from South America's mainland to North America's Porto Rico. To Survey Prospect A government commission is going out from here in November to investigate the chances for "closer union between Trinidad, the Windward Islands, and the Leewards." Unofficially, that means they hope to arrange a single government for them. At present there are three British colonial governments, one for Trinidad, one each for the other groups. If the plan works there will be a firmer, more vigorous foreign governmental unit on America's southern doorstep. The territory is only about 3000 square miles, about a fourth smaller than the state of Connecticut. Strategic In Trade But it encloses the eastward Caribbean. It commands approaches to the Panama canal and the South American route to New Orleans and other American cities. And it has a population of 750,000. Officials here discount the political significance of the move. After all, they argue, the islands have been there a long time. They are already British-owned, whether separate or united. A more interesting possible effect is economic, for the languorous, tropic isles are to be tidied up for business. All the big new ideas of industrial civilization—efficiency, rationalization, organized production, unified marketing and distributing—will come down on these heat-drenched communities. Sugar Main Revenue And since these islands store a large undeveloped sun-bred teeming wealth of cane and fruit, all this means—sugar. While a few islands in the Windward-Leeward group produce little sugar, in the remainder approximately 80 per cent of export revenue comes from that commodity, while about 72 per cent of population either works on it or is dependent on it. Trinidad is less specialized. Furthermore, while sugar, as far as now known, was not specifically included in Ottawa agreements calling for free trade, fruit canneries are enormous consumers of sugar and plans to develop both British and Canadian canning industries were firmly drawn.

SENATE TO PROBE CRASH OF INSULL UTILITIES PYRAMID

(Continued from Page One) left Washington last night for Chicago. The announcement of the senatorial investigation came on the heels of rapid developments here. State's Attorney John A. Swanson, after telephone communication with an undisclosed person in Washington, cancelled a planned trip to the national capital and said he would await developments in moves to extradite Samuel Insull, head of the toppled utility pyramid. Swanson said the call "obviated immediate need" for his trip. It was known he had planned a conference with President Hoover in efforts to hold Insull in Greece, pending extradition here to face charges of embezzlement and larceny. The cancelling of the trip was interpreted in official circles as indicating the federal government was expecting speedy action to consummate Insull's return. Swanson frankly was nonplused at the announcement. Insull no longer was under arrest in Greece, and said the affair was "disquieting." Two of his assistants are standing by, however, to go to Greece to complete arrangements for extradition. Famous Screen Team In Craterian Drama

No mere "happy ending" to such a romance could have been as genuinely thrilling and stimulating as the one that the producers so courageously chose for "One Way Passage," playing at the Craterian theater today and tomorrow. There is a breadth and depth to such a story as this, a gallantry that lifts it above the level of everyday entertainment. William Powell and Kay Francis are ideally cast in the roles of Dan and Joan. Powell's jaunty, devilish manner stands out in vivid contrast. There is a richness and a mellowness to his performance that is likely to make his characterization in this picture long remembered. There is an
